Here's a telegram from Santa

"Listen here, Lads," shouted the Toy Acadian King one morning. He stood on top of a big blue Mack Dump Truck, so everybody could see and hear him. "Santa says that girls and boys all over the country are asking for more and more Arcade Toys. He wants us to make as many as we can."

So the little people are as busy as can be, pouring the melted white-hot metal from their great furnaces; fitting parts together; painting the finished toys in bright colors.

Every busy day they make hundreds of the famous Arcade Toys. There are Arcade Kitchen and Bathroom sets, for dolly's house—every piece in spotless white lacquer, and "just like mother's." There are Mack Trucks, Yellow Cabs and Coaches and A.C.F. Coaches; Buicks and Chevrolets; Fords and Fordsons; and the McCormick-Deering Farm Outfit.

Each toy is exactly like the real thing—with rubber tires, too, if you want them. And they last a long time.

Mothers, too, like Arcade Toys. They stimulate imagination; keep youngsters happy for hours.

You'll find Arcade Toys at leading department stores and toy shops; or write us—we'll tell you where to get them.

You can get a free story about the Toys Acadian toy makers. Just send us your name, address, and 4 cents in coin to cover mailing cost.

ARCADE TOYS

"They Look Real"

London and Brussels, or Frankfort and Zurich, or Cologne and Baden-Baden. A route equivalent to that between New York and Pittsburgh would be the route between London and Cologne. The London-Paris route is about the same distance as that between Akron and Cincinnati. Our New York-San Francisco Air Mail routes may be compared with the London-to-Bagdad route, the section between Chicago and San Francisco being about equivalent to the routes between London and Constantinople.

The route between Paris and Marseilles is about the same as a direct route between Chicago and Kansas City. That from Paris to Amsterdam is about equivalent in distance to a route between Atlanta and Jacksonville. If a route were established between Los Angeles and Tulsa it would be about the equivalent of the route from Berlin to Madrid. A route between Minneapolis and Tulsa by way of Kansas City would compare in distance with the air line between Berlin and London. The distance between Chicago and Detroit is about that between Hamburg and Amsterdam. From London to Amsterdam is approximately the air-line distance between St. Louis and Memphis.

Another printed slip of information handed to prospective passengers is interesting:

Special clothing is not necessary for air travel; the clothes that would be worn on a similar trip on the ground are adequate. Dust which may be experienced when looking down from the top of a building is unknown in an airplane. A person is not at all affected by riding backward in a plane, as is sometimes the case in a railroad car. There is no restriction on moving freely about the cabin. Lavatory accommodations, drinking water and other conveniences are provided. Passengers are not to feel alarmed if the airplane is banked—tilted on one side—as if the pilot steps on above down the motors, or if the airplane is headed right up to a corner before starting; these are all in the day's work.

Germany has gained leadership in commercial aviation which it will be difficult for any other nation to overtake. It has used the airplane to build up a new national unity. It has an understanding of the stimulating and transforming possibilities of air commerce which no other nation has, and it is pressing on to their utilization.

The All-the-Year Attitude

Germany has not yet made flying profitable, measured in terms of dividends from corporations in the class of United States Steel or General Motors. The Germans are still struggling with elaborate problems of gas load and energy, which await solution in the laboratories and testing fields. Nevertheless, flying is a business in Germany; the same intangibles which stirred capital into early American railroads long before they began to show a profit is luring sagacious German market into the financing of air lines.

Yet Herr Merkel has full confidence in the ultimate permanence and profits of air commerce, and his is a confidence established from a wide practical experience. He likes to talk of the American development of railroad transportation, regarding which he is amazingly well informed.

This is perhaps because the wide development of the American railroads has, in the extent of territory covered, some similarity to the modern pioneering in air transportation.

"I believe commercial aviation is established in Europe," he said, "otherwise I would not be here. We are yet in aviation's childhood stage, but we are demonstrating the reliability of air commerce. The solution of some of our technical questions will certainly provide great advancement. One of the first tests of the commercial-aviation concerns was an all-the-year attitude of utilizing this new medium of commerce, and this today is the attitude of the German people toward air travel.

"The problem for America to work upon is, in my opinion, that of governmental and municipal cooperation with air-transportation companies. The airdrome should be a publicly owned utility. This simplifies greatly the requisite public aids to air commerce, such as weather and radio services, enforcement of police regulations, lighting, and so on. In the starting of civil aviation in Germany the cities shared the losses where there were any. All airplanes are now started and landed at German airdromes under police supervision.

"We have reached the points in safety and convenience and in certainty of schedule that may be said to abolish the intangible factors of air-commerce operation. We need advancement in power efficiency so that the relation of power to pay load carried will be more satisfactory. Our next progress in commercial aviation will come through the laboratory and the testing work."

I was personally impressed with the advancement in efficiency noticeable as we flew over the twenty-three countries served by the Deutsche Luft Hansa air lines. We traveled by stormy weather, at night as well as by day, over long sea stretches in seaplanes, over mountainous territory, and all with a punctuality that rivals the best train service.

It would take a lifetime of travel on the ground to see in Europe what we saw in a summer on the Luft Hansa air lines. In fact, no one could ever see by ground travel the beauty of the Alps as quickly unrolled before the air traveler. Jacob Gould Schurman, our ambassador at Berlin, spent his vacation last summer in the Scandinavian countries, but he could not have seen in a summer what we were able to see there in a week of flying travel, in which we flew more than 3000 miles around and across the Baltic.

The Unity of Nations

And the Deutsche Luft Hansa company has undoubtedly succeeded in making air travel popular in Europe. In June of this year they had 220 planes in regular service, capable of carrying more than 30,000 passengers monthly, and every seat on all the principal lines was sold days and often weeks ahead.

A map of the air lines of this company looks like a streamer of red banners floating out from Berlin, touching almost every great city in Europe—London, Paris, Geneva, Vienna, Prague, Stockholm, Moscow, Copenhagen, Amsterdam, Konigsberg, and scores of others.

The passengers on these planes are not limited to the rich and the various, every sort of people are flying, from knitting manufacturers and commercial pickle salesmen to captains of finance and international ambassadors. On my trip from Berlin to Cologne I had as seat mate at different times an Italian wine seller, a director of the company, a Jewish dealer in antiques, and for a while the American ambassador, Jacob Gould Schurman. Women travel by air regularly from Cologne to Dortmund to do their shopping, and at the airports one meets one's friends and often has tea and bridge. Of course a strong appeal to passengers is the elimination of boundaries and the swiftness of travel.

For those who fly, life has already been speeded up to an incredible degree. In one month I flew across twelve or more countries, yet was only half through my contemplated trip. In July I started on the wings of the morning at three o'clock from Berlin, saw the sun rise from a far horizon, crossed Poland, breakfasted in Danzig and was in Konigsberg in time to deliver an early-morning lecture at the University of Konigsberg, 100 miles from Berlin and an all-day train trip. I felt no fatigue, but by any other means of travel the average traveler's physical strength would have been exhausted.

It is inconceivable to my mind that air transportation will be diverted to war purposes by the peoples of Europe. Rather will this new means of travel and interchange

(Continued on Page 172)

Anybody Can Play

Schoenhut's Indoor Golf is the rage of the hour—Have you taken it up yet?

Schoenhut's Indoor Golf is one of those games that everybody can play and 'most everybody does. It is played with a stick resembling a golf stick, but in place of the head there is a miniature golfing figure—"Tommy Green" when a man; "Sissie Lofter" when a woman—who makes your strokes for you.

You control the action of "Tommy" or "Sissie" through a lever located between your first and second finger. It's the greatest sport imaginable. "Tommy" and "Sissie" drive, put or approach, just as in real golf, according to the kind of club you put between their fingers and according to your skill in operating the lever.

A full set of clubs is furnished with each miniature figure, together with putting greens, tees, bunkers and everything that goes with a regular golf game in miniature. The small, hollow, celluloid balls are perfectly harmless. Thousands of golfers all over the country are enjoying this new and exciting game of Schoenhut's Indoor Golf. Four thousand sets were sold to the golfers of New York and Philadelphia alone within three weeks of its introduction. You will find that it requires as much skill and scientific accuracy as a real game of outdoor golf—a truly worthwhile amusement.

Schoenhut's Indoor Golf sets are sold for $10.00 and $15.00 a set, depending on the number of parts included. If you cannot get one at your department or sporting goods store, write direct to the factory.

Notice to Professionals—It will pay you to carry Schoenhut's Indoor Golf.

The A. Schoenhut Company

2176 East Hagert Street **Philadelphia, Pa.**

MANUFACTURERS & PATENTEES

To say "TREMENDOUS" *see Banff!*

THE eye cannot measure it all at once. Your gaze sweeps out and far . . . there are peaks, a mossy mat of greenery, a foaming watercourse, a rough intervale, more peaks . . .

Your eye returns to the hotel promenade. The people are ants! The horses, pigmies! The huge hotel dwarfed to a nursery toy!

For the first time, you realize what the word "tremendous" means. You comprehend the size, the majesty of that magnificent canvas spread out before you. Those peaks are ten-thousand-foot giants. That mossy mat is a forest of towering pine. That watercourse is the thundering torrent of the Bow. That tumbled intervale is a day's hard ride. That snow-capped range is the back drop of all creation.

Yes, all this you see from Banff Springs Hotel. You ride out into it at will. You golf in the midst of its glory. You wake to its rosy dawns, you eat beside its full sunshine, you sit out dances while the moon floods its peaks with cold fire.

Open May 15. 450 rooms. Boating, swimming, sulphur baths . . . tennis, golf . . . motoring, trail-riding, mountaineering, Indian celebrations and the most tremendous view on the continent. Plan for a long stay—so much to see, so much to do. Interested service from your own agent or any Canadian Pacific office listed below, or write to Banff Springs Hotel, Banff, Canada.

CARLTON
HOTEL
IN WASHINGTON

"We go to the Carlton Hotel in Washington"—"Of course, you'll find us at the Carlton this winter"—"Yes, indeed. I think you'll like stopping at the Carlton."

This is how a hotel establishes itself. The people who come here take for granted quiet rooms designed in good taste . . . lounges that have the atmosphere of their own drawing-rooms . . . a cuisine as perfect as their own.

And being sensible people they want a hotel which is conveniently situated in town—two squares beyond Lafayette Park and the White House—for their friends live nearby or there may be shopping to do of an afternoon or a round of official duties on Diplomatic Wednesday.

And you will hear, "I believe the Carlton is run by the same people who run the Wardman Park." That places it instantly, for the Wardman Park Hotel has long been known in Washington for its tradition of perfect service and distinguished clientele.

A hotel which is a pleasant place to be

Rates for suites, $20, $25 and $30; for double rooms, $8, $10, $12 and $15; plenty of single rooms from $6, $8 and $10. It is suggested that you make your reservations in advance. The Carlton Hotel, 16th St. at K St., Washington, D. C.

Hey! Get a Load of this

Here's a Real Contest

No kidding, gang, here's a chance for you air rifle lovers to do your stuff. The Open Road for Boys Magazine is staging a gigantic air rifle shooting contest, open to all under 18. And talk about prizes—more big cups and engraved medals than you can shake a stick at—official targets and everything. Just write "Air Rifle Contest, 130 Newbury St., Boston, Mass.", and you'll have all the information about this greatest of all contests by return mail. Be a winner—enroll now.

OFFICIAL TARGET

Five big contest bullseyes—and one practice bull—just like the big meet. Good rifle teams shoot at. And there's one of these official targets waiting for you—just write "Air Rifle Contest, 130 Newbury St., Boston, Mass.", for information. HURRY!!!

UNERRING ACCURACY *with a* No. 25 DAISY

Of course you can be a WINNER—won't your neighborhood gang envy you when you show them one of these big cups or an engraved medal? The No. 25 Daisy Pump Gun shown here is built JUST FOR THIS CONTEST—accurate to a hair—beautifully balanced—everything a REAL TARGET GUN should have, and at the ridiculously low price of only $3.95. Your local hardware or sporting goods dealer is just itching for a chance to show you this, and all the other fine guns in the 1933 Daisy line. WIN WITH A DAISY!!!

The Daisy Buck Barton Special is a knockout—modeled along the lines of rifles that all cowboys carry in their saddle cases. Daisy's adjustable-type sights, based on the principle, just found in the old bolt rifles. 1000 shots with one loading—just as fast as you can work the carbine-type lever—and built to stand the tough handling your Buck Barton fans will give it. And best of all, it only costs $1.95.

1.95

POLISH UP *your* AIM *on a* BELL TARGET

Practice, practice, PRACTICE—that's the way to make sure you'll be among the winners in this enormous hair-rifle contest. And the Daisy Bell Target is just the thing you need to get in trim. Made of heavy target steel, and equipped with a bell that rings when you hit the bullseye. Bell target and 12 target cards for only 50c—at your dealer's or we'll send it to you postpaid upon receipt of 50c.

STRAP ON A REAL SIX SHOOTER

50¢ COMPLETE

BULLS EYE COPPROTECT SHOT

The OFFICIAL Daisy ammunition. Big 5c tube contains 200 coppercoated pellets. Better lay in a supply from your dealer TODAY—practice with it, and make sure-offend count with it, too. BULLS EYE is the most accurate, hardest hitting air rifle shot in the world. WIN WITH A DAISY AND BULLS EYE SHOT!!!

3.95

TRADE IN YOUR OLD AIR RIFLE

You don't want to take a chance on missing out on all those swell cups and medals that the Open Road for Boys is offering in their air rifle contest, do you? If you own an air rifle and it doesn't shoot EVERY shot true to the mark, maybe we can make a dealer with you for a new one. Write us, giving make, age, and condition of your present air rifle and we'll tell you by return mail how you can get a brand new DAISY, and keep up a winning score in this big air rifle contest.

THE "SPRING-STEP"

A new Keds built for speed —

This sensational new Keds basketball shoe has a tough, sure-gripping sole. The "Spring-Step" is shaped to fit your feet—has a special sponge rubber arch cushion—cushion heel to absorb shocks that tire muscles—strap to support the instep. Comes in white with black trim.

"A BOY'S biggest asset is his speed of foot," writes a world-famous athlete. He adds, "Your shoes must be *exactly* right." *And he plays in Keds!*

Even in fastest action, this special Keds basketball shoe grips surely. The soles are tough and springy. They absorb the jars that tire muscles and slow down play. The uppers are very light yet so strong they protect the ankles against sudden twists and sprains. And the special Feltex innersole helps to keep the feet comfortable.

There are Keds for every sport, indoors and out. Ask for Keds by name. *And be sure to look for the name Keds on the shoe.* Keds come in all popular styles, at prices from $1.25 to $4.50. They are made only by

Numerous Improvements Feature 1928 *Paige* Line

PRICE reductions of from $100 to $160 on 10 of the 20 Paige six and eight-cylinder body models feature the announcement by the Paige Motor Car Co. of numerous refinements in design. These reductions apply to all six models of the eight-cylinder line, these now ranging from $2,195 to $2,665, as well as to the 6-45 cabriolet roadster, 6-65 four-passenger roadster and the 6-75 cabriolet roadster and coupe, the last four all having been reduced $100.

Adoption of a new design manifold, rubber engine supports, an oil filter and a Lanchester vibration damper on the 6-75 feature the six-cylinder engine changes. On the cars now coming through, the inlet and exhaust manifold are cast in one piece, with a cored intake gas heater partially surrounding the central part of the inlet manifold. In the inlet manifold, which is of the four port type, all sharp corners have been eliminated. The exhaust manifold increases in diameter from rear to front, with the main pipe attached as formerly at the front end. This gradual increase in diameter is said to have materially aided in improving engine performance by preventing the building up of back-pressures near the front cylinder exhaust ports.

Four-point suspension is now used on all sizes with rubber insulation on the 6-65 and 6-75. The front supports have the U. S. rubber mounting, while the rear supports are of the trunnion type. A forged steel bracket bolts onto the engine at either rear side, this bracket having a cylindrical trunnion shaft, fitting into a sleeve in a malleable iron bracket riveted to the frame, and insulated from it by means of a rubber bushing flanged at one end. A rubber washer insulates the outer end of the engine bracket from a steel plate used to reduce side motion in the supports. Clearances at the end of the trunnion shaft have been designed so as to prevent the rubber washer or flange on the bushing from being in compression when assembled. A feature of this suspension is that the engine can be removed without disturbing the rubber mounting.

Radiator mounting on the 6-65 and 6-75 has also been changed. Formerly radiator cores were bolted down to the front frame cross-member. Cores now are hung inside the shell and the shell fastened down. A double V-type brace rod is used on these models to locate the top of the radiator shell. Another feature is the provision of a hood support on the cowl, so as to prevent marring of the finish when opening the hood.

Distributors have been set ahead two degrees farther than formerly, due to the new

Price Changes Made in Paige Line

	New Price	Old Price
6-45 Cabriolet Roadster	$1,195	$1,295
6-65 Roadster	1,395	1,495
6-75 Cabriolet Roadster	1,995	1,995
6-75 Coupe (4-p.)	1,895	1,995
8-85 Phaeton	2,195	2,295
8-85 5-p. Sedan	2,255	2,365
8-85 4-p. Coupe	2,495	2,665
8-85 Cabriolet Roadster	2,495	2,655
8-85 Limousine	2,665	2,795

Paige Model 8-85 Five-passenger sedan

manifold, and this has resulted in increased power and better acceleration.

A nickel-plated spark plug wire conduit has also been adopted to protect against shorting. Nickel plating is now also being used for such parts as radiator hose clamps, etc., to prevent rusting. Interior changes in the engines have been confined chiefly to a slight increase in compression ratio of the 6-45, by means of decreasing the combustion chamber height 1/32-in. As previously mentioned, a Lanchester vibration damper has been adopted on the front end of the 6-75 crankshaft. An air cleaner is now also standard equipment on the eight as well as on the sixes.

New one-piece intake and exhaust manifold on Paige sixes. Splits at ends are provided for expansion

Smaller, 20-in. wheels have been incorporated on the 6-65 models these now taking 30 by 5.25 balloon tires, decreasing overall height on these models. A further appearance of reduced height on all body models has been achieved through the use of lower top lines, and changed window reveal contours. Backs have been rounded off at the top, and visors have been shortened to improve external appearance. New color schemes are used throughout, a new style instrument board has been adopted and interior finish has been materially improved through the use of new upholstery, built in arm rests, and improved paneling. Mohair is used on the closed six-cylinder models with broadcloth on the eights.

High Compression Heads Optional on LaSalle

Following inquiries for LaSalle roadsters and phaetons equipped with high compression heads and low gear ratio, as a result of the test at the General Motors Proving Ground in which a similarly equipped roadster averaged 95.2 m.p.h. Cadillac Motor Car Co. announces it is offering similar equipment for LaSalle roadsters and phaetons. The new high compression heads have a compression ratio of 5.1 to 1 with a compression pressure of 100 lb. Ethyl gasoline or other anti-knock fuels are to be used with these heads. The new gear ratios are 4.0 to 1. Extra cost for this equipment is $125. When such equipment is used, the factory recommends the purchase of wire wheels, due to the higher speeds and increased acceleration. These wheels are offered at $95 additional, bringing the total cost for this special high speed equipment to $220.

Three new custom-built bodies originated by Fleetwood have been added to the LaSalle line. These include a two-passenger coupe, listing at $4,275, a five-passenger sedan at $4,475 and a town cabriolet listing at $5,000.

Special appointments in the coupe include a one-piece windshield, courtesy lights in the dust shield and a light flooding the package compartment in the rear deck.

Special equipment in the sedan includes two foot cushions and a pillow for the rear seat, smoking set with cigar lighter and ash trays, walnut vanity case, clock, mirror, memo pad and two silver perfume bottles, all inclosed in the vanity case.

New Ford Ready for Production

The following statement has been issued by Edsel B. Ford, president of the Ford Motor Company, in regard to the new Ford:

"The new Ford automobile is now an accomplished fact. The engineering problems affecting its design and equipment and affecting also its manufacture have all been solved.

"But before a single car of the new type is offered for sale to the public each part will have been tested under every condition which we have been able to discover in more than twenty years of building automobiles for use all over the world.

"We know now exactly what this new car is. We have built a number of these cars and they have been performing even better than we had hoped for under a variety of conditions.

"We know also what is needed as to personnel and factory equipment in order to produce these new Ford cars in greater numbers than any manufacturer has ever attempted before. The work of retooling our plants throughout the country to prepare for the heaviest production schedule we have ever undertaken, is now nearly complete.

"But we realize that any new automobile that is to gain and hold public esteem today, whether it shall sell for $500 or $10,000, must perform exactly as it is designed to perform. No automobile manufacturer, in this day and time, should allow the public to do his testing and proving for him. The Ford Motor Company cannot afford to permit the automobile user to discover imperfections in these new models.

"We haven't discovered any faults in the finished new Ford car, but we are taking nothing for granted. If there are any faults they shall be found and remedied before any of the cars are offered for sale."

Easy LIFT

Blackhawk Jacks, Hydraulic Oil Power, take the real grief out of tire-changing.

The "TOURIST"

1½-ton model (below) for average cars. Weighs only 6 lbs. Is 9½ in. low and 14 in. high. Readily placed and removed without getting under car. Popular price, including 2-piece, 34" handle.

B7.5—HI-WAY jack (above) will handle any car, but is especially good for low-hung, balloon-tired chassis. Low enough—7⅞ in.—for any front axle. Lifts high enough—18 in.—for any rear end. Double telescope lift with hand screw extension. Two-ton rating. Very easy operation. Two-piece bayonet-lock handle, 34 in. long.

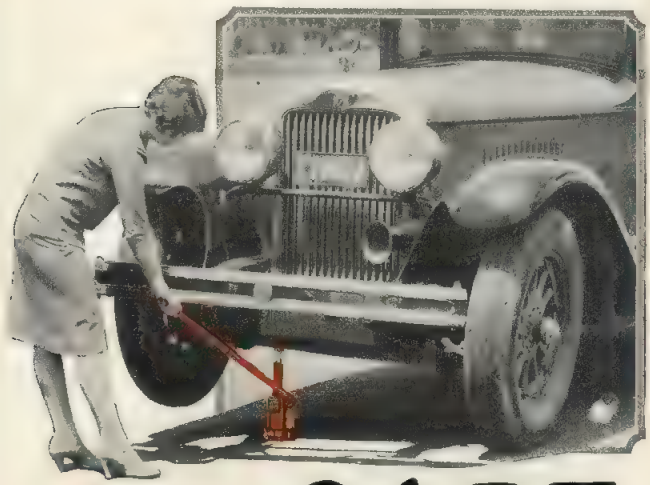
All Blackhawk Jacks are factory tested far beyond rated capacity.

WITH easy strokes of the long handle these super-power jacks lift the heaviest cars—almost no effort at all.

Lowering is automatic—just turn the release valve with the handle and down comes the car, smoothly and safely.

Blackhawk Jacking is a real joy to the motorist who has wrestled with ordinary jacks. The operation is *so easy*—and the jack is so handy to slide into and out of position under any axle.

BLACKHAWK



Easy SALE

Tourists, jack-wise motorists and women drivers are a prime market for Blackhawk Jacks. To them the easy operation and positive power of these jacks appeal strongly. Sales are easy.

Blackhawk Jacks have been proved out by five years of general use on the Coast under another name. They have been improved and standardized by Blackhawk engineering.

The line is complete—and selling in amazing volume. Get in on this business now. Your Jobber can supply you. Ask him about our Free Demonstrator Display.

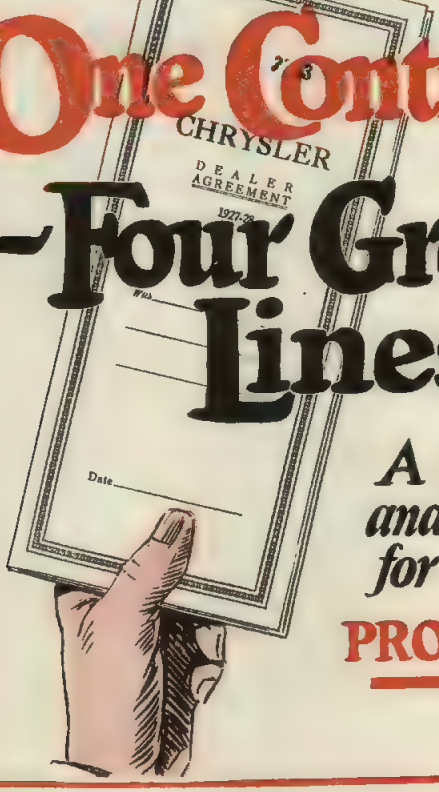
NEW CHRYSLER "52"

GREAT NEW "62"

One Contract



~Four Great Lines

A type and price for every

PROSPECT

ILLUSTRIOUS NEW "72"

IMPERIAL "80"

TODAY, with the "52," "62," "72" and Imperial "80" Chrysler is supplying the proved best in the four greatest motor car markets.

Demand for the new Chrysler models is beyond all past records. To take care of the sweeping publ c preference Chrysler needs 2,000 additional dealers, particularly in smaller centers of population.

Why not capitalize on this tremendous enthusiasm?

Chrysler offers the only franchise for a *complete line of cars of Standardized Quality* to meet the requirements of all classes of quality car buyers from $725 to $3595 — each car the outstanding value in its particular price field.

It offers this group of cars for dealers to sell under a single name and a single roof, eliminating the cost y overhead and creating fine facilities and organizations to give the public the kind of service it should get.

How many franchises would you have to hold to obtain comparable coverage with other cars? How much costlier would it be for you to do business with these various manufacturers? How much more floor space would you need to display all these lines satisfactorily to all concerned? How much more in service facilities, parts stocks, etc., etc.?

And even then you wouldn't have the popular line of cars that a Chrysler franchise offers you.

Ask any Chrysler dealer of the sales certainties—not mere possibilities—which the new 1927-28 Chrysler Franchise places before you. Learn why it is the most attractive agreement ever written. Particularly, the feature which makes it possible for a dealer in very small communities to sign up only for the "52," yet to have the other models available at call, without any definite commitment except for the "52."

Probably this is the opportunity you have long awaited to ally yourself with the most up-and-coming organization in the automobile industry. Maybe we need a dealer in your community right now. The surest way to find out is to inquire.

Investigate! Send in this coupon today.

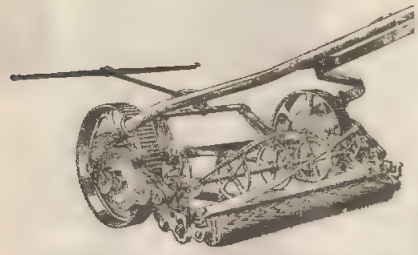
PONY LAWN MOWERS

PENNSYLVANIA



Blades—Crucible Tool Steel, Oil Hardened and Water Tempered.
Wheel Base—Extreme Width, 35 inches.
Wheels—Broad Tread. 11 inches Diameter
Parts—Malleable and Cast, Accurately Machined to Insure Noiseless Service

This Machine Bridges the Space Between Our 21-inch Hand Mowers and the Regular Horse Sizes, Combining the Strength of the Latter with the Mobility of the Former, Making it Especially Useful on Large Lawns Where the Surface is Broken by Walks and Shrubbery, or is Too Hilly for a Regular Horse Mower. Can be Handled by Two Men Where a Horse is Not Available. The Four-Blade Machine is Fitted with the Enos Yielding, Self-Sharpening Lower Knife Double Train of Gears, Extra Heavy Blades and Large Cylinder, Fitting it For Use in High Grass. **The Six-Blade Machine** has the **Upturned Lower Knife,** Making it Unrivalled for Fine Lawns and Golf Greens

Fitted with Legs to Attach the Braun Grass Catcher. Will Cut to Within ¼ inch of Ground

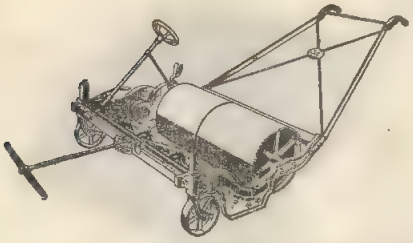
HORSE LAWN MOWERS

PENNSYLVANIA GRAND



Blades—Crucible Tool Steel, Oil Hardened and Water Tempered. Extra Wide.
Gears—Extra Large Fitted with Bronze Bushings. Easily Replaced in Case of Wear.
Extreme Width—30-inch Cut, 41 inches Over all.
Extreme Width—38-inch Cut, 49 inches Over all.
Double Rollers—15 inches in Diameter.
Parts—Malleable and Cast, Accurately Machined to Insure Noiseless Service.
Bottom Knife—Self-Sharpening. Raised Lip or Upturned Edge Style. Crucible Tool Steel.
Cylinder Adjustment—All Wear on Either Revolving or Stationary Knives is Taken Up By a Pair of Set Screws on The Top of the Cylinder Journal Boxes, Allowing the Cylinder to Drop on the Stationary Knife, Which is Rigidly Bolted and Remains Fixed in Place. The Cylinder Journals Run in Phosphor Bronze Boxes, and These Are Split So That All Wear Can be Taken Up by a Set Screw. The Journal Box is Floating or Self-Aligning.
Height of Cut—$\frac{1}{2}$ to 2$\frac{1}{2}$ inches.

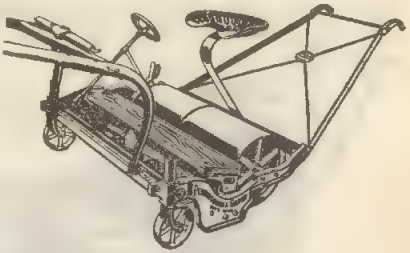
FITTED WITH HANDLES AND DRAFT IRONS ONLY

		15-Inch Rollers. 7½-Inch Cylinder. 30-Inch Cut	List Price, Each		
No. 101—4 Blades.	Weight, Boxed, 595 Pounds.	Code Word, Graduate	$200.00	----	----
No. 102—6 Blades.	Weight, Boxed, 605 Pounds.	Code Word, Graduation	225.00	----	----
		15-Inch Rollers. 7½-Inch Cylinder. 38-Inch Cut			
No. 104—4 Blades.	Weight, Boxed, 675 Pounds.	Code Word, Gymnast	$260.00	----	----
No. 105—6 Blades.	Weight, Boxed, 705 Pounds.	Code Word, Gymnasium	285.00	----	----

Note.—Use Code Word When Ordering.

Cutting Adjustment—The Wheel at the Right of the Driver's Seat Regulates the Height of Cut from $\frac{1}{2}$ to 2$\frac{1}{2}$ inches. The Operator, Without Leaving His Seat, Can Instantly Change From Low to High Cut, or an Intermediate One.

Note—The Two Pennsylvania Grand Mowers Shown Here are Alike, Excepting the Equipment. The Cut on Page 20 Illustrates the Machine Fitted with Handles and Draft Irons only. This Cut Shows the Machine with Complete Equipment.



HANDLES, SHAFTS, SEAT AND FOOTBOARD COMPLETE

Weight per Dozen, Lbs.	4½	7¾	11⅝	33⅝
Per Dozen	$2.50	3.00	5.00	7.00

No. 0, 55 Dozen; No. 1, 40 Dozen; No. 1½, 25 Dozen; No. 2, 16 Dozen in a Barrel

ONEIDA JUMP

Single Spring

Designed especially for use in small holes and where the trapper must carry a large number of traps. The springs are made of a scientifically tempered steel especially adapted to this purpose and operate entirely within the jaws. The upper and lower springs are interlocked at the ends, giving the greatest possible length of leverage. The patented hump cross is used on this trap. This brings the setting device up out of the mud and prevents freezing in severe winter weather. Chain is of stiff steel wire.

No.	0	1	1½	2
For Catching:	Rat, Gopher Weasel	Muskrat, Skunk Opossum	Mink, Raccoon Skunk, Muskrat	Fox, Raccoon, Fisher
Spread of Jaws, Inches	4	4⅝	5¾	5½

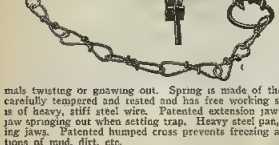
Per Dozen	$3.50	4.00	6.00	9.00

No. 0, 1 and 1½, One Dozen in a Carton; 12 Dozen in a Case, No. 2, 20 Dozen in a Barrel

VICTOR DOUBLE GRIP



Single Spring

Is an all-around game trap, but particularly adapted to catching mink, skunks and muskrats. The high-catching double-faced jaws eliminate losses through animals twisting or gnawing out. Spring is made of the finest steel, carefully tempered and tested and has free working swivel. Chain is of heavy, stiff steel wire. Patented extension jaw lug prevents jaw springing out when setting trap. Heavy steel pan, wide spreading jaws. Patented humped cross prevents freezing and accumulations of mud, dirt, etc.

No. 91 Spread of jaws, 4¾ inches, diameter of pan, 2⅛ inches, length of trap, 8 inches; length of chain, 18¼ inches. Weight per dozen, 8½ lbs. .....Per Dozen, $6.00

3⅓ Dozen in a Barrel.

All the Above, One Dozen on a Card

BOTTLE CAPPERS
DOUBLE SEAL

Ratchet

Instant adjustment; no nuts or screws to manipulate, simply raise handle to an upright position which releases the gear and allows capper frame to be set at any desired position; caps and corks a bottle with one operation. Frame is made of malleable iron with cold rolled steel brace and is securely bolted to oiled wood base or can be removed for securing to table, bench, etc. Black enameled finish. Caps any size bottle.

No. 1 Height overall, 16½ inches; size of base, 4¾x9½x⅝ inches thick. Weight, 4½ lbs.....Per Dozen, $35.00

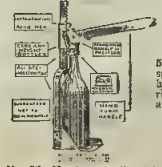
One Dozen in a Shipping Carton

INDESTRUCTO ALL-STEEL

Made entirely of steel and is practically indestructible—it cannot be broken or get out of order. Instantaneous adjustment, caps any height bottle. Patented rubber cushion in capping head takes all the strain off the bottle and prevents the cap from sticking in the head.

No. 5 Height overall, 18 inches; size of base 4¾x8 inches. Weight, 3¾ lbs Per Dozen, $18.00

One Dozen in a Shipping Carton



Same as No. 5 except has spring to hold handle in upright position at all times

No. 5S Height overall, 18 inches; size of base, 3½x6 inches. Weight, 3¾ lbs .....Per Dozen, $19.50

One Dozen in a Shipping Carton

BOTTLE CAPPERS
CAPERITE

Malleable iron, gray enameled. Is extremely strong and will last a lifetime. Is provided with a positive automatic adjustment for various height bottles up to a full quart. This adjustment is acquired without fuss, slipping thread stripping lock screws, etc. Simply raise the adjusting base to any desired height and there the base automatically remains. The handle is held at its highest position by means of a ball bearing adjustment, giving the operator the use of both hands for placing the cap and bottle in the proper position. Then by lowering the handle with the proper pressure the job is perfectly done.

No. 4 Height overall, 16½ inches; diameter of base, 4 inches. Weight, 7½ lbs .....Each, $3.75

Twelve in a Box

C-B-CO

Made of cold rolled steel, nickel plated. Caps any size bottle. Automatic release. Plunger releases bottle after capping. On standard bottles perfects double seal. Cap holder prevents cap from slipping and falling out of place. Reinforcing flange of capping head prevents spreading and insures air-tight seal. Automatic grippers hold bottle and serve as foundation for crimping the cap. Fulcrum principle and cam action insure maximum leverage with minimum effort.

No. 11 Height closed, 7½ inches; spread of handles, 18 inches. Weight, 22 ounces.....Each, $3.75

One in a Package

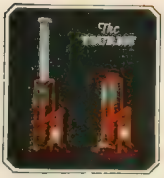
Fingers Here

At the slightest touch on the long handle, up goes the load! Giant power unbelievable, with action silky smooth. Lifting, holding and lowering—positive and firm.



"TOURIST" — 1½-ton model for average cars 8½ inches low, 14 inches high. Popular price including 2-piece, 34-inch handle

TWIN-CHEK Valve Unit automatically controls the hydraulic oil-power. Located below the pump (outside the jack) easily accessible. Patented.

BLACK-HAWK JACKS, Hydraulic Oil-Power, revolutionize jack efficiency—revolutionize sales potentials throughout the entire jack field.

With a new standard of positive power they raise the heaviest, most awkward car so easily that it is child's play to jack up any wheel or axle, front or rear.

The long bayonet-lock handle holds and slides the jack into position. Easy short *or* long strokes raise the load. The same handle opens the release valve for smooth, quick lowering, controls the movement, and pulls out the jack.

BLACKHAWK

Lift Tons Here!

Dependability is assured by five years of severest service test. In the famous Pickwick Bus Fleet of California, 800 Blackhawk Jacks have been standard equipment for the past three years.

Tourists, jack-wise motorists, women drivers, bus and truck operators offer you a tremendous market.

In addition,
Blackhawk Jacks
give you a complete line for every automotive and industrial need, from this one source.

Get in line now to push Blackhawk Jacks for mounting sales and volume.

Ask Your Jobber's Salesman. Send for Complete Details

BLACKHAWK MFG. COMPANY

Ask how to get our Demonstrator Display FREE. Shows actual Jack in use

B7.5 — The HI-WAY — balloon tire jack is low enough to go under any car with balloon tires deflated. Collapsed—jack is only 7⅜" high; total height extended is 18 inches. Handle is 34" long, allowing easy placement of jack without getting under car. Slight pressure on handle raises 4000 lbs.

MECHANICAL TOY TRAINS

THE AMERICAN FLYER

Any child can wind them and with reasonable care they will last a long time. The American Flyer Trains are well and substantially made and not like the cheap foreign made trains. Fully guaranteed by the manufacturers.

Consists of an iron speed governed locomotive with tender, one passenger car and eight pieces of curved track. Locomotive is enameled in black and thoroughly baked, trimmed with silver bands and with green, red and gold decoration. The gear casing of the locomotive is locked in the engine casting by a steel spring. Track, length over all 27 inches; engine and tender, length over all 10½ inches; length of coach 5½ inches; length of each track unit 10½ inches.

Per Doz Sets

No. 0—Wt each 3 lbs $48 00

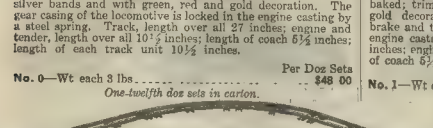
One-twelfth doz sets in carton.

Consists of an iron speed governed locomotive with tender, one passenger car and ten pieces of track (two straight and eight curved). Locomotive enameled in black and thoroughly baked; trimmed with silver bands and with red, green and gold decorations. It is equipped with piston rods and brake and the gear casing of the locomotive is locked in the engine casting by a steel spring. Track, length over all 37 inches; engine and tender, length over all, 10½ inches, length of coach 5½ inches; length of each track unit 10½ inches.

Per Doz Sets

No. 1—Wt each 3¼ lbs $58 50

One-twelfth doz sets in carton.

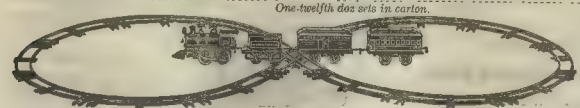


Consists of an iron speed governed locomotive with tender, one baggage and one passenger car; eleven pieces of track (three straight and eight curved). Locomotive enameled in black and thoroughly baked; trimmed with silver bands and with red, green and gold decorations. It is equipped with piston rods, brake and the gear casing of the locomotive is locked in the engine casting by a steel spring. Track length over all 39 inches; engine and tender, length over all 10½ inches; baggage car and passenger car, length each 5½ inches; length of each track unit 10½ inches.

Per Doz Sets

No. 2—Wt each 4 lbs $66 00

One-twelfth doz sets in carton.



Consists of an iron governed locomotive with tender, one baggage and one passenger car, fourteen pieces of curved track and one cross-over. The locomotive is enameled in black and thoroughly baked; trimmed with silver bands and with green, red and gold decorations. It is equipped with piston rods brakes and the gear casing of the locomotive is locked in the engine casting by a steel spring. Track, length over all 167 inches; length of each track unit 10½ inches.

BRUNNER GARAGE AIR COMPRESSORS

Since the garage business became a business, Brunner Compressers have been built in sizes and types to meet each new demand, and the present offering is complete.

Bore 3 in. Stroke 4 in. Guaranteed pressure, 75 lbs Recommended speed, 300 to 350 R P M Outlet, tapped for ¾ in. pipe Intake valve tapped for ½ in. pipe. Capacity, 5 to 7.5 cu. ft. per minute.

SINGLE CYLINDER VERTICAL

To name the uses and virtues of this popular type would be to recite the endless uses of air in garages and machine shops.

The Model 11 has ground finishes, low head clearance, removable brass valves, hammered rings and other **Brunner** features.

This Model supplies ample air for tire inflation in large garages, for paint spraying, for driving small pneumatic tools, and for a variety of industrial purposes. Vibration is reduced by using a heavy-rimmed flywheel driving pulley. Dimensions: height 22 in., floor space 14 in. by 18 in. Lubrication, splash. Power required, 2 H P. Finish, gloss black enamel.

No. F11—Net w't, 120 lbs.; shipping w't, 160 lbs. Outlet for ¾ in. iron pipe.

With 14 in. Flywheel Pulley	$60.00
With 14 in. Tight and Loose Pulleys★	65.00

BELT DRIVEN GARAGE OUTFIT

For Garages and Service Stations Housing 50 to 75 Cars.

One No. F11 Belt Driven Compressor, 14 in. Tight and Loose Pulleys★	$ 65.00
One No. F45 Gallon, 18 in. × 43 in. Seamless Air Tank★	55.00
One Model FB Air Gauge★	2.50
One No. F70 Check Valve, ¾ in.★	4.50
One No. F73 Safety Valve★	2.50
One No. F83 ¾ in. Needle Valve★	2.25
One No. F84 ¾ in. Needle Valve★	3.25
One No. F82 ¾ in. Needle Valve with Swivel Hose Connection	2.25
Two Ground Brass Unions, ¾ in. and ¾ in.	1.85
One 25-foot Drop Line ¾ in. "Resistoil" Air Hose, complete	9.00
No. F110—Per outfit★	$148.10

TWO CYLINDER VERTICAL DIVIDED LOAD

When driven from either a line shaft or mounted on an assembled unit has been always the standard compressor of the garage field. Its capacity and unfailing performance make it the perfect equipment for the average automotive establishment. Its air delivery is rapid, its power requirement low, its oil consumption small, and its enduring efficiency a source of year after year Air Profit.

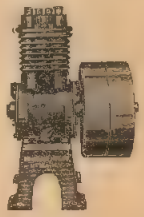
This Model is the best that can be had in its size, combining every resource of Brunner production equipment and care.

Lubrication, splash system Pulleys, 9 in. or 14 in. Dimensions: height 13 in., floor space 6½ by 10 in. Power required at 100 lbs. pressure, ¾ H.P. Finish, gloss black enamel.

No. F102—Net w't, 50 lbs.; shipping w't, 70 lbs.

Without Pulleys★	$58.00
With 9 in. Tight and Loose Pulleys (furnished unless otherwise specified)★	62.00
With 14 in. Tight Pulley★	63.00
With 14 in. Tight and Loose Pulleys★	67.00
For vacuum service, common intake fitting, extra★	3.50

If sub-base as shown in illustration is not desired, deduct $4.50 from list price.



Bore, 1¾ in. Stroke, 2¼ in. Guaranteed pressure, 175 lbs. per sq in Recommended speed, 300 to 400 R.P.M Capacity, 2¾ to 3 cu. ft. Outlet, tapper for ¼ in. pipe.

BRUNNER MOTOR DRIVEN COMPRESSORS

PORTABLE TIRE INFLATOR

Fleet owners can ill afford to waste driver and car time at public air lines, so they are buying this model for private use. Any fleet of three or more cars can save the cost of this equipment in a year's time. Merchants, bus operators, fire stations, and all "company garages" will eventually have this inflator.

Tires of any size can be hardened to highest pressure in a few seconds. Even a truck tire can be inflated from flat to 120 lbs. in a scant few moments. Electric cord and hose line total 40 feet, giving this machine a wide working radius. 15½ in. high, 15 in. wide and 20½ ling. Shipping w't 145 lbs.

Also furnished as a stationary outfit, but not intended for use in connection with a storage tank.

No. F66—Portable Type—

110-220-Volts, 60-Cycle, A. C. Motor★	$155.00
110-220-Volts, 25-Cycle, A. C. Motor★	170.00

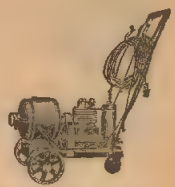
110 or 220-Volts, D. C. Motor★	156.00
32-Volts, D. C. Motor★	156.00

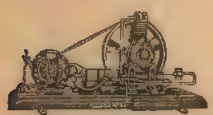
A. C. Motors Other Than 60 Cycle at Additional Charge.



A Compressor geared to ¼ H.P. motor with vapor trap and all equipment, on three wheeled truck. Capacity 1.9 cu. ft.

AUTOMATIC BELTED POWER PLANT

An air plant that can mounted on floor or shelf and piped to a tank on the ceiling or other convenient location. It is silent, reliable, and utterly devoid of troublsome accessories. With a tank up to 50-gallon size, will make a fine air system in the average shop or salesroom.



The No. 102 Compressor with belt drive from ½ H.P. motor to displace 2.5 cu. ft. free air per minute. Including belt tightener, piping, unloader controller, check valve and gauge. The outfit is mounted on pressed steel base with extension feet.

No. F92—22 in. high and cover floor space 45½ in. × 16 in., outlet for ¼ in. iron pipe, shipping w't 340 lbs.

With 1-Phase A. C. 110-220 Volt, 60-Cycle Motor★	$240.00
With 1-Phase A. C. 110-220 Volt, 25-Cycle Motor★	260.00
With 1-Phase A. C. 110-220 Volt, 40-Cycle Motor★	260.00
With 110-Volt Direct Current Motor★	255.00
With 220-Volt Direct Current Motor★	255.00
With 32-Volt Direct Current Motor★	255.00

Motors not listed are specially quoted on application.

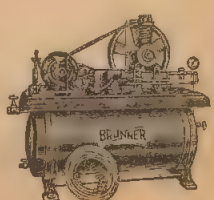
ASSEMBLED AUTOMATIC UNIT

The most popular type of Compressor unit is found in this Model. Used by accessory and tire stores, oil stations, car agencies and repair shops; everywhere, in fact, except where special pneumatic tools or appliances require greater volume of air.

No. F932—Model fully equipped, stands 40 in. high and measures 18 in. × 45½ in. on the floor; shipping w't 535 lbs., tank outlet tapped for ¼ in. pipe line.

With 1-Phase A. C. 110-220 Volt 60-Cycle Motor★	$285.00
With 1-Phase A. C. 110-220 Volt 25-Cycle Motor★	305.00
With 1-Phase A. C. 110-220 Volt 40-Cycle Motor★	305.00
With 110-Volt Direct Current Motor★	305.00
With 220-Volt Direct Current Motor★	305.00
With 32-Volt Direct Current Motor★	305.00

Motors not listed are specially quoted on application.



Specifications:
Two cylinder. Bore 1½ in. Stroke 2½ in.
Motor, ½ H.P.
Capacity, 2½ cu. ft. per minute
Pressure 125 lbs
Tank 32 gal. seamless drawn steel.
Pressed steel base.
Adjustable belt tightener
Automatic unloader controller
Patented check valve.
25 ft. "Resistoil" Air Hose with tire connection
Built-in head safety valves

CHAMPION SPARK PLUGS

Dependable for Every Engine

Champion spark plugs are made by excellent workmanship, are rugged in appearance, with finely finished knurled body. The double-ribbed semi petticoat Silimanite Core is unbreakable in use, will stand higher heat and more oil and carbon deposits and more abuse than any other known insulator. The Champion Two Piece construction insures absolute compression tight plugs and makes it possible to take apart the plug for cleaning or replacing of core at small expense. The electrode wires are of special analysis wire, will not burn, oxidize or corrode. The best and highest priced cars, including foreign made cars, are fitted with Champion spark plugs.

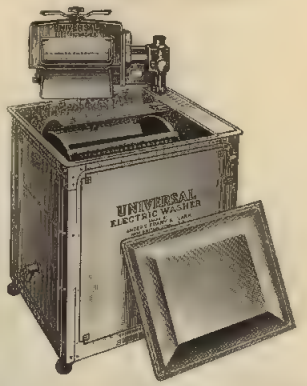
WASHING MACHINES.

COFFIELD WATER POWER.

The Coffield is without doubt the finest Water Power Machine ever constructed. The manufacturers are continually making improvements in their washers, and in the Coffield they have evolved a machine without a peer. It will run satisfactorily on a lower power than any other machine that we have ever seen. The Coffield can be used for years, every day in the week—every week in the year, without attention of any kind. The tub is made of Louisiana Cypress and is neatly finished. Made of the best of material, in the best way, has more power, more speed, will pull a heavier load, and run on lower water pressure than any other.

Coffield. Shipping wt. each, 80 lbs.....Each $33 00

UNIVERSAL ELECTRIC.



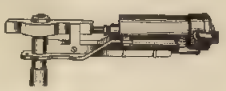
Heavy steel frame; sheet steel case enameled blue gray; galvanized tub with perforated zinc inner cylinder which revolves twice one way and then reverses revolving twice in the opposite direction, making 18 revolutions per minute. This machine combines the advantages of both oscillating and revolving types of washers. The machine is entirely gear driven so the trouble encountered in belt driven machines is avoided. The gears are packed in light motor grease, operate silently and do not need further lubrication for several years in ordinary family use.

No. E1930. Shipping wt., 235 lbs.....Each $150 00

No. E1940. Same as No. E1930 except tub and cylinder are copper .....Each $165 00

WASHING MACHINE MOTORS.

COFFIELD WATER POWER.



Solid cast brass with large, strong valves; water passages made extra large; this lets the water in and out of the motor freely without friction or back pressure, and is what makes the Coffield so powerful and so fast running. There are no metallic gaskets used in the motor so leaks can not develop no matter how hard or how long the motor may be used. There is one spring to assist the valves in reversing the motor. This spring is made of very heavy brass spring wire and is so large and strong that there is no danger of breakage but should one break it could easily be replaced.

Coffield. Wt. each, 26 lbs.....Each $22 00

WASHING MACHINES.

GEYSER.

This is a vacuum washer as the agitator, which is funnel shaped, works up and down forcing the water through the clothes, without wearing and tearing them as an ordinary washing machine does. The tub is made of genuine "Armco" ingot iron, 26 gauge, heavily galvanized; wooden parts have three coats of special washing machine varnish; metal parts of the gearing subject to heavy strain, made of steel or malleable iron; gear teeth, machine-cut in the noiseless spiral pattern; capacity, eight shirts or other garments of equal bulk. The drive shaft is connected to the dasher shaft by a ball and socket joint which overcomes friction, prevents wear and makes the machine very light running.

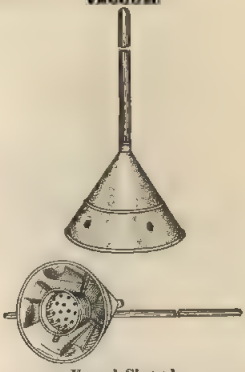
Geyser. Shipping wt., 86 lbs. Ea. **$30 00**

DEXTER.

A hand machine that can be attached by a belt to gasoline engine or electric motor if power is desired; can be operated by hand either standing or sitting; when sitting down the foot pedal can also be used for auxiliary power; the fly wheel is at the bottom on the side of the machine, and the detachable pulley for belt connection is attached to the fly wheel; has a revolving dasher or dolly which makes more than a half turn at each revolution of the fly wheel. The double lever makes this machine run with half the effort required to operate the ordinary hand machine.

Dexter. Wt. each, 94 lbs. . . Each **$30 00**

VACUUM.



Funnel Shaped.

So constructed that the down stroke forces water through the clothes while the up stroke sucks it through, taking all the dirt out. Made of extra heavy tin; very durable; one will outlast several of the ordinary kind, though costing no more than the light ones. Diameter at large end, 8¾ inches; height 7½ inches.

Vacuum. Wt. doz. 16 lbs. Doz. **$15 00**

Junior Vacuum. Wt. doz., 12 lbs. . . . . Dozen **$12 00**

SYPH-O DRAINERS.

A device for filling by pressure, and emptying by syphon, washing machine tube; complete with 5 feet heavy tubing, with 18-inch length of tubing for between faucets; with threaded couplings and a smooth faucet adapter.

No. 400. Wt. doz., 11 lbs. . Dozen **$30 00**

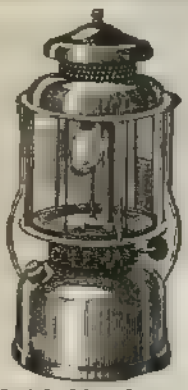
Coleman Quick-Lite

QUICK-LITE LANTERN



This Quick-Lite Lantern is a most popular seller. A dependable outdoor light that can be used in hundreds of places where the ordinary lantern is useless. Gives more light than 20 old style oil lanterns. Keeps right on shining anywhere any night in any kind of weather. Mica Chimney makes it windproof, storm proof, bug proof. Easy to keep ready for use,—no wicks to trim, no chimneys to clean. Fount holds two pints of gasoline which gives from 12 to 15 hours of brilliant lighting service. Each lantern in carton, **complete with** mantles, pump, wrench, cleaning pick and extra generator.

No. 23R11. (Mfg. No. L327).
Each 5.14

BUILT-IN-PUMP LANTERN

The New Built-In-Pump Lantern has hand-operated filler plug. A dependable outdoor light which can be used in many places. Especially adapted for campers and tourists. Gives more light than 20 old style oil lanterns. Has Mica chimney which makes it wind proof, storm proof, bug proof. Each lantern complete with chimney, 2 mantels, wrench, cleaning pick and extra generator.

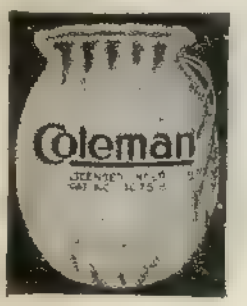
No. 23R12. (Mfg. No. L427.)
Each 5.88

STANDARD MODEL QUICK-LITE LAMP

This is the Standard Model Quick-Lite Lamp, a handsome practical lamp for general home use. Lights with matches. Makes its own gas from common motor gasoline. Gives beautiful light. Fount holds three pints of fuel, enough for 15 to 18 hours of brilliant service. It is a safe lamp, can't spill even if tipped over, can't be filled while lighted. Equipped with opal paneled shade of exclusive coleman design. Each lamp in carton complete with shade, 2 mantels, pump, wrench, hanger, cleaning pick and extra generator.

No. 23R13. (Mfg. No. C329.)
Each 6.12

COLEMAN JUNIOR MANTLES



Coleman Junior Mantles should always be used on Quick-Lite lamps and lanterns for best results. Made just right in size, shape and texture and chemically treated to give proper incandescency. Seam at bottom where pressure is strongest. No side seams to split under pressure and of uniform quality. One dozen mantles in box, 12 boxes in handsome counter carton.

No. 22R16.
Per gross.. 7.35 Per dozen.. .73

COLEMAN RADIANT HEATER

The Coleman Radiant Heater is portable and not restricted in use to length of hose or pipe. It makes its own gas from a good grade of motor gasoline. Adapted to homes beyond gas mains, cabins, tents, offices, etc. Radiates a penetrating, fan like zone of air warming lower part of room first insuring good circulation. Removable tank of heavy gauge steel, electrically welded and equipped with hand operated filler plug and pressure gauge. Has handy Jumbo Pump furnished with each heater. Generates with Alcohol torch. Packed in carton. Shipping weight 40 pounds.

No. 23R20. (Mfg. No. 2). Each..... 20.88

GENERATOR

The Quick Lite Generator will burn 500 to 800 hours without renewing. When finally filled with carbon replace with extra generator furnished with each lamp. The hole in gas tip (Q18) is easily cleaned with tip cleaner as illustrated. If tip becomes clogged, clean or replace with new tip furnished free with every lamp.

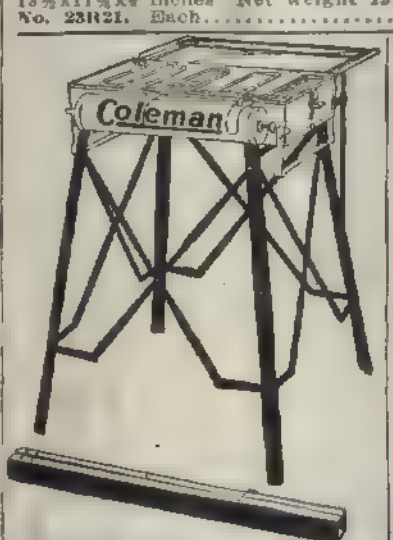
No. 23R17. (Mfg. Q99.)
Per dozen..... 2.75

The Coleman Camp Stove

Coleman Camp Stove No. 9

The Coleman stove model No. 9 has a tall wind baffle to protect the two wide action burners. Is equipped with detachable fuel tank. Featured with a built in pump, pattern filling funnel and a hard operated filler plug. Hot blast starter gives full cooking heat in two minutes. Folds to suitcase size 18½x11¼x4 inches. Net weight 13½ pounds.

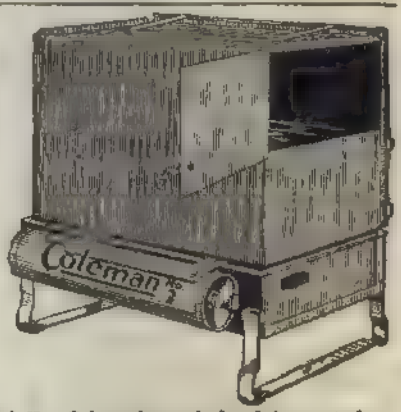
No. 23R21. Each..... 6.12



Coleman No. 10 universal high stand as illustrated above is of single unit all steel construction. When set up all folding joints lock automatically and makes positively rigid high stand. Fits any make of camp stove and has lid support. Folds to size 2½x2x26 inches. Net weight 7¾ pounds.

No. 23R24. Each..... 1.57

Coleman Camp Stove No. 2



The Coleman camp stove model No. 2 is acknowledged by out door experts to be the finest camp stove made. The built-in oven can also be used as a drum heater, a warming cabinet, a wind baffle or a handy shelf, as it nests right in the lid. Equipped with detachable fuel tank with built-in pump and filling funnel. Hot blast starter works like a blow torch, gives full cooking heat in less than 2 minutes. Folds to suitcase size 18¼x11¼x4 inches. Net weight 18½ pounds.

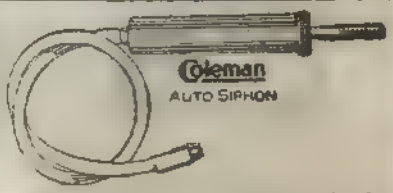
No. 23R22. Each..... 8.33

Low Priced "Auto Cook Kit"

A moderateness of price distinguishes this two-burner stove as an exception to the rule, for it embodies practically all the desirable features that would ordinarily be wanted in an efficient two-burner stove for camping and picnics.

It is built of 24-gauge sheet steel, with dark brown enamel baked on, has folding windshields and legs, strong hinged grate and one-piece drawn brass tank. When not in use the tank packs inside. Closed it measures 17x8½ inches, and weighs approximately 12 pounds. A convenient rubber and brass pump are included in the equipment. Each in carton.

No. 23R1. Each..... 3.50



The Coleman Auto Siphon is designed especially for the use of auto tourists and campers and is a needed convenience where any gasoline camping equipment is in use. If the Coleman Camp stove fuel tank goes dry or your Quick-Lite Lantern needs refilling, just siphon the necessary gasoline from your automobile tank and go on. The siphon has a ¼ inch nickel plated brass barrel, 4 inches long and 34 inches of high grade ⅜ inch rubber hose. Each packed in a carton.

No. 23R23. Each..... .44

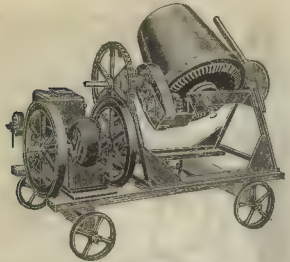
A house with over seventy-two years' experience stands back of our brands.

CONCRETE MIXERS

LANSING, BRONCHO JR.



A popular mixer that can be easily moved from one job to another. Suitable for mixing common concrete, cinder concrete, top dressing, cement or lime mortar.

The three mixing wings are raised from the surface of the drum, doing away with the sharp angles that would catch concrete. A pail of water at the end of the day cleans the mixer.

A 1½ H. P. engine, magneto and draw pole or tongue is included with each mixer.

For Data see opposite column.

Each

No. 3BJM—Wt each about 1170 lbs..... ✤$510 00

LANSING, BRONCHO SPECIAL

The Broncho Special is a popular mixer which can easily be moved about from one job to another. It is a general utility machine and suitable for mixing common concrete, cinder concrete, top dressing or cement or lime mortar. The cost of operation is very small.

The engine and all sprockets and chain are completely housed in steel. With every mixer is included a 2 H. P. engine, steel housing and draw pole.

For Data see opposite column.

Each

No. 4B—Wt each about 1650 lbs..... ✤$714 00

✤F. O. B. Michigan Factory Only.

CONCRETE MIXERS

LANSING, WITH STANDARD WHEELBARROW HOPPER

The compact, sturdy, substantial construction of this mixer insures against its being racked to pieces in long hauls over country roads or city pavements.

All bearings supplied with compression grease cups. Guards over exposed working parts. Trucks finished in black paint, balance of mixer two coats gray. A complete set of necessary tools furnished with each mixer.

For Data see below.

Each

No. 5WSWH—Wt each about 1800 lbs..... ✤$1011 00

CONCRETE MIXERS

ONE-MAN

Perfectly balanced and geared. Designed to offer contractors a mixer for use on small jobs saving the expense of operating a large motor driven mixer. Can be loaded from either front or rear. 16 gauge steel drum, painted grey, substantial cast iron base. Rigid steel frame, painted red. Constructed so that every part screws up to a shoulder thus giving strength and taking up lost motion. Two steel blades fastened on inside of drum facilitate mixing.

Can be used for mixing poultry and stock feed, fertilizer, etc., also for treating seed wheat, oats, barley, for smut, blight and other diseases and inoculating seeds like alfalfa, soy beans, clover, etc.

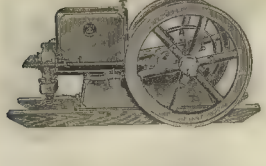
KEROSENE ENGINES

FULLER & JOHNSON

Model "KA"—Throttling Governor.



3, 5, 7, 9 and 12 Horse Power.

Well adapted for electric lighting plants, for use on the farm, in shops, elevators, mills, creameries, etc., or on concrete mixers, balers, etc. Has new and improved throttling governor; extra heavy fly-wheels which further insure constant, steady power, so essential for operating the electric dynamos, cream separators, etc.

Painted and striped in gold and are mounted on substantial hardwood skids. They may easily be skidded from place to place, or installed as stationary engines. If it is desired to mount the engine on a hay baler, well drill, concrete mixer, or other machine, simply remove the skids as the engine is self-contained, that is, the engine is hopper cooled with no pipes or screens, and the fuel tank is mounted in the full base and connected to the mixer above the base line.

3, 5 and 7 H. P. engines equipped with built in low tension gear driven magneto. 9 and 12 H. P. equipped with starting battery in addition to magneto. Will run on kerosene, benzine, naptha, distillate, motor spirits or gasoline.

Furnished with a heavy galvanized fuel tank; a machine turned pulley, which fits on either side of the engine; a good muffler; a sight feed lubricator; large grease cups for the bearings; a full set of dry batteries, and a water-proof spark coil, all wired up and packed in a good battery box, painted; all necessary wrenches; oil can; priming cup; starting crank (except on 12 H. P.); a can of oil; a can of grease; and a complete book of instructions.

Pulleys other then those specified below can be furnished, charge being made according to the size of the pulley.

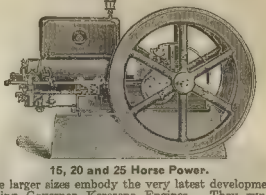
KEROSENE ENGINES

FULLER & JOHNSON

Model "K"—Throttling Governor.



15, 20 and 25 Horse Power.

These larger sizes embody the very latest developments in Throttling Governor Kerosene Engines. They run very smoothly and quietly and at a uniform, steady speed, with a big surplus of power. They operate perfectly on kerosene. Especially suited for installation in creameries, feed mills, grain elevators, electric light plants, etc.

Regularly equipped with fuel pump so that the large fuel tank may be placed outside the building.

Each engine is furnished with plain pulley; exhaust pot (or muffler when ordered); starting battery; coil, switch; built in, low tension magneto; water gauge; wrenches; cylinder oiler; grease cups; priming cup; supply of cylinder oil and cup grease; oil can; 53 gallon outside connected tank with sufficient pipe to connect tank 30 feet from engine.

Pulleys other than those specified below can be furnished, charge being made according to the size of the pulley.

KEROSENE ENGINES

MONARCH LINE

Scientifically designed for a general utility power unit. Heavy enough to withstand any strain, light enough to be easily handled. Throttling governor regulates fuel supply and keeps the engine running at a uniform speed. They are primarily a Kerosene burning engine, but will operate on gasoline with equal satisfaction, developing the same horse power and utilizing a like amount of fuel.

All parts easily accessible for inspection and repair. Every part uniform and interchangeable.

HAND POWER ELEVATORS

(For general description see preceding page).

HOW TO ORDER

Lifting capacity wanted.....
Size of hatchway (we build platform to fit).....

Elevators larger than standard size, see price for additionals.

Style of platform (see diagrams below).....
How many stories high is building (see diagrams below).....
Does car run in enclosed or open hatchway.....
Kind of business to be used for.....

Give the height of each story from top of floor to top of next floor above.

Sub-basement to Basement.....
Second floor..... to Third floor.....
to First floor.....
Fourth floor..... (To underside of roof timber.)

These diagrams indicate the different locations of guide posts in hatchway. State which would be best suited to your building.

Please make answers as complete as possible, and we will then be able to submit estimates for the elevator work best adapted to your requirements. When convenient make sketch of ground plan of building, showing position of hatchways, etc.

DUMB WAITERS

NEW YORK SAFETY

The accompanying cut illustrates method of attaching fixtures so that the weight may be at the back. The method of attaching brake grip on the under side of the shelf to which the fixtures are attached is also shown.

Place the brake grip in such a position that the hand rope which elevates the car will run through it. To apply the grip, pull the small cord which hangs down the well. To release it, pull down on the hand rope which will cause grip to drop off. To have a smooth, easy working dumb-waiter, overcome friction in every place possible.

Fixtures Only.

One size only. Suitable for all well holes under 24 inches square, not larger. The wheels should be placed on top of car so that weight of car shall be lifted from the center in all cases. They can be placed diagonally if necessary to accomplish this. Counter weight should weigh about the same as the combined weight of car and the two wheels on top, not less. Always use flat counter weights, which can be run in guides or box as desired. For stringing use pliable cotton rope, for operating ½ inch; for safety, ¾ inch; and for brake, ¼ inch. Samples of rope sent with each set.

Per Set

No. 25—Fixtures only, without weights..... ✣$99 00

Packed one set in wood box; wt per set 65 lbs.

Dumb Waiters, Complete Car and Fixtures.

Per Set

No. 26—New York Safety dumb waiters complete with No. 1 car described on following page, counter weight, guide runs, weight runs, and all rope for first 10 ft of travel..... ✣$315 00

HAND POWER ELEVATORS

Reliable and Easy Working.

Platform No. 2 and 3 are suspended by two standard wire cables, thereby equally distributing the load on the platform on the two wire cables. This is a great saving to the cables and other parts and gives greater safety and longer wear. The same plan is followed in wheels overhead, which are placed on ends of main shaft close to bearings. The cables are led direct from the platform over the cable sheaves at the top of the hatchway and down again to the counter balance weights without the use of idlers or drums; thus reducing the friction to a minimum. In the event of one of the cables breaking, the second cable is amply strong to hold the load on the platform. Is furnished with a screw brake so arranged as to stop platform at any point of travel, and will firmly hold the load and also permit the operator to control the speed of platform while descending.

Whenever the top floor of a building is less than 11 feet 6 inches, use the Combination Sheave Elevator, as by comparing the cuts, you will note on Sheave Elevator that pulling wheel or sheave is at the front of hatch, and is approximately 5 feet in diameter. Therefore a regular sheave elevator cannot be used where the ceilings are low on account of insufficient clearance way for persons to pass underneath.

We are therefore recommending the Combination Sheave Machine to be used with pulling sheave at side as an elevator should have no less than 6 feet from top of floor to underside of pulling sheave.

The Combination Sheave Elevator is also used to good advantage when the size of the platform is over 5 feet 6 inches in width.

We give full directions and erecting plan with each machine to parties outside of the city, so there will be no difficulty in putting up the elevator. Any average mechanic can put up same by following our directions. (See following page.)

RADIO ACCESSORIES AND PARTS

—OLD KENTUCKY HOME—CONSOLE TYPE LOUD SPEAKERS

Five-ply veneered American black walnut case, turned columns and shaped stretchers, black walnut lacquer rubbed finish. Constructed with the famous acoustical fibre horn with bell opening 23½x18½ inches. Special design air column 85 inches in length reproducing music and particularly the low tones with mellowness, the unit design and horn wall construction losing none of the frequencies for definitions and distinctiveness. This type speaker incorporates the ultimate that has been obtained in the long horn performance coupled and matched with proper unit design.

Equipped with the original Baldwin concert unit scientifically balanced so as to obtain uniformity of response throughout the frequency range. The performance is comparable to that obtained in recently developed high grade musical reproducers, particularly noticeable in the care of rich, deep tones.

TONGUING AND GROOVING.

Nickel Plated.

This plane is provided with two separate cutters, as shown above, to be used for making a tongue. By releasing the pin at the front of plane, the fence may be swung on a central pivot and reversed, thus covering one cutter. The plane may then be used to form a groove to match the tongue.

Net each

PAGOMA

"PAGOMA" Planes Have the Same High Standard of Quality as the Balance of Our "Pagoma" Line.

Every Care Is Taken to Preserve This Standard and we Guarantee Each Item Bearing This Brand to be Satisfactory and Free From Defects in Material and Workmanship.

FULLY WARRANTED.

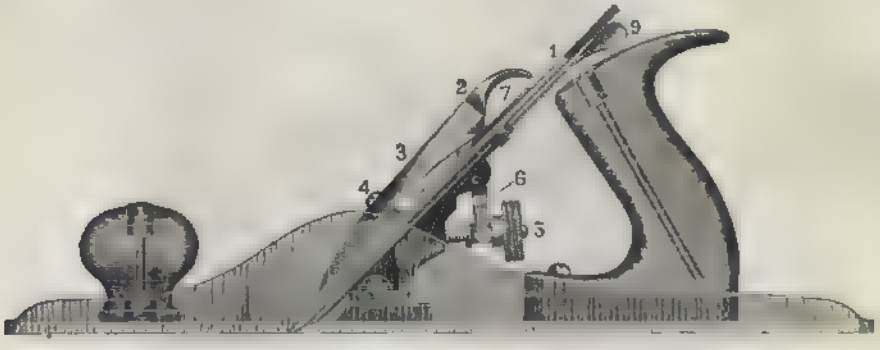

Illustration is sectional view of our No. 5 Iron Jack Plane.

DIRECTIONS FOR

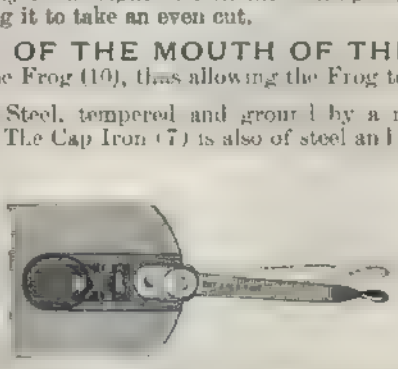
"PAGOMA" ADJUSTABLE IRON PLANES.

TO REMOVE THE CAP AND CUTTER. raise the Thumb Piece (2) which acts as a cam, thus releasing the pressure of the lever (3) upon the Plane Iron (1). To remove this Lever (3) it is not necessary to loosen the Screw (4), as the Lever is provided with a slot, which allows of its being easily removed. This Screw (4) regulates the pressure of the Lever upon the Plane Iron, and when properly adjusted, should not be changed.

TO REGULATE THE DEPTH OF CUT TO BE TAKEN. revolve the adjusting Screw (5), which operates upon the Fork Lever (6) to the right or left, thus lowering or raising the Plane Iron. After the Plane Iron is set to cut a shaving of the thickness required, if it is not exactly true with the bottom of the Plane, it can be adjusted by means of the Lateral Adjustment Lever (9). By moving this laterally to the right or left, the cutting edge of the Plane Iron may be adjusted to bring it parallel with the bottom of the Plane, causing it to take an even cut.

TO REGULATE THE WIDTH OF THE MOUTH OF THE PLANE, loosen the Screws (8) of which there are two in the Plane, placed in slots in the Frog (10), thus allowing the Frog to be moved forward or backward.

The Plane Iron (1) is made of Guaranteed Steel, tempered and ground by a modern process, which gives a keen cutting edge that will wear well under all conditions. The Cap Iron (7) is also of steel and is fastened to the Plane Iron by a small screw which operates in a slot in the Plane Iron.



The above cut shows the Adjusting Lever used in "PAGOMA" Planes, and the method by which the Iron can be easily adjusted sidewise, giving an easy lateral adjustment.

The above cut represents the "PAGOMA" Improved Plane Iron and Cap used in "Pagoma" Planes.

These cutters are made from a superior grade of steel. They are EXTRA HEAVY, being nearly twice the thickness of the ordinary cutter. Because of this, the cutting edge is firm and solid, and WILL NOT CHATTER in the HARDEST WOODS. This point in "PAGOMA" CUTTERS is greatly appreciated by all who use them, as it is a distinct advantage over any other Plane made.

"PAGOMA" meets the demand of the mechanic for PERFECTION in Tools

LAWN MOWERS

PENNSYLVANIA SUPER-GREAT AMERICAN

The Super-Great American has Roller Bearings in the Drive Wheels. The hub on wheel is shortened so that it is flush with outside of wheel. The revolving reel is ball bearing, fitted with dust-proof cones. The lower cutter bar has raised edge for self sharpening. It is adjusted by two set screws on each side, one above and one underneath the cutter bar. 10 inch Roller Bearing Drive Wheels, with 6 spokes, cylinder has fine crucible tool steel blades, oil hardened and water tempered.

Hardwood Staytite handle. Hardwood roller. Hooks for attaching grass catcher. Beautifully finished in Gold Bronze, nicely striped.

LOUD SPEAKERS

CROSLEY

Musicone

Reproduces full, rich, mellow tones. Its extraordinary reproduction of the human voice and all musical instruments without distortion of pitch or tinny overtones, constitutes one of the outstanding achievements in all radio history. This is based not on the Cone, but on the patented actuating unit which Crosley engineers have developed and which is exclusive in the Musicone.

No. 3121 Musicone Height, 13⅛ inches; Diameter of Cone, 12 inches; Weight, 5 Lbs. in carton. . . . . Each, **$12.50**

One in a Shipping Carton

Super Musicone

Has been developed to meet the demand for a larger cone-type speaker. The operating unit is the same as used in the Musicone. The cone is beautifully decorated on both front and back. Every note is received with perfect clearness, there being no metallic sounds or distortion to mar the otherwise perfect radio reception. The floating cone of the Musicone is merely incidental to its performance. The real secret of its success lies in the actuating movement, which incorporates a number of unique, individual and patented features found in no other speaker.

No. 3120 Super Musicone Height, 18 inches; Diameter of Cone, 16 inches; Weight, 8¾ Lbs. . . . . Each, **$14.75**

One in a Shipping Carton

Musicone DeLuxe

Is a regular Musicone installed in a mahogany clock-case with a grilled screen. The effect is charming and offers a real finishing touch to any type of radio receiver. No additional batteries are required to operate.

No. 3122 Musicone DeLuxe Height, 13¾ inches; Width, 16¾ inches; Depth, 6¾ inches; Weight, 10¼ Lbs. in carton. . Each, **$23.50**

One in a Shipping Carton

CROSLEY

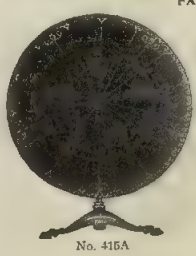
Musiconsole

Console cabinet with built-in Musicone with compartment for all batteries, wet or dry. Musicone suspended inside behind the silken screen. Two-tone Mahogany finish.

No. 3123 Musiconsole Height, 30⅜ inches; Width, 28⅝ inches, Depth, 12¾ inches; Weight, 20½ Lbs. . . . . Each, **$32.00**

One in a Crate

FADA



No. 415A

No. 425A

Cone

The Fada loud speaker is a circular cone, 22 inches in diameter, mounted to float free on a decorative metal base.

From the chrome steel hardened main magnet, through the special bakelite bobbins carrying the hair-fine wire coils, to the specially fitted pole pieces and the minute but carefully balanced armature, with its phosphor-bronze "retent", down through the actuating pin, with its carefully calibrated reducing motion.

It is a free-floating cone with a permanent magnet embodying an entirely new principle in speaker design and offering an entirely new conception of speaker performance.

The paper from which the cone and resonator are made is especially manufactured to insure perfect reproduction.

Used with any receiver the FADA loud speaker will bring out the best the instrument has to offer—used with FADA RADIO, its performance is perfection insofar as the human ear can tell.

No. 415A Height, 25 inches; Diameter of Cone, 22 inches. . . . . Each, **$35.00**

No. 425A Height, 55 inches; Diameter of Cone, 22 inches. . . . . Each, **$50.00**

One in a Shipping Carton

Crosley and Fada Loud Speakers are sold to Authorized Dealers only.

LOUD SPEAKERS

TOWER

Meistersinger

An efficient speaker with mellowness and depth of tone. Shell and goose neck are of duraluminum and bell is of sheet metal. Equipped with the high grade Tower Speaker Unit which can be adjusted instantly to any kind of a receiving set. Finished in golden bronze and brown to blend harmoniously with mahogany or oak.

No. 130 Diameter of bell, 13½ inches. Height overall, 21½ inches . . . . . Each, **$15.00**

One in a Shipping Carton

Scientific

Is substantially constructed and beautiful in appearance. The unit is enclosed in a heavy metal shell and attached to the base by screwing the horn ferrule to the unit cap, thus making it very secure and at the same time easily removable. The magnets are so strong they will lift 2 lbs 10 oz. through the pole pieces. The horn is made of a strong fibre material that is unbreakable and is so finished that it will not easily chip or mar. The graceful lines of the horn and base are emphasized by the soft golden bronze finish and gol-finish ferrule. Designed to blend harmoniously with mahogany or oak. Has unexcelled tone quality, the voice of the orator, cheers of the frenzied foot ball fans, mello strains of cello or violin, shrill notes of the fife or staccato beat of the drums; all are reproduced with uotmost faithfulness. The Tower reproducing unit and horn of scientific design to amplify signals to a degree hitherto unattained. This extraordinary volume is accomplished **without distortion,** and can be adjusted instantly by merely turning the shell of the unit slightly to the right or left.

No. 125. Diameter of bell, 10 inches; Height Overall, 21½ inches, ... Each. **$8.50**

One in a Carton

Little Spitfire

The horn is made of strong fibre and finished in black. Equipped with Tower adjustable scientific speaker unit. Complete with phone cords.

No. 185. Diameter of bell, 8⅛ inches; Height Overall, 17½ inches . . . . Each, **$4.95**

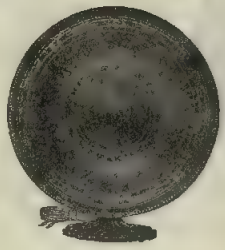
One in a Carton

Midget

Is a celluloid novelty, tortoise shell in color. Equipped with Towers adjustable speaker unit and phone cords. The reception given by this speaker is astounding.

No. 195. Diameter of face, 3 inches; Diameter of base, 3 inches; Height Overall, 5½ inches. . . . . Each, **$3.95**

One in a Box



Cone

This Cone marks a radical departure from the construction usually employed in Cone Speakers. Its superiority is the result of the use of an exclusive direct drive unit. Eight points of contact from unit to cone: An accoustically perfect non-warping Cone of parchment. Free edge design, thicker at center than edges. Reproduces both highest and lowest notes with perfect faithfulness and beauty of tone.

No. 135. Height, 17¼ in. Diameter of cone, 16 inches. Weight, 8 lbs. . . . Each, **$9.50**

One in a Shipping Carton

Meistersinger—Cone

Is a speaker of dignified beauty matched only by its rare tonal capabilities. Ideal for power tube operation, can also be used as a wall model by detaching base. The exclusive driving mechanism and free edge cone is protected by a solid mahogany frame and metal base with dolphin motif.

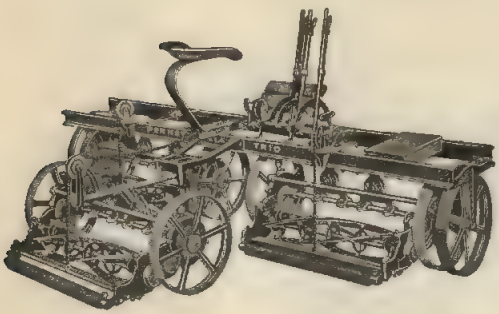
No. 140. Height, 17½ inches; diameter of cone, 16 inches. Weight 6 lbs. . . . . Each, **$15.00**

One in a Shipping Carton

FAIRWAY MOWERS.

THE PENNSYLVANIA TRIO.

86-inch Cut. Can be Drawn by Horses or Tractor.



The Pennsylvania Trio consists of three specially-constructed, 30-inch, 4 blade, mower units, high-geared, so yoked to a steel frame or sulky that a cutting swath of 86 inches is attained. Each mower unit acts independently of the others, being pivoted to the frame, enabling them to ride over uneven surfaces and to closely follow the undulation of the ground. The frame is supported on two separate ground wheels, relieving the cutting units of any extra weight, overcoming the objection of wheel marks on the turf and also giving the mowers greater flexibility and greater efficiency. Price includes wrought-iron hitch, or draft pole for double team, or single shafts. Width of frame, 9 feet. Net wt., 930 lbs.; shipping wt., 1180 lbs.

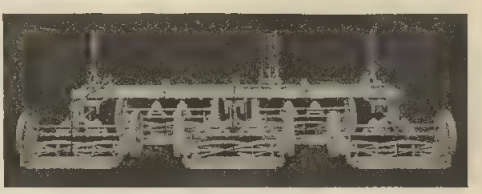
The Pennsylvania Trio.....Each **$600 00**

THE PENNSYLVANIA QUINT.

144-inch Cut. Tractor Drawn.

This outfit is built on the same lines as the Trio, with the frame two feet wider and five cutting units, all interchangeable. If desired, the two outside units can be detached and the machine operated as a Trio, with a pair of horses. Price includes draft pole or tractor hitch. Width of frame, 11 feet. Net wt., 1480 lbs.; shipping wt., 1900 lbs.

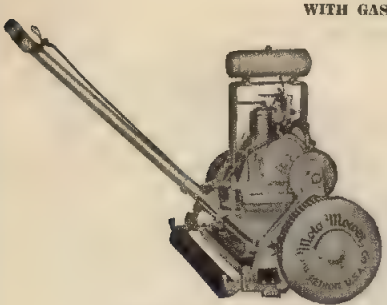
The Pennsylvania Quint.....Each **$1000 00**



LAWN MOWERS.

"MOTOMOWER" POWER.

WITH GASOLINE MOTORS.



27-inch Detroit Model.

21-inch City Model.

Simple, compactly designed, moderately priced, light enough to be easily run up and down over terraces, small enough to cut close to trees, hedges and flower beds, economical in gasoline and maintenance and so fool-proof that almost anyone can be trusted to run it without danger of getting it out of order. Starts, stops, and turns in any direction under its own power by the mere rotation of two rubber grips on the handle. The throttle control mounted on the handle allows the operator to vary the speed of the machine as conditions require.

Manufacturers' Guarantee—"We guarantee the Moto-Mower to be built of first class material throughout and of the highest grade workmanship; to be in perfect running order when leaving our factory; and to replace within sixty days from date of purchase any parts which prove defective through faulty material or workmanship, provided they are returned to our factory, prepaid, for replacement."

BROKEN SHELL EXTRACTORS
MARBLE'S

Extractor slips inside the broken shell, grabs it by the nose and one motion of the lever throws out extractor and the broken section

Made for all calibers from .22 automatic to .45 inclusive
No. 180 State Caliber. . . . . Each **$0.75**

AUXILIARY CARTRIDGES
MARBLE'S

For Rimless Cartridges

For .22 H. P. Cartridges

Places the pistol cartridges at the forward end of shell chamber for firing. Bullet takes rifling on being fired, does not strip and become deformed; does not lead the barrel. Gives thoroughly satisfactory results. It allows the use of very cheap ammunition for small game or target shooting in a large high-power rifle.

Furnished in the Following Sizes

No. 150 Size .30 Remington for use with .32 short Colt cartridges.
No. 151 Size .30-30 for use with .32 short Colt cartridges
No. 152 Size .25-35 for use with .25 Colt Auto. cartridges
No. 153 Size .25-36 Marlin for use with .25 Colt Automatic

MARBLE'S IDEAL

The blade in the Marble's Ideal knife is adapted to sticking and skinning. It is oval ground at back of point for chopping bones and other hard substances. Every knife is forged from razor steel and is hand tempered and tested. They are keen, heavy, beautifully made and slide into the sheath up to the tip.

With Leather Handle

Have a heavy tang onto which are driven washers made of sole leather, red and black fibre and brass. Bolster is brass. Tip is aluminum. All parts held rigidly in place by a round brass nut sunk into tip, engaging the threaded tang. Knife is highly polished.

Length of Blade, Inches	4¼	5	6
Weight, Ounces	6	7	8
No. 41 With No. 34 Sheath, Each	**$2.50**	**2.75**	**3.00**

With Leather Handle With Hilt

Same construction as No. 41 except has full brass hilt instead of bolster.

Length of Blade, Inches	4¼	5	6
Weight, Ounces	6	7	8
No. 45 With No. 39 Sheath, Each	**$2.50**	**2.75**	**3.00**

With Stag Handle

Handles are composed of two grooved slabs of selected stag horn carefully riveted together and driven on the tang. Brass bolster. Tip is stag horn. Knife is highly polished.

Length of Blade, Inches	4½	5	6
Weight, Ounces	6	7	8
No. 42 With No. 34 Sheath, Each	**$3.25**	**3.50**	**3.75**

With Stag Handle With Hilt

Same construction as No. 42 except has full hilt instead of bolster.

Length of Blade, Inches	4¼	5	6
Weight, Ounces	6	7	8
No. 46 With No. 34 Sheath, Each	**$3.25**	**3.50**	**3.75**

All the Above, Six in a Box

HUNTING KNIVES

MARBLE'S WOODCRAFT

No. 49 Leather Handle

No. 50 Stag Handle

Adapted for sticking, skinning, cleaning, slicing, breaking bones, etc. The thick back with tapering bevel blade carries the strength from handle to point, allowing it to serve the purpose of a thin blade, and yet has a surplus of strength. It is an all-purpose knife that will meet every requirement of the hunting, fishing or canoeing trip. Every knife is forged from razor steel and is hand tempered and tested. They are keen, heavy, beautifully made and slide into the sheath up to the tip. Tips are made of aluminum. Point protector furnished with each sheath. Knife is highly polished. Length of blade 4½ inches, length of handle 3¾ inches. Weight 4½ ounces.
No. 49 Leather handle, with No. 39 sheath.....Each, **$2.25**
No. 50 Stagborn handle, with No. 39 sheath.....Each, **3.00**

Six in a Box

MARBLE'S EXPERT

Leather Handle

Is particularly designed to meet the requirements of the professional hunter, trapper and guide who requires a thin, keen edge for dressing skins and furs. The back of the blade is designed for scraping skins while on the forms. Razor steel blade, leather handle, aluminum tip. Furnished with sheath No. 34.
No. 545 Length of blade 5 inches, weight 4½ ounces...Each, **$2.50**

Six in a Box

MARBLE'S TRAILMAKER

Leather Handle

There is no one cutting tool that will serve as many purposes as the "Trail Maker." A wonderful amount of work can be accomplished with it when blazing or cutting a way through thick undergrowth or cane brake. Tent poles, light fire wood and trees up to several inches in diameter can be cut as quickly as with an axe. Razor steel blade, leather handle. Furnished with sheath No. 41.
No. 56 Length of blade, 10 inches; length of handle, 5 inches; weight, 1 lb. Each, **$5.50**

One in a Box

MARBLE'S DEWEESE

Stag Handle

Designed by Dall DeWeese, for use on expeditions after big game. It has a dull saw back on which the thumb is placed when skinning or cutting hard substances. When sticking, the little finger should be doubled up, letting the end rest against it. This prevents hand from slipping forward. Razor steel blade, stag handle. Furnished with sheath.
No. 62 Length of blade, 4 inches; length of handle, 3¼ inches; weight, 4 ounces .....Each, **$2.00**

Six in a Box

MARBLE'S SAFETY

Open

Closed

This knife will appeal especially to that class of woodsman and sportsman who object to a sheath knife, and yet want a knife that is heavy, strong and rigid. Each knife is furnished with a sheath to fit it when folded, so that it can be carried at the belt when desired. They have a long blade with a short handle, utilizing the extension guard as a safety block when the knife is open. The guard, also the blade, are in position by a spring when either open or closed. The blades are of razor steel and have a bone chopper at back point. The hilts one on each side of the blade, and the bolsters and linings are of nickel silver. Side plates are of stagborn.
No. 83 Length of blade 4¼ inches, weight 4 ounces. Each **$3.50**
No. 85 Length of blade 5 inches, weight 6 ounces. Each **4.00**

Three in a Box

MARBLE'S SAFETY FOLDING FISH KNIVES

Open

Folded

The blade is made sharp at back of point for ripping and the back is an excellent fish scaler. The blade, when folded, is entirely protected by the nickel silver handle. When open it is as safe and rigid as a one-piece knife.
No. 78 Length of blade 4 inches, weight 8½ ounces....Each, **$1.50**

Six in a Box

MARBLE'S TROUT

Designed especially for dressing fish. Forged from finest cutlery steel equal to that used in best surgical instruments, 5⅝ inches long ⅛ of an inch thick. Insert little finger in ring, place remaining fingers and thumb back of blade and against the curve of the shank. Made in one piece, it is easily cleaned. Furnished with a metal bound leather sheath.
No. 79 Thickness, ⅛ inch; length, 5⅝ inches. Weight, 1 ounce .....Each, **$0.75**

ADJUSTABLE PLANES

STANLEY "BED" ROCK

In the Bedrock Planes the bottom of the Frog is machined so as to make it a tongue which fits into a groove formed in the bottom of the Plane. This insures great solidity and perfect alignment between the Frog and the bottom. The movement of the Frog in the groove for widening or opening the throat and the loosening or tightening of the Frog to the base of the plane is governed by screw adjustment which may be operated without removing the cap on the cutter. Rosewood Handles and Knobs

CROSS CUT SAWS

TUTTLE TOOTH

[illegible], finest crucible steel, especially hardened and tempered, taper-ground, polished, graduated 14 to 19 gauge, without handles.

The foundation of these saws is a special process steel, carefully inspected and tested in order to insure uniformity. Great care has been given to hardening and tempering to secure the proper degree of hardness and toughness.

No. X200 [illegible]—Feet	5	5½	6	6½
Width at center, in.	6½	7	7½	7½
W't, lbs.	5	6	6½	7½
Each	$7.80	8.55	9.35	9.90

These saws are known as Crescent Ground Cottonwood saws. They are particularly adapted for use in lumbering operations throughout the lower Mississippi Valley and bordering states.

SIMONDS', crescent ground cottonwood pattern. This saw is slightly narrower than the standard straight back saw. Teeth are ground to an even thickness throughout the entire length of the blade. Made of Simonds' polished, 14 to 19 gauge.

No. X326—Feet	5½	6	6½	7
Width at center, in.	5½	5¾	6¼	6¾
W't, lbs.	5½	6¼	7⅛	8
Each	$13.35	15.55	18.00	20.45

OTHER TYPES OF AC SPARK PLUGS

No. C5148—Type "H" SAE, extra long.....per box of 10 $11.75
No. C5154—Type "I" ⅞ in. long body.....per box of 10 11.75
No. C5155—Type "E" SAE Regular.....per box of 10 11.75
No. C5158—Type "F" ⅞ in. Regular Carbon Proof.....per box of 10 11.75
No. C5150—Type "Z" ⅞ in. Special for 1927 Packards and Studebaker.....per box of 10 11.75

*Indicates Used as Factory Equipment. One in a Box, Ten in a Carton. Approximate Weight Per Box 3½ Lbs.

9 *Reasons why AC Spark Plugs have the biggest demand, are the most profitable and the most satisfactory.*

1 **EQUIPMENT CREATES DEMAND**—Millions of cars per year are AC-equipped.

2 **POPULARLY PRICED.**

3 **IMPROVED DESIGN**—Absolutely gas-tight—insuring full power. Remains gas-tight after cleaning.

4 **BETTER INSULATOR**—Insures delivery of full spark.

5 **BETTER GLAZE**—So hard and smooth it effectively minimizes carbon accumulation.

6 **BETTER SPARKING POINTS**—Insure long life, easy starting and good performance.

7 **DEALER HELPS**—Display Cabinets, Window Displays, Signs, Folders, etc.

8 **SALEABILITY**—AC's are more saleable because of quality, price, advertising and an ever-increasing equipment demand.

9 **BUILD BUSINESS**—Sell AC's by the set of 4 or 6.

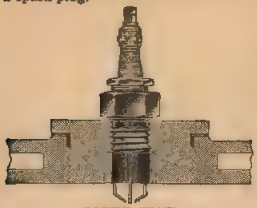
POSITION OF SPARK PLUG IN CYLINDER

The correct position of the spark plug electrodes within the cylinder is an important item and the successful operation of an engine depends to a great extent upon the correct fitting of a spark plug.



RIGHT WAY

This illustration shows the correct position of the firing points of the plug in position in the cylinder.

The best results are obtained when the firing points are surrounded by the fresh gaseous mixture.

WRONG WAY

This illustration shows the improper fitting of a plug in the cylinder.

The recess between the firing points and the top of cylinder forms a pocket for burnt gas and permits carbon to accumulate rapidly, causing the plug to misfire.

Excessive oil in the combustion chamber, or too rich mixtures of gasoline will cause any spark plug to become fouled or short-circuited by carbon deposits. Unless you remove the cause of the trouble by giving proper attention to engine valves, pistons, rings, lubrication, carburetor adjustment, etc., cleaning will give you temporary relief.

It is also necessary to make any spark plug function perfectly to see that the gap between the electrodes (where the spark jumps) is kept adjusted to .020 to .032 inch. The requirements of any particular engine may vary—you may have to experiment to find just the right setting. When you have found it, keep your plugs always adjusted.

SPLITDORF SPARK PLUGS

No. C5272A—P179, ½ in. Ford Special w't per doz. 4 lbs.,
per box of 10.....$11.10

No. C5273A—P165, ⅞ in. long, w't per doz. 4 lbs.....per box of 10 $12.90

SPARK PLUGS.

CHAMPION.

IN BLUE BOXES.

The concentration of the Champion Spark Plug Line to Blue Box numbers and the Champion X, is of great importance to the dealer. It means a more complete stock, with a smaller investment, a much more rapid turn over and more profit. They provide a type and size for every car. Champion special alloy electrodes will not burn or corrode; Sillimanite core, double silk ribbed semi-petticoat; carbon, heat and breakage proof.

No. 1—⅞ In. Standard.

No. 1. ⅞ in. Standard. For Auburn, Durant 6, Gardner, Haynes, Lexington, Locomobile, Marmon (from '26), Studebaker, Stutz 4, Willys-Knight 6. Wt., 4 ozs. .....Each $0 75

ALVIN SILVER

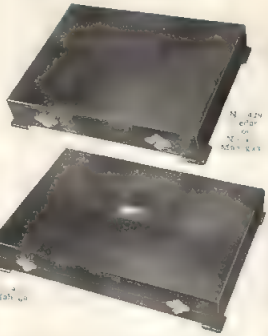
Long Life Plate

LOUISIANA

GRAY FINISH

THE following illustrations show our "Long Life" Quality Plate which will satisfy the most particular customer. It is produced with the same care, skill and attention to details as Sterling silver. Each piece is heavily plated with a uniform weight and thickness of pure silver to resist the hardest wear and insure the longest life.

This handsome velvet lined Gift Case will be furnished *free* with 26, 29, 32 or 39 piece combinations



26, 50, 65 and 96 piece chests in Cedar or Mahogany. See seventh page following for prices.

New Cadillac Model 341 Larger Car Throughout

Wheelbase of 140 in., Torque Tube Drive and 341 cu. in. Engine With Side by Side Rods Are Features

By Athel F. Denham

NEW larger Cadillac is announced by the Cadillac Motor Car Company. It embodies a new larger engine of 341 cu. in. piston displacement, a new double disk dry clutch, torque tube drive, larger rear axle, and larger lower bodies on a longer, 140 in. wheelbase.

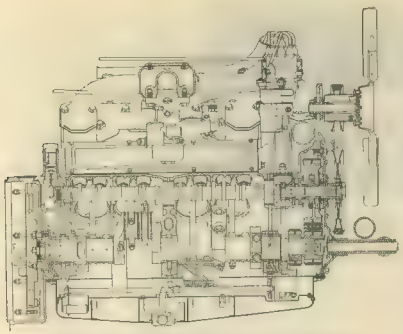
Individuality of appearance has been obtained in the new Cadillac by the use of stream lining, and balanced body design, rather than through the use of freakish or unusual departures. Luxurious interiors, higher standards of performance and a wider variety of body designs are all featurse of the new line. There are fourteen Fisher bodies in the line and twelve bodies by Fleetwood. The former include four open models, while the latter include four "transformable" body models.

Leading the chassis changes is the larger 8-cylinder V-type engine, having a bore and stroke of 3-5/16 by 4-15/16 in., giving an S. A. E. rating of 35.1 hp. Actual horsepower is 90 at 3000 r.p.m. As formerly, a three bearing crankshaft provided with weights compensating for the inertia forces of reciprocating parts is embodied in the engine. Main bearings are of the Chadwick interchangeable type, 2⅝ in. in diameter and with lengths from front to rear of 1 31/32, 1 11/16 and 2⅛ in. Crankpin journals are also 2⅛ in. in diameter, but the rods are now side by side on the journals. Connecting rods themselves are of alloy steel, 10½ in. between centers, and fitted with shimless die cast bearings at the crankpin ends. A bronze bushing is fitted in the small end, in which bears the ⅞ in. diameter, 3 3/32 in. long piston pin, which is locked in the nickel iron pistons. The latter are fitted with three ring grooves, two above the pin, and one below, all 3/16 in. wide, with the lower ring of the oil scraper type.

Four-bearing Support on Camshaft

Four-bearing support is used for the camshaft. The front bearing is of aluminum alloy, while the rear bearings are of

Seven-passenger sedan on new Cadillac 341 chassis



Note the side by side rods of the 341 Cadillac engine

bronze. Following are camshaft bearing sizes:

	Diameter	Length
Front	1⅛	1 13/16
Front center	2 ⅜	1
Rear center	2⅜	1¾
Rear	1 11/16	1 9/16

Camshaft drive is by means of a non-adjustable chain from the crankshaft. A second chain is used to drive the water pump and generator which are mounted in tandem. This chain is adjustable through a bracket on the generator.

Inlet Valves of Tungsten Steel

Inlet valves are of tungsten steel, with a 30 degree seat, while the silicon chromium exhaust valves have a 45 degree seat. Both have a 1⅛ in. head diameter and ⅜ in. stems. Tappet clearance for the inlet is .004 in., and for the exhaust .006 in., both adjusted cold.

Engine lubrication is similar to that used in the Cadillac 314. Oil capacity, however, now is eight quarts (seven quarts refill).

A two-inch single jet carburetor of Cadillac manufacture, provided with an air plunger in the accelerating well, and thermostatic air valve control is used in connection with an improved manifold. Fuel is fed to the carburetor from a larger 21-gallon tank at the rear through a vacuum tank on the dash, manifold vacuum being assisted by a vacuum pump driven from the rear end of the camshaft.

A new style of exhaust manifold is also incorporated on the engine. The manifold from the right hand block is brought across the engine Vee at the front end and joins the manifold from the left hand block, from whence it passes into a single exhaust pipe and muffler. A heat control valve is also provided in the left hand exhaust manifold, which when turned on, forces all exhaust gases from the left hand block to pass through a jacket around the inlet manifold Tee in the Vee of the engine, into the exhaust manifold of the right hand block.

With the increase in engine size, the cooling system has also been enlarged. Water capacity is six gals. The cellular radiator is higher and deeper than formerly and is provided with thermostatically operated radiator shutters. A six bladed "Automotive" fan driven by a Vee belt is standard.

Delco-Remy electrical units are used, the distributor having a semi-automatic advance, and starter engagement being by means of a mechanical gear shift. Included in the electrical system is a 130 amp. hr. Exide battery.

Engine suspension is of the three-point type. The front end is supported in a trunnion mounting to the front frame cross member, while the rear supports are rubber cushioned, flanged rubber bushings being used.

Assembled in unit with the engine is the double plate clutch and three speed transmission. The clutch consists of two carbon steel driven disks, faced on both sides with 9½ in. outside diameter asbestos facings. Springs, levers, etc., are all mounted on the flywheel in order to reduce the inertia forces of the clutch plates.

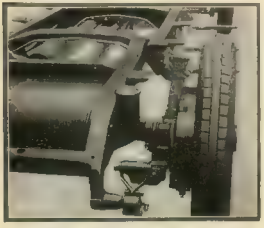
With the adoption of a torque tube drive and in order to reduce transmission noises, the former aluminum transmission case has been replaced by a cast iron housing. Gears and bearings, however, are similar to those used in the Cadillac 314. Directly back of the transmission case is a ball and socket universal joint, connecting the transmissions mainshaft to the 2⅛ in. propeller shaft enclosed in the torque tube. Lubrication of the universal joint is automatically taken care of by oil from the transmission case.

All Cadillac front seats are adjustable by means of the above control handle

Gears in the rear axle are larger than formerly, as is the differential carrier. Axle shafts are also longer than formerly, while the housing has been strengthened to provide for the torque tube drive now used. Brace arms are attached to the top of the axle housing, inside the spring pads, running to a point about midway forward of the torque tube. Springs are now underslung, contributing to the decreased overall height of the car.

With the change in type of drive, the rear spring front brackets have been redesigned, and are shackled to heavy malleable iron brackets attached to the frame side member. Rear brackets are of the ball and socket type. Front springs are now 42 by 2¼ in., and rear springs are 60 in. long and 2½ in. wide, all semi-elliptic.

Front axles remain virtually unchanged, as does the steering gear. Frames, however, in addition to greater length, are now provided with a five in. kickup over the rear and 1¾ in. kickup over the front axle. A new tubular cross-member has been added back of the engine supports, with the adoption of rubber cushioned engine mountings.



This shows the frame rear kickup and new front mounting of rear springs

This cross member is bolted to malleable iron brackets riveted to the underside of the frame side channel to facilitate removal of the transmission. From a point about midway of the frame to the front end, the side channels are of a double layer of sheet steel, the thickness of the frame side member proper being 5/32 in., while the reinforcing channel plate is ⅛ in. thick. Side members are 7⅛ in. deep and have 2⅝ in. flanges.

The inverted U shaped pressed steel members have been strengthened through the addition of horizontal flanges.

Brakes are similar in design to those used on the model 314, but larger, 16 in., drums are used. Front wheel brakes require 63 in. 2¼ in. wide 3/16 in. thick lining. Rear wheel service brakes take 91 in. of 2¼-in. wide, 3/16 lining, while the hand brake is lined with 2-in. wide lining, also 3/16 in. thick, 80¾ in. being required.

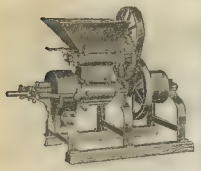
Other chassis changes include the adoption of a 4.75 to one standard gear ratio instead of 4.91 to one, as on the former model, re-location of the speedometer drive, which is now inside the universal joint instead of the transmission, adoption of Delco-Remy-Lovejoy hydraulic shock absorbers, mounting of the oil filter on the crankcase instead of on the dash as formerly, mounting of the starting motor in a horizontal position on the transmission case, instead of vertically at the rear of the crankcase, and the adoption of a new carburetor heat-deflector, covering carburetor and inlet manifold Tee. The gas tank filler has also been removed to the side of the tank, and is provided with a separate external pipe for venting the tank at the top. Tires are 32 by 6.75 on 20-in. wheels.

Rubber covered steel running-boards are now used. All driver's seats are adjustable fore and aft by means of a crank at the top of the seat back. On those models which have a full cross seat, adjustment affects the driver's seat only, made possible by the use of an invisible pleat in the center of the cross seat upholstery.

Dash instruments include engine thermometer, gasoline gage, electric clock, cigar lighter and a new type of ignition lock, which grounds the distributor in addition to opening the battery lead. With this new instrument board, the usual wood cross piece used with Fisher VV windshields has been eliminated, although the VV windshield has been retained.

Upholstery of the closed car is mohair velvet. Artillery wheels are standard.

GRINDING MILLS
KELLY-DUPLEX



Height 48 inches; outside distance between sills 27 inches; length of main shaft 61 inches; diameter of pulley 12 inches; width of face 9½ inches; diameter of grinding plates 12 inches; speed 900 to 1100 revolutions; will grind velvet beans without vines.

Power required to operate 12 to 20 H. P. gasoline engine or electric motor.

Each

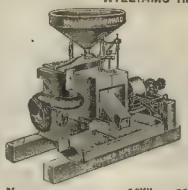
BURR GRINDING MILLS

Especially designed ball-bearing to prevent heating. Well lined with babbitt and fitted with compression grease cups. The mill stones or burrs used are of the pearl flint grit which is the best burr known for grinding grain for table use.

WILLIAMS IMPROVED



With Blower.

Designed with special care, so as to leave as little meal as possible in the mill after grinding. This is obtained by two fans being attached to the runner stone. These fans draw a current of cool air between the bed and the runner stones while the mill is in operation, keeping the meal cool and cleanly blown out.

Per gross 4.50
Per box of 6 dozen..... 2.40

COCA-COLA advertising shows the power of repeated use of one subject for reproduction by all mediums. The same full-color oil painting is used for 2-color, multicolor, and black and white illustrations in magazines, newspapers, billboards, rotogravure, window display, etc. This page shows in miniature the cover design for one issue of their monthly house organ—4-color process plates with dark green substituted for black. This clever substitution provides the typical green Coca-Cola background.

This insert of four pages was Engraved by Mound City Engraving Company, St. Louis, Mo.

Advertising subjects furnished by D'Arcy Advertising Company, St. Louis, Mo.
Printed by H. S. Collins Printing Company, St. Louis, Mo.,
on A. M. Collins Manufacturing Company's Ivory Linktone, 25x38—100.

THE COMPLETE oil painting is here reproduced in miniature as it is used for street car cards, window displays, and 24-sheet posters for outdoor advertising.

Engraved by Mound City Engraving Co., St. Louis

See the column on the opposite page for details about this

THE WELL KNOWN sign shown on the opposite page is now moved close to the girl's head and 2-color process plates made for magazine advertising. So skillful is the reproduction that we are hardly conscious of the omission of yellow and blue. When viewed in full Saturday Evening Post size the effect is naturally more impressive.

In the lower right-hand corner is shown a miniature of a newspaper advertisement -coarse-screen combination zinc halftone made from the same subject.

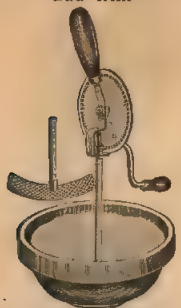
GENUINE DUNLAP'S CREAM AND EGG WHIP



Furnished complete with stone bowl. The action of this whip is cutting instead of "beating."

Flexible blade, nickel plated steel drive wheel and rod, wood handle, 7 in. glazed stoneware bowl, w't per doz. 30 lbs.

The keen flexible blade vibrates with great rapidity when driven through the cream at high speed.

Half a pint ordinary cream is whipped in less than one minute if bowl and cream are cold.

No. H1—Full dozen carton, per dozen $16.65

No. D1—Less than carton, per dozen 17.20

EXTRA BOWLS

No. D701—W't per doz. 20 lbs., per dozen 4.45

EXTRA BLADES

No. D702—W't per doz. ⅓ lb., per dozen $4.45

HALF DOZEN IN A CARTON

WHIPPIT CREAM WHIP

The Whippet will quickly whip cream stiff. Needs no special crock, any bowl or dish will do. Made of the finest nickeled steel and guaranteed for years.

The patented agitator positively prevents spatter.

Easily taken apart and put together. Cleaned in a jiffy.

No. D21—13¾ in. over all. Handle black enameled, blades and rods of tool steel, w't per doz. 11 lbs., per doz. $17.75

PACKED IN BEAUTIFUL INDIVIDUAL BOXES

JAR CREAM WHIP AND EGG BEATERS

No. D91—Holts, 13⅜ in. egg beater with cast iron frame and gears, tinned agitators and a 1 pt. jar, w't per doz. 25 lbs., per dozen $15 55

No. D92—Holts, 16¼ in. egg beater with retinned frame and gears, with retinned fluted agitators and a 1 qt. jar, w't per doz. 35 lbs., per dozen $22.75

ONE IN A BOX

SUNLITE BEATER AND ALUMINUM BOWL

With Non-spatter Cover

The beater is strong and durable and develops remarkable speed.

Cover is nickel plated and securely fastened to beater.

Bowl is high grade aluminum with paneled sides which add to the beauty and offer the necessary resistance to quickly beat the contents.

No. D23—Height over all 12 in., diameter of bowl 5 in., height of bowl 5¼ in., w't per doz. 18 lbs., per dozen $17.75

BEATER SETS

With Bowl and Cover

A perfect beating and mixing apparatus, that is at the same time strong, durable, simple, efficient and good looking.

Beater develops high speed with ease of operation owing to extra large wheel of heavy material and smoothly cut gears. A large axle with double bearing prevents slipping or binding. Metal parts nickeled. Handles snow-white, blue-tipped.

Bowl is high grade ovenware snow-white inside and out, except for blue bands matching enamel on handles. Bowl is 5¼ in. high, 5 in. in diam.

Cover is of patented design, securely fastened to beater so that both beater and cover can be easily raised to see condition of ingredient being whipped.

No. D40—Set complete, Beater, Bowl and Cover, height over all 12 in., w't per doz. sets 42 lbs., per dozen sets $26.10

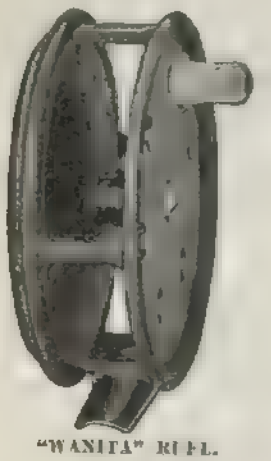
ONE-HALF DOZEN IN A BOX.

TROUT.



"WANITA" REEL.

Fly Casting.

One of the Lightest Reels Ever Made.

Here's a fly reel that combines lightness and ruggedness as it has never been combined before

It is built of a particular alloy metal specially prepared to give lightness with no sacrifice of strength and rigidity. It will "stand up" under the roughest as well as the most careless usage. It is perfectly balanced, very compact and winds quickly and easily Taken apart in a jiffy—all parts instantly accessible

Bearings are of phosphor bronze. Both the click and the gear are made of the highest quality hardened and tempered steel The click rests against a nickel coil spring giving direct tension The spring itself is made of deep drawn spring steel and will not break The reel seat is of nickel silver composition and is unbreakable in service. This seat is rigidly doweled and screwed onto the reel housing. Perfectly accurate workmanship insures the perfect balance and beautiful running qualities which have made this reel dear to the heart of the experienced angler. Weight is 3⅞ ounces.

TROUT.

REDDON IMPERIAL.

This new model Fly Reel has been pronounced by prominent Tournament Casters as ideal in every respect. The entire frame and spool are die cast aluminum

The large arbor or drum of the Reel insures quick recovery of the line when reeling in, also avoids small diameter coils which are injurious to the enameling. The bearings are of steel and bronze which will give an unlimited amount of service.

The Reel can be taken apart instantly and cleaned and oiled without tools, as the spool can be lifted from the frame by releasing the catch on the handle side of the spool

Net Each

NO. D125P—Reddon Imperial Trout Reel. Plain .....List each, $12 50 $18.68

The latest and best in automatic reels. Has no equal. Is the very latest improvement in an automatic reel. Efficient—holds 50 yards; durable—all wearing parts hard metal; strong—reinforced edges; compact; light weight—5¼ oz. Net Each

NO. DUTK—Capacity 50 yards, weight 8½ oz. .....Retail price $8.00 $8.00

ONE ONLY IN A BOX.

GO-ITE REEL.

The Go-ite Reel is the large type reel at its very best. It is light, compact, and easy to handle. The broad thumbing band and tension screw gives the amateur fisherman a veteran's control of lure, line and fish. The off-set reel seat permits plenty of clearance between the rod handle and the thumbing band, avoiding barked and bleeding knuckles.

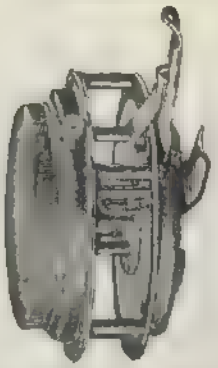
The materials, design and construction of the Go-ite Reel are the result of years of experiment on the part of seasoned fishermen which has enabled them to embody in it these outstanding advantages which have fully converted hundreds of fishermen to the use of the Go-ite Reel:

1. The thumbing band which gives the angler absolute control over his line, lure and catch. Being smooth, the thumbing band does not wear on the thumb
2. The tension net and spring housing
3. The anti-backlash ring which eliminates back lash.
4. The direct agate line guide
5. The one piece aluminum reel.
6. The off-set reel seat permitting full grip on the rod
7. The large circumference giving absolute control of the fish—handles 14 to 20 inches of line at one turn.
8. The weight—only six ounces.
9. The line drying wheel. Net Each

NO. DG—Size 5¼ in., bright finish, polished.....List price $6.00 $8.00

ONE ONLY IN A BOX.

AUTOMATIC.



MARTIN AUTOMATIC FISH REELS.

For over 30 years the Martin Automatic has been the lightest, strongest, simplest, most durable and most responsive Automatic reel made. Automatic reels have come and gone, but the "Martin" continues in its supremacy Some of the original old-timers are still in use

Most of the reel is made of Aluminum and Duraluminum reducing the weight to approximately seven ounces. It is stronger than ever because it has been greatly simplified.

All parts requiring strength are of brass or nickel silver. There are no projections on which the line may catch and a nicely fitted line spool prevents all possibility of an on tangled line. The direct connection between the main spring and the line spool makes the "Martin" the most responsive of all Automatics.

Equipped with special line protector which is mounted beside one of the reel posts. It is made of special Tungsten steel, hardened glass hard.

Other new features are the simplified Brake Lock and Brake Release operated by one finger of one hand. The hook hole in brake release lever will be welcome to every fisherman

Net Each

NO. 1M—Especially adapted to trout fishing. Is the smallest of the Martin Reels and carries 75 feet of G line. It is a first-class reel, trim and compact and well adapted to small stream fishing. Can be used for heavier work if desired.....List price $4.50 $6.20

NO. 2M—Is the second Reel in size and carries more line than the No. 1, having a capacity of 90 feet of G line, and a larger amount of smaller size. This greater capacity makes the No. 2 preferable to the No. 1 when greater length of line is desired It is a strong, serviceable reel, adapted to general fishing.....List price $5.00 $7.00

NO. 3 MARTIN—It is a splendid reel for bass and other game fish. It is considerably larger than the No. 2 Reel, carrying one hundred and fifty feet of G line, which greater strength is quite an advantage for heavier fishing. The No. 3 is an all-around Reel and capable of efficient and lasting service .....List price $5.50 $7.60

ONE ONLY IN A BOX.

AUTOMATIC.

NEW STYLE "Y AND E."

The Automatic Combination Reel is the great favorite because you can make your cast free-running, and the instant slipping of a catch applies the tension, either to rewind your line for another cast, or to prevent the fish from dropping your hook. Has the key-winding feature which enables you to apply more tension instantly in case you have a lot of line out, or to vary the tension according to your requirements

Made of aluminum with tool steel bearings Net Each

NO. DA—Capacity 125 feet No. 5 silk line, winding 50 feet automatically without rewinding; diameter 2⅞ inches, weight 7½ oz.... $18.00

NO. DB—This is the favorite size for all-around use. Capacity 300 feet No. 5 silk line, winding 90 feet automatically without rewinding; diameter 3⅝ inches; weight 11 oz 19.00

ONE ONLY IN A BOX.

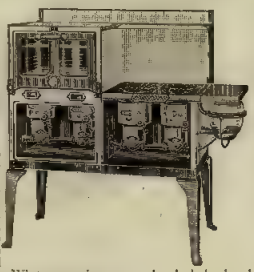
OIL COOKING RANGES

HARVARD

With Patented Kerogas Burners



Patented Kerogas Burner—Genuine brass, drawn out of one piece. It is rustproof and seamless. Saves fuel. Gives intense heat. Burns 400 gallons of air to every gallon of kerosene oil consumed. The Kerogas burner generates gas from kerosene oil, it does not burn the oil. It mixes the proper amount of air with that gas causing the stove to burn like a gas range. The heat from this burner is intense and clean and the flame is concentrated directly under the cooking utensils. Oil inlet prevents water from entering the burner. **Wick Raising Device**—Has two cog wheels with three points of support for the stem. It grips the wick carrier at all times. **Wick Regulator**—Makes stove as easy to operate as a gas range. **Drums**—Scientifically constructed. Extracts maximum amount of gas from the oil and mix it with the proper amount of air. **Cooking Service**—Range is equipped with two giant burners for the cooking service and two regular burners for the oven. Has two direct and two auxiliary cooking holes—start the cooking directly over the two Giant Burners and if these are required for the preparation of other foods, slide the cooking started over the burner to the auxiliary holes where it will continue to cook until fully prepared. **Oven**—Roomy, with full asbestos lining. Glass door with thermometer. Equipped with two regular Kerogas Burners. For quick results, this oven is provided with a partition plate. For biscuits, for instance, this plate is inserted in the middle rack slide. This reduces the oven size, making possible quick pre heating and a hot, fast oven. **Sub-Tank**—Under the kerosene fount is made of brass and will not rust. **Glass Tank**—Is extra large, holding one gallon of oil. It always shows the amount of kerosene in the tank and is easy to fill and keep clean. Oil feed pipe is curved and has removable cap for cleaning purposes. **Construction**—Body made of heavy steel. Cast iron oven door, legs and end shelf. Polished cast iron cooking top. **Finish**—Black rubberoid, with gray enamel door panel. White porcelain enamel splash back, aluminized oven. Drums are blue porcelain enamel.

No. 6650 Size of cooking top, 21½x21½ inches; height to top of stove, 34 inches; height overall including high shelf, 51 inches; size of oven, 18x12x18 inches; shipping weight, 248 pounds. . . . . Each, **$72.50**

The heat from this burner is intense and clean and the flame is concentrated directly under the cooking utensils. Oil inlet prevents water from entering the burner. **Wick Raising Device**—Has two cog wheels with three points of support for the stem. It grips the wick carrier at all times. **Wick Regulator**—Makes stove as easy to operate as a gas range. **Drums**—Scientifically constructed. Extract maximum amount of gas from the oil and mix it with the proper amount of air. **Square Grates** Permit the heat to reach the sides, as well as the bottom of cooking utensils. Cause the heat to spread along the entire surface of the stove. **Sub-Tank**—Under the kerosene fount is made of brass and will not rust. **Full Cabinet Back**—Prevents false drafts from reaching the flame. **Lower Shelf**—Convenient for pots, pans and kettles. It is placed high enough off the floor to permit cleaning under it with ease. **Glass Tank**—Is extra large, holding one gallon of oil or sufficient to allow one burner to burn 24 hours; two burners, 12 hours, etc. It always shows the amount of kerosene in the tank and is easy to fill and keep clean. Oil feed pipe is curved and has removable cap for cleaning purposes. **Construction** Body is full cabinet closed-in style. Straight frame and legs. The legs are securely bolted to the frame. The 3 and 4 burner stoves have tops which are reinforced so that they will hold the heaviest cooking utensils. The tops are built extra wide. The end shelf acts as a protector of the glass tank and also furnishes a very convenient extension to the wide top. Grates are of cast iron, size 9x9 inches. **Finish**—Dark olive green enamel with black japanned top, end shelf, base shelf and lower shelf. Drums are blue porcelain enamel.

OIL COOK STOVES

HARVARD GIANT

With Patented Kerogas Burners

Giant Kerogas Burner—Rapid cooking. Made of genuine brass, drawn out of one solid piece. Seamless and rust-proof. Clean heat—no soot, or odor. **Regular Kerogas Burner**—Highly economical. Made of brass drawn out of one solid piece. Rust-proof and seamless. No complicated parts Generates gas from the oil. Intense, blue gas flame, free from soot or odor. Burns 400 gallons of air to every gallon of kerosene oil consumed. **Wick Raising Device**—Grips the wick carrier at all times. Has two cog wheels with three points of support for the stem—insures perfect operation. **Wick Regulator**—Makes stove as easy to operate as a gas range. **Burner Drums**—Scientific construction. Mixes the proper amount of air with the gas generated in the burner. Causes stove to burn like a gas range. **Grates**—Square type. Permit heat to reach the sides as well as bottom of cooking vessels. Allow 30 per cent more heating surface. **Brass Sub-Tank**—Under oil fount. Made of brass will not rust. **Full Cabinet Back**—Prevents false drafts from reaching the flame. **Lower Shelf**—Convenient for pots, pans and kettles. High enough off the floor to easily clean underneath. **Construction**—Body is full cabinet closed in style. Straight frame and legs. The legs are securely bolted to the frame. Tops are reinforced so they will hold the heaviest utensils. The tops are built extra wide The end shelf acts as a protector of the glass tank and also furnishes a very convenient extension to the wide top. Grates are of cast iron, size 8x9 inches. **Finish**—Dark olive green enamel with black japanned top, end shelf, base shelf and lower shelf. Drums are blue porcelain enamel.

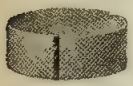
WICK OIL COOK STOVES

NESCO PERFECT

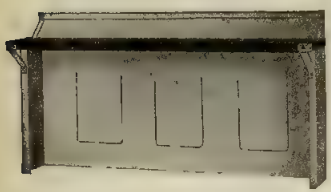
Stove Frame is made of extra heavy steel throughout. Legs are made from extra heavy sheet steel, fitted with leg leveling screws and are attached to the stove with six bolts. A tray, or lower shelf is furnished with each stove; this tray serves for holding cooking utensils. The top of the stove is reinforced with U bars welded to its underside. The tank shelf is 8x10 inches and extends over and affords a protection to the glass tank and provides added top surface; it is hinged to a stationary bracket and swings back out of the way. Grate holes are round. Frames have open backs behind the burners. Highly finished cold rolled steel is used in order to secure the best surface possible On this steel is baked at a temperature of 400 degrees, a coat of high gloss jet black japan onthe legs, top shelf, base and tray, with Special Nesco Gray sides and back of cabinet, and indicator dial panel. The chimneys are porcelain enameled in turquoise blue. Not a single piece of cast iron is used in the entire stove except the grates. Trimmings are highly polished and nickel plated. with neat designs embossed in the ends and front. **Glass Tank.** Is machine made from pure natural green glass and has a 2 inch filler opening; a metal band placed in a recess in the body of the tank serves as a medium for attaching the bail and side handles; capacity, 1 gallon. An automatic valve prevents the oil from spilling. **Glass Tank Suport.** The sub-tank is drawn seamless and is heavily lead coated, pipe line is reinforced, supporting bracket is bolted to the stove. **Feed Pipe Line.** Is made from heavy wrought iron pipe with branch pipes electrically welded on and the entire unit is electro zinc plated.



Rockweave Wick. Is a woven non-burnable wick, made of the best asbestos obtainable. The asbestos strands are woven around brass wires so as to provide air cells, giving space for absorption, and providing an efficient medium for conducting the oil from the burner to the flame. These wicks are reversible and with care will last a year.

Burner. The handle lowers the burner bowl and its contained Rockweave wick by toggle joint (not gears) into the oil level. The oil flows into the boyl and the wick feeds it to the flame. The flame passes up the combustion chamber, air passes in and forms a gas which ignites and rises in a very hot blue flame. The Lifting Device raises the chimney off the burner bowl giving space for lighting. All parts are easily cleaned. The Chimney can be lifted off and taken apart. Rockweave wicks can be removed to be cleaned and the burner bowl channels and surfaces cleaned. A wrench is permanently attached for tightening the packing nut over the sliding joint of the feed pipe line.

HIGH SHELVES



High shelves are always furnished extra. They come for three or four burner stoves only. Are made of extra heavy steel. Embossed panels add strength as well as beauty. The color is Nesco grey for sides and back, the shelf itself is jet black, the braces and corner pieces are nickel plated. Shelves are shipped knocked down. Sides and back fit together in grooves. They are easily put together and attached to stoves.

Hibbard HARDWARE FOR HARD-WEAR

Hibbard HARDWARE FOR HARD-WEAR

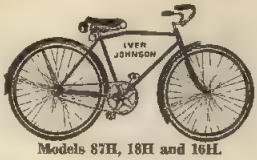
ALL ABOVE PACKED IN INDIVIDUAL DISPLAY CARTONS, ONE IN A BOX

BICYCLES.

IVER JOHNSON.

The Iver Johnson bicycle is built to give extra long, unfaltering service, under any and all conditions, with no trouble or annoyance of broken parts due to poor materials or faulty construction. It is built to give lasting riding satisfaction

Model 87M.



Models 87H, 18H and 16H.

MOBICYCLE. MODEL 87M.

Latest design; finds great favor with youngsters who do not object to little additional weight to get a bicycle built along motorcycle lines, with features similar to the power driven machine Has the Iver Johnson qualities of sterling worth and easy riding.

Frame—Mobicycle; oxidized silver name plate; height, 18 or 20 inches at seat post; color, blue with white head, full nickel crown; wheels, 28 inches with steel rims, striped; tires, Fisk cord 1½ inches; coaster brake, Morrow; gear, 73 (26 and 10); chain, roller, 3/16 inch, 1 inch pitch; cranks, 7 inches; pedals, rubber; handle bar, No. 82 with forward extension, long bulldog grips; saddle, Motobike Two, No 43; fork, detachable truss, full nickel; stand, rolled steel, motorcycle type.

No. 87M-18. Wt. each, crated, 72 lbs. ..... Each **$60 00**

No. 87M-20 ..... Each **$60 00**

Note—In ordering No. 87M be sure to specify whether 18 or 20 inch size is wanted.

DROP BAR ROADSTER. MODEL 87H.

The upper tube is dropped 2 inches at the saddle post, thus making this full size bicycle available for the rider who otherwise would be unable to reach the pedals of a regular straight frame. Just the model for persons of short stature, as well as those desiring a rakish looking bicycle. Frame, drop bar; oxidized silver name plate; height, 18 inches at seat post; color, blue with white head, full nickel crown; wheels, 28 inches with steel rims, striped; tires, Fisk cord, 1½ inches; coaster brake, Morrow; gear, 73 (26 and 10); chain, roller 3/16 inch, 1 inch pitch; cranks, 7 inches; pedals, rubber; handle bar, No. 62, 22 inches, with forward extension; saddle, Motobike Two, No. 43.

No. 87H. Wt. each, crated, 70 lbs. ..... Each **$50 00**

BOY SCOUT. MODEL 18H.

This is a man's bicycle in every way, but of somewhat reduced size to accommodate boys not quite large enough to reach the pedals of regular ones. In order to give it the appearance of the larger machines, the upper tube is dropped in a graceful curve at the saddle post two inches, without shortening the head. This construction secures a stronger and more snappy looking bicycle, and one which the growing boy can ride without an appearance of having outgrown it. By raising or lowering the saddle, it readily adapts itself to varying ages and sizes. All the equipment is high grade. Frame, drop bar; oxidized silver name plate; height, 16 inches at seat post; color, blue with white head, full nickel crown; wheels, 26 inches with steel rims, striped; tires, Fisk juvenile; coaster brake, Morrow; gear, 64 (22 and 9); chain, roller 3/16 inch, 1 inch pitch; cranks, 5½ inches; pedals, Juvenile rubber; handle bar, No. 62, 18 inches with direct stem; saddle, Scout No. 46.

No. 18H. Wt. each crated, 50 lbs. ..... Each **$45 00**

BOY SCOUT JUNIOR. MODEL 16H.

A distinctive Juvenile model, constructed in such a manner that the small child can readily reach the pedals, and yet be able to use the same size of frame as larger or older children. The top bar is dropped two inches at the saddle post, similar to the Boy Scout Model, and by raising or lowering the saddle it will readily adapt itself to varying ages, and not soon be outgrown. This model also has all the high quality points of superiority same as on larger models, and is just the bicycle for the small child, as it will withstand hard knocks and rough and tumble usage, and continue to give good service as long as ridden. It is the most economical to buy, as it will outwear several others of cheaper construction. Frame, drop bar; oxidized silver name plate; height, 14 inches at seat post; color, blue with white head, full nickel crown; wheels, 24 inches with steel rims, striped; tires, Fisk Juvenile; coaster brake, Morrow; gear, 59 (22 and 9); chain, roller 3/16 inch, 1 inch pitch; cranks, 5½ inches; pedals, Juvenile rubber; handle bar, No. 60, 16 inches, with direct stem; saddle, Kiddo Scout, No. 48.

No. 16H. Wt. each, crated, 50 lbs. ..... Each **$40 00**

BICYCLES.

IVER JOHNSON.

These bicycles have double loop frames with oxidized silver name plates; color is maroon with green head and full nickeled crown; Morrow coaster brakes; 3/16 inch roller chains, 1 inch pitch.

LADIES' ROADSTER. MODEL 87L.

Height, 20 inches; wheels, 28 inches with steel rims, striped, Fisk cord tires 1¼ inch; gear, 68 (22 and 9); cranks, 6½ inches; rubber pedals; No. 92 handle bar with direct stem; No. 50 Diana saddle.
Model 87L. Wt. each, crated, 72 lbs. ..... Each **$55 00**

CAMP FIRE GIRLS'. MODEL 18L.

The same high quality and finish as the regular adults ladies' models only built on smaller lines to accommodate juvenile riders; the saddle post tubing is shortened while still retaining the long head making a smarter looking bicycle, and at the same time allows the growing girl to ride it several seasons without the appearance of having outgrown it. Height, 16 inches; wheels, 26 inches, with steel rims, striped; Fisk juvenile tires; gear, 64 (22 and 9); cranks, 5½ inches; juvenile rubber pedals; No. 62, 18-inch handle bar with direct stem; No. 49 Princess saddle.
Model 18L. Wt. each, crated, 50 lbs. ..... Each **$45 00**

CAMP FIRE GIRLS' JUNIOR. MODEL 16L.

Same as Model 18L only smaller, of the same high class quality and finish as the full sized ladies' models. The frame is constructed with the saddle post tubing two inches lower than ordinarily used, and still retaining the long head. This makes a more classy looking bicycle, and one which allows a wide range of saddle adjustments to varying ages. Thus a growing child is still able to use the same machine, by simply raising the saddle, without the appearance of having outgrown it.
Model 16L. Wt. each, crated, 50 lbs. ..... Each **$40 00**

RUBBER TIRES.

CALCUTT'S.

For Go-Carts, Baby Buggies, Hand Cars, Autos, Etc.

Showing end of tire with coupling pin held firmly in left hand after twisting other end of tire towards you 4 complete revolutions.

Showing tire back to natural position after you push together and screw from you by turning to the right. Note—No kinks or twists, ready to apply

One in a crate, knocked down.

No. 166—Federal-Knight All-Steel Dump Truck.

Size of chassis, 12x42 inches; length overall, 52½ inches; finish—body, hood and seat, red, striped and decorated in yellow and black; fenders black; equipment—rear spring gear with bumper; two-piece adjustable pedals; cast steering wheel with gas lever; Knight radiator cap; front fenders with running boards; instrument board; large horn; dump bed, size 13x17x5 inches, operated by handle beside the driver's seat; seat pad; steel bar radiator guard. Disc wheels, 10x1 inches, rubber tired.

No. 166. Ship. wt., 90 lbs...Each **$27 00**

One in a crate, knocked down.

RADIATOR CAPS

DE-LUXE
FOR FORD CARS

Heavy cast metal; nickel plated, highly polished. Sleeve of cap entirely covers the filler neck no drilling is necessary to install a motometer or ornament. Designed to fit all original Ford radiators. Adjustable feature which always places the ball arm of cap parallel to front of radiator, this eliminates the necessity of filing the cap or filler neck in order to obtain the correct position. Height 1½ inches; length 6½ inches.

	Each
No. A-92—Wt, each 1 lb.	2 40 *$1 25*

One in cardboard box.

DE-LUXE-LOCK CAP
FOR FORD CARS

Heavy cast metal, nickel plated and polished. Sleeve of cap entirely covers radiator neck. No drilling necessary to install motometer or ornament. Adjustable feature always places ball arm of cap parallel to front of radiator and will not vibrate out of alignment. Equipped with neatly designed latch. Easily opened for filling radiator. Height 2½ inches; length 7 inches.

	Each
No. A-91—Wt, each 1 lb	4 05 *$2 00*

One in cardboard box.

WING

Heavy cast brass, heavily nickel plated; hexagon shaped cap. Removable bolt in top permits mounting of Moto-Meter. Length from tip to tip 9½ inches.

	Each
No. A-75—Fits Ford and Star cars.	$2 70
No. A-76—Fits Chevrolet, Star and 1924 Oldsmobile	2 70

One in cardboard box; wt each 1 lb.

SUPERB

Brass, nickel plated, highly polished. No. A-9A fits Ford and Gray cars. No. A-10A fits Chevrolet, Star, Essex and Oldsmobile cars.

BOYCE, Universal Model without Special Name Plate.

Each

No. A-9UM—Wt each 12 ozs. 15 75 *$7 50*

One in cardboard box.

BOYCE, Standard Model.

A perfect heat indicating instrument of the highest type. Because of its perfection of workmanship, this model has been selected as regular equipment on many of the leading cars. Nickel plated. Has a retaining ring embossed in laurel wreath design and a gold dial with hand lettering denoting various operating conditions of motor.

Each

No. A-6NSM—Diam 3⅜ ins; height over all 5⅛ ins. 21 00 *$10 00*

One in cardboard box; wt each 1¼ lbs.

BOYCE, Distance Type.

Nickel plated case, beveled crystal; black dial with black figures; red and white pointer. Equipped with new type bulb which is inserted through a hole in the rubber hose connection and tightened down on a lock nut. Diameter 2⅛ inches.

MODEL H, For Dashboard Mounting.

Fitted with adjustable clamp which insures a tight fit regardless of the thickness of dashboard.

Especially designed for engineering work where accuracy tests of actual water temperature in degrees are required. Complete with 5 feet cord and instructions for mounting.

Each

No. A-H—Wt each 1¼ lbs. 21 00 *$10 00*

MODEL S, For Steering Column Mounting.

Provided with an attractively designed bracket which clamps around steering post of practically all makes of cars, holding it firmly in place and in full view of driver.

Especially designed for test work, where the thermo-syphon system of coaling is employed. Complete with 7 feet of tubing.

Each

No. A-S—Wt each 1¾ lbs. 26 25

One in cardboard box. $12 50

MOTO-METER LOCKS

SCHLAICH'S, UNIVERSAL MODELS

Approved by the Moto-Meter Co.

Consists of nozzle, channel bar and chain lock nut, all solid brass; the nozzle being connected to channel bar by steel galvanized chain, making the entire device impervious to rust.

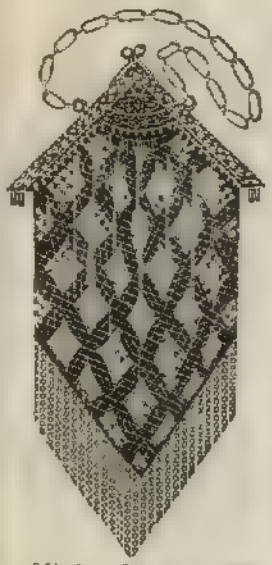
Silver Plated Fish Scale Enameled Mesh Bags

New Color Combinations

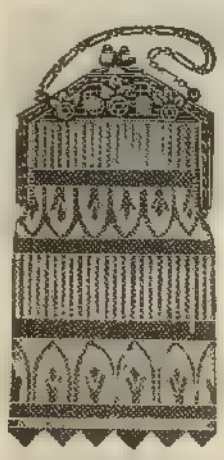


3½ in. frame, length 5½ in., combination of red and white enameled links, silver plated on solid nickel silver, gray finish frame, unlined
No. 85J301. Each.. 2.15

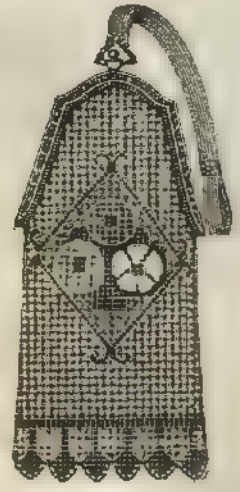
3 in. frame, length 5 in. combination light blue and gold mesh, gilt frame, unlined
No. 85J302. Each.. 2.15

3 in. frame, length 6½ in., combination pink, white and black enameled mesh. Gilt finish frame, unlined.
No. 85J304. Each.. 3.35

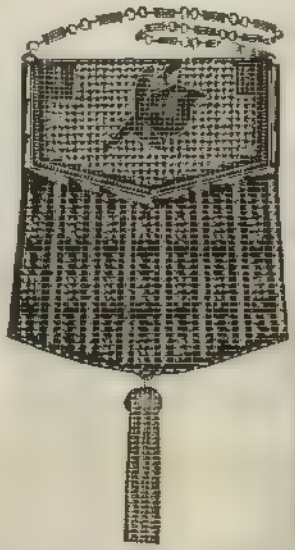
4¼ in. frame, length 6 in. combination pink and black on gray background; gold finished mesh and frame.
No. 85J305. Each.. 3.65



Mesh Bag, fine armor link chain, frame 3⅝ in. open work jeweled frame, set with 3 fine cut stones with the tapestry enameled in green and white, jeweled clasp. Gray satin lining.
No. 85J118. Each.. 4.25



3 in. frame, length 6 in. Roman gold mesh with 3 embossed raised colored flowers in center. Woven wire strap handle, fancy double fringe, enameled in colors.
No. 85J307. Each.. 5.00



4 in. frame, length 4½ in. combination of yellow, light blue, green and black mesh, silver plated on solid nickel silver, unlined. Enameled flower on top. Fancy fish scale tassel enameled in colors.
No. 85J308. Each.. 5.65

4¾ in. frame, length 6 inches. Combination of ivory and blue, both sides alike, gray silk lining, with double fancy enameled fringe. A rich and attractive number.
No. 85J309. Each.. 6.50

Silver Plated Fish Scale and Tapestry Mesh Bags

Will Not Unravel—New Color Combinations

4 in. frame, length 6½ in. French gray open work frame, set with three sapphire stones, blue and white combination mesh. Both sides enameled alike, with a double fancy fringe to match. Gray silk lining.

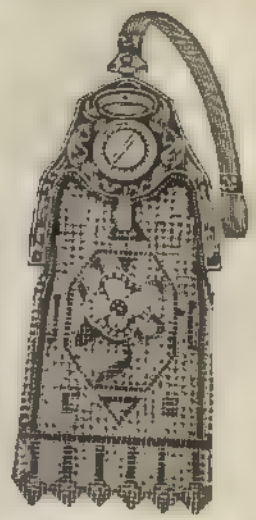
No. 85J119. Each.. 6.25

4¾ in. frame, length 6½ in. French gray open work frame, old rose silk lining, combination of ivory and rose design embossed in colors. Fancy double fringe. Both sides enameled alike. Sapphire stone catch.

No. 85J310. Each.. 7.25

3 in. frame, length 5 in. Silver plated silhouette vanity top, containing cigarette case, mirror, powder and rouge. Enameled mesh of blue, green and red combination with double fancy fringe to match.

No. 85J308. Each.. 7.75



3 in. frame, length 5½ in. Gold plated on solid nickel silver, contains vanity top for rouge and mirror. Roman gold mesh with embossed raised colored flower in center and green background. Fancy double fringe. Woven strap handle.

No. 85J311. Each.. 9.25

New Style Bag. 4 in. frame, length 7½ in. light blue, black, pink and green combination; rose gold finish frame and mesh. Reverse side plain unlined.

No. 85J318. Each.. 8.50

5½ in. frame, length 7¼ in. Roman gold finish on a tapestry design of gold and ivory colored mesh, gray silk lining, both sides alike. Woven strap handle.

No. 85J313. Each. 10.75

5 in. frame, length 6½ in. Containing powder vanity and mirror. Silver plated, enameled in black, green and lavender, fancy ring chain. Unlined.

No. 85J314. Each. 10.75

5¼ in. frame, length 7 in. Roman gold finish, stone set frame, open work design, gray silk lining. Enameled mesh in gold, rose and dark blue design. Double fancy fringe with woven strap handle.

No. 85J315. Each. 12.75

Mesh Bags

Staple Popular Designs That Are Always in Vogue

Mesh Bag, silver finish, fine armor link, **French gray frame,** cable link handle, 1½ in wide, 5½ in long
No. 85J67. Each.. **1.85**

Mesh Bag, fine armor link frame, open work design, cable link chain. Length 7½ inches, width 2½ inches.
No. 85J68. Each. **2.25**

Mesh Bag, silver plated, fine armor mesh, frame open work design, cable link chain. Width 2½ inches, length 5½ inches.
No. 85J69. Each **2.85**

Piccadilly Wire Mesh Bag, fine silver plated, length 7½ inches, with a small vanity attached to the top, by folding down a lever showing a mirror and powder puff enclosed.

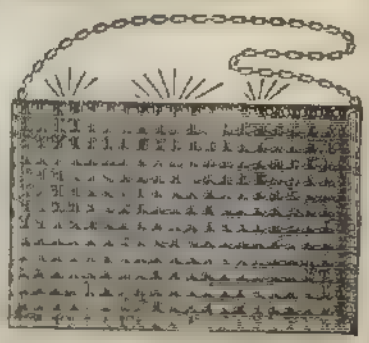
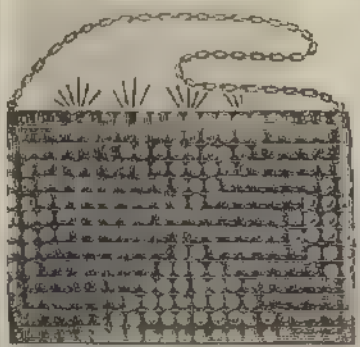
New Stone Set Evening Bags and Purses

White Evening Bag, set with first quality white stone brilliants German silver frame. Width 3¾ inches, length 4 inches. Silk lined.
No. 85J335. Each.. **3.65**

White Evening Purse, silk lined, closely set with fine white stone brilliants, contains mirror and change purse, snap fastener. Width 4½ in., length 3 in.
No. 85J336. Each **4.25**





Ladies' White Evening Purse, closely set in fancy design of imitation half pearls and fine white stone brilliants. Silk lining; bag contains mirror and change purse, snap fastener and chain handle. Width 4½ inches, length 3 inches.
No. 85J337. Each..... **3.75**

Ladies' White Evening Bag, center design set with imitation half pearls, and rhinestones closely set around border. Both sides alike, silk lining; chain handle. Length 4⅛ inches, width 3¾ inches.
No. 85J338. Each..... **9.50**

No. 85J339, same as above with mirror, length 4½ in., width 4¼ in. Each.. **12.25**

RADIO SETS

—OLD KENTUCKY HOME—

SEVEN TUBE SUPER NEUTRODYNE

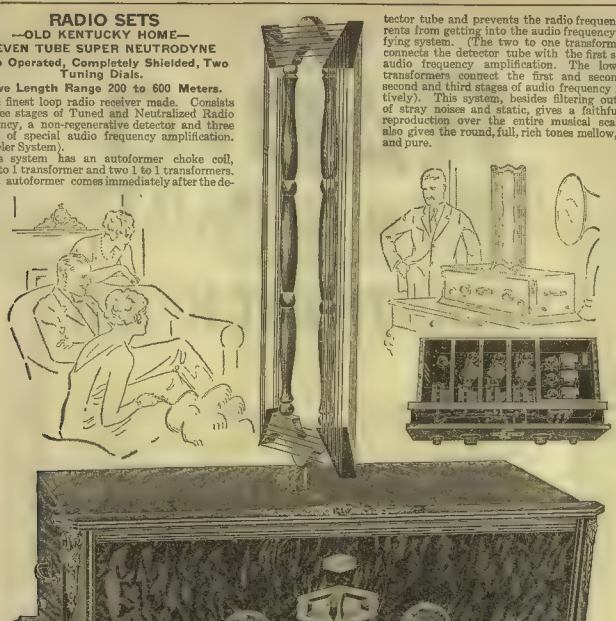
Loop Operated, Completely Shielded, Two Tuning Dials.

Wave Length Range 200 to 600 Meters.

The finest loop radio receiver made. Consists of three stages of Tuned and Neutralized Radio frequency, a non-regenerative detector and three stages of special audio frequency amplification. (Wheeler System).

This system has an autoformer choke coil, one 2 to 1 transformer and two 1 to 1 transformers.

The autoformer comes immediately after the detector tube and prevents the radio frequency currents from getting into the audio frequency amplifying system. (The two to one transformer also connects the detector tube with the first stage of audio frequency amplification. The low ratio transformers connect the first and second and second and third stages of audio frequency respectively). This system, besides filtering out a lot of stray noises and static, gives a faithful tone reproduction over the entire musical scale and also gives the round, full, rich tones mellow, sweet and pure.



Has the Hazeltine Neutrodyne circuit. Designed primarily to operate on a directional loop. The supreme radio receiver in range, volume, selectivity and tone for the following reasons:

1. The extreme sensitivity of the Neutrodyne circuit.
2. SHIELDING: The entire receiver is complete shielded on all sides by heavy brass. This prevents any of the radio frequency coils (Neutroformers) from picking up any signals whatever, and makes the loop the only part of the receiver to pick up any signals. (In this way stray and undesired signals, picked up by ordinary receivers are eliminated). In addition each stage of radio frequency and the detector stage is completely shielded by heavy brass from the rest of the set. Coupling between the magnetic fields of the various stages or radio frequency and the detector is therefore impossible. This internal and external shielding, therefore, clarifies the signals, increases the selectivity of the receiver and actually increases the distance over which satisfactory reception can be had.
3. The quality of the materials out of which the receiver is made.
4. The extreme care used in neutralizing, coupling and balancing each receiver. It is strictly a hand made job.
5. The three stages of tuned and neutralizing radio frequency.
6. The Wheeler system of audio frequency amplification.

(Continued)

RADIO SETS

—OLD KENTUCKY HOME—

SEVEN TUBE SUPER NEUTRODYNE

The incomparable distance to which this receiver will reach out **in all directions** and the tremendous volume of undistorted sound that it will deliver, are due to the six reasons mentioned above and to the directional effect of the loop. A loop or other antenna is always most sensitive in direction in which it is pointed. No matter what direction the station is located, the loop can be pointed directly at it and so both the loop and receiver placed in the most sensitive possible conditon.

The extraordinary selectivity of the receiver is due first to the loop and secondly to the design and thirdly, to the extreme care used in neutralizing, coupling, balancing and filtering each receiver.

The local broadcasting stations cover but a few points on the dial. By means of the loop either one of two stations exactly the same wave lengths can be brought in and the other one tuned out provided they are not in the same general direction or in opposite directions. Has no whistle like that of a Regenerative or Heterodyne Circuit.

This receiver having no harmonics will bring in any station at only one setting of the dials.

The left hand rheostat controls the filament current of the first stage of radio frequency amplification and should be used to regulate the volume of the receiver. The right hand rheostat controls the filament of the detector tubes only. Length 31 ins; depth 17 ins; height 15 ins.

Cabinet and panel of metal in grained walnut finish.
Dials of bakelite in the same finish. Trimmings of cabinet, panel and dials Roman Gold.

Radio has been developed until it is now a wonderful source of entertainment and also gives command of the news of the world each day. Every home can now afford a radio set as the experiment stage is over. Sets have reached a high state of development.

RADIO SETS

—OLD KENTUCKY HOME—SIX TUBE SUPER NEUTRODYNE

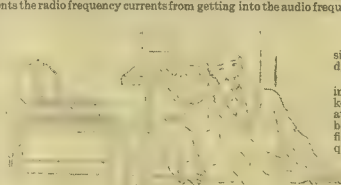
Outdoor Antenna Type. Wave Length Range 200 to 600 Meters.

The finest receiver made to operate on an outdoor antenna. Consists of two stages of tuned and Neutralized Radio Frequency, a non-regenerative detector, and three stages of special Audio Frequency amplification (Wheeler system).

This system has an autoformer choke coil, one 2 to 1 transformer and two 1 to 1 transformers. The autoformer comes immediately after the detector tube and prevents the radio frequency currents from getting into the audio frequency amplifying system.

The two to one transformer also connects the detector tube with the first stage of audio frequency amplification. The low ratio transformers connects the first and second and second and third stages of audio frequency respectively. This system besides filtering out a lot of stray noises and static, gives faithful tone reproduction over the entire musical scale and also gives the round, full, rich tones, mellow, sweet and pure. Has the Hazeltine Neutrodyne Circuit.

Will operate satisfactorily only on an outside antenna and best on one of about fifty feet in length. The finest radio receiver made to operate on an outdoor antenna in range, volume, selectivity and tone for the following five reasons.



1. The extreme sensitivity of the Neutrodyne Circuit.
2. The size of the cabinet. The stages are kept sufficiently separated to prevent coupling between the magnetic fields of the radio frequency coils.
3. The quality of the materials out of which the receiver is made.

4. The extreme care used in neutralizing, coupling and balancing each receiver. It is strictly a hand made job
5. The Wheeler system of Audio Frequency amplification.

The incomparable distances to which this receiver will reach out and the tremendous volume of undistorted sound that it will deliver are due to the five reasons mentioned above.

The extraordinary selectivity of the receiver is due, first, to the design and secondly, to the extreme care used in neutralizing, coupling, balancing and filtering each receiver. The local broadcasting stations cover but a few points on the dial. This receiver has no whistle like that of a regenerative or Hetrodyne circuit.

Settings of the three dials are always the same for any given station. After station has been brought in, it is merely necessary to note the settings of the dials. If the dials are set at the same point again it is merely necessary to throw on the filament switch and turn the rheostat until the tubes are lighted to the proper intensity to bring in the station, if it is broadcasting.

The left hand rheostat controls the filament current of the first stage of radio frequency amplification and should be used to regulate the volume of the receiver. The right hand rheostat controls the filament of the detector tube only

Cabinet is beautiful walnut with border of inlaid work. Panel and dials are genuine Bakelite. Length 33 ins, depth 12 ins height 11 ins.

PRIESS STRAIGHT "9" NINE

Radio Receiving Sets

A Nine Tube Loop Operated Receiver, Designed for Congested Districts and Places where Interference Causes Dissatisfaction with the Ordinary Set.

The New Priess Straight "9" is the Crowning Achievement of Many Years' Specializing in the Design of Loop Receivers. Made in Both Table and Console Models.

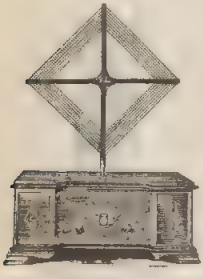

TABLE MODEL

The Set Contains Three Tuned Radio, Three Untuned Radio, Detector and Two Audio-in All, Nine Tubes. If Desired, Power Tube can be Used in the Last Audio Stage and the New 200-A Detector.

The Set has a Single Dial Control, Direct Reading Wave Length, Illuminated Dial and a Range from 203 to 555 Meters.

Straight-line, Wave Length Condenser with Exaggerated Spacing on Shortest Wave Lengths. Great Sensitivity and Distance on Loop Alone. Selectivity of Three-tuned Circuits Shock Mounted Last Radio Tube and Detector Tube Shell Shielded. Illuminated Dial. No-play Vernier Drive on Main Tuning. All Primary Parts of Set Designed and Built at Priess Plant.

Table Model Priess Straight "9" Nine Set in Handsome Figured Mahogany Cabinet of Simple and Graceful Design. Top Mounted Collapsible Bakelite Loop.

Intended Retail Price

No. PR9 ..... $195.00

CONSOLE MODEL

The Set Contains Three Tuned Radio, Three Untuned Radio, Detector and Two Audio-in All, Nine Tubes. If Desired, Power Tube can be Used in the Last Audio Stage and the New 200-A Detector. The Set has a Single Dial Control, Direct Reading Wave Length, Illuminated Dial and a Range from 203 to 555 Meters.

Straight-line, Wave Length Condenser with Exaggerated Spacing on Shortest Wave Lengths. Great Sensitivity and Distance on Loop Alone. Selectivity of Three-tuned Circuits. Shock Mounted Last Radio Tube and Detector Tube. Shell Shielded Illuminated Dial. No-play Vernier Drive on Main Tuning. All Primary Parts of Set Designed and Built at Priess Plant.

Console Model Priess Straight "9" Nine. A Two-tone, Figured Walnut Console Cabinet, Splendidly Proportioned; Loop Inclosed, Front Operated Switching Mechanism and Plug System for A. C. Equipment; Built-in Cone Speaker; Ample Space for Batteries; Full Enclosure of All Mechanism when Not Being Operated, Giving Very Charming Appearance to Cabinet. Complete Magnetic Shield Between A. C. Accessories Compartment and Set. No Inter-action Between Loop and Set.

Intended Retail Price

No. PR10—Without Accessories..... $335.00

PRIESS STRAIGHT-8-EIGHT RADIO RECEIVING SETS

TABLE MODEL

The Priess Straight Eight was built and designed primarily for great distance reception, and easy control as it has but one tuning knob.

A New Patented principle in Radio design is used that gives The Priess Straight Eight a greater energy amplification before the detector than any other set.

Here are the distinctive features:

Loop operated,
Eight tubes,
5 stages of radio frequency, before the detector.
Single tuning control with visible wave length indicator graduated in one meter divisions,
Tunes in a station only on one point—no harmonics,
No locally manufactured static from oscillating tubes,
Sensitivity control,
Volume control,
One control for filament and cutting in or out audio stages,
Natural quality—no regeneration,
Not critical as to tubes used.
A two tone inlaid, Mahogany Cabinet with battery compartments on each side. Equipped with patented collapsible all bakelite, low loss loop.

Intended Retail Price

No. PR4 Table Model—With Loop, but without Tubes, Batteries, or Speaker..... $175.00

CONSOLE MODEL →

Essentially the same as the Table Model in engineering design, embodying the same features, viz.:
Loop operated. Eight tubes,
5 stages of radio frequency, before the detector,
Single tuning control with visible wave length indicator graduated in one meter divisions,
Tunes in a station only on one point—no harmonics,
No locally manufactured static from oscillating tubes,
Sensitivity control,
Volume control,
One control for filament and cutting in or out audio stages,
Natural quality—no regeneration,
Not critical as to tubes used.
A handsome two-tone, inlaid, Walnut Console Cabinet with built-in loud speaker, enclosed loop rotated by a knob on the panel and ample size compartment for all batteries.

Intended Retail Price

No. PR5 Console Model—With Enclosed Loop and Loud Speaker, but without Tubes or Batteries... $285.00

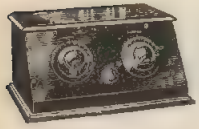
No. PR5

CHELSEA RADIO

CHELSEA RADIO Has Been Known for Many Years to the Radio Fan, in Fact, Long Before the Advent of Broadcasting. They Have Been Real Pioneers in the Industry and Have Devoted Their Entire Time and Means to the Production of a Thoroughly Good Line of Receiving Sets at a Low Price. All Instruments are Thoroughly Shielded According to Latest Engineering Practice and in Handsome Cabinets That Will Add a Touch of Beauty to Any Home.

"CHELSEA Material Always Was and Always Will be Guaranteed"

The New Chelsea Three Tube Receiver



An Outstanding Radio Value—a 3-Tube Set, with Beautiful Piano-Finish Mahogany Cabinet, Panel and Large Dials for Easy Tuning. Utilizes the Genuine Armstrong Circuit—the Basic Principle of all Radio Reception. Operates on All Standard Tubes and Battery Equipment. Provided with Heavy Cord Connection Leads. (No Unsightly Binding Posts). The Only 3-Tube Receiver with Dust-Proof, Fool-Proof Panel Inside Protecting the "Vitals." This New Chelsea Possesses Remarkable Selectivity Yet is Very Easy to Operate. For Distance and Volume, it Surpasses Many Sets Much Higher in Price.

Intended Retail Price Each

No. 140—(3-Tube Set). **$26.00**

The New and Improved Chelsea Super-Five

Great Beauty, Easy Operation and a Finer Quality of Reproduction than Ever Before—These Most Vital Factors are Yours in the New 1927 CHELSEA Super-Five. Retaining All Features Such as the Tuned Radio Frequency Circuit, Rugged Buswiring with Hand-Soldered Connections, Fool-Proof, Dust-Proof Inside Panel, Convenient Cord Leads for Making all Connections, etc. —the new Super-Five is Housed in a Beautiful Two-Tone Mahogany Finished Cabinet, an Ornament to the Finest Home, with Window Indicators and an Improved Switch with Silver Contacts. Chelsea Engineering has Concentrated on Making the Tuning so Extremely Easy that Anyone May Now Enjoy the Ever-Increasing Wonders of Radio. No Sacrifice to All Round Efficiency Has Been Allowed in a Single Detail. The Ultimate of Selectivity is Retained.

CHELSEA has Built into the New Super-Five a Working Mechanism that Re-Creates Programs Clearly and Sweetly with Full Tone.

Intended Retail Price Each

No. 125—(5-Tube Set)..... **$50.00**

The Chelsea Truphonic Six

The Chelsea Truphonic-Six Employs the Revolutionary Truphonic Circuit. Now Introduced to the Public for the First Time, the Truphonic Circuit utilizes an Entirely New System of Audio Amplification, Obtaining Maximum Power Without a Trace of Distortion.

CHELSEA TRUPHONIC SIX is Housed in a Beautiful Two-Tone Mahogany Finished Cabinet, with Window Indicators and an Improved Switch with Silver Contacts It Greatly Enhances the Appearance of Any Room. The Circuit is Fully Shielded and is Protected by a Dust-Proof, Fool-Proof Inside Panel. Only Rugged Bus Wiring is Used. Every Connection is Hand-Soldered. Convenient Cord Leads of Ample Length for Making Connections to Antenna Ground and Batteries are Furnished.

Far Greater Stability and Far Greater Breadth and Depth of Tone is Obtained Than with the Ordinary Receiver. You are Able to Secure the Utmost in Performance from the Loud Speaker, Such Performing Capabilities as the TRUPHONIC Offers Are Not Usually, if Ever, Found in a Receiver Selling Under $100.

Intended Retail Price Each

No. 128—(6-Tube Set). **$60.00**

MARATHON

LONG DISTANCE

RADIO TUBES

For All Radio Circuits, Whether Simple or Complex, These Tubes are Unexcelled. Made to the Closest Tolerances Known in the Industry and Unconditionally Guaranteed, They Assure Complete Satisfaction. For Securing Distance, Clarity and Tone Quality of Radio Reception Marathon Tubes Cannot be Equalled.

For Storage Battery Operation

Adapted for Use as Detector or for Radio or Audio Frequency Amplification Tube of One Quarter Ampere operating on a Six Volt Current Supply with Five Volts Filament Terminal Voltage, and Operates as a Detector Tube with Forty-Five Volts on the Plate, and for Audio Amplifying Purposes with Ninety to One Hundred Thirty-Five Volts upon the Plate.

No. MX 201A

Intended Retail Price Each	Dealer's Prices Lots of 1 to 24	Lots of 25 or more
$4.00		

A Power Tube, of One Half Ampere Capacity Operating on Six Volts of Current Supply with Five Volts of Filament Terminal Voltage, and is for Use in the Last Stage Audio Amplifier Usually About One Hundred Thirty-Five Volts on Plate.

No. MX 112

Intended Retail Price Each	Dealer's Prices Lots of 1 to 24	Lots of 25 or more
$4.50		

A Power Tube of One Half Ampere Capacity, Operating from Six Volts of Current Supply with a Filament Terminal Voltage of Five Volts Ninety Volts of B Battery is Recommended for General Use. Two Hundred Volts may be Used. Provided Additional C Battery is Inserted to Take Care of Grid Bias. With 90 Volts of B Battery Use 1½ Volts of C, with 135 Volts of B Use 1½ Volts of C with 180 Volts of B Use 2½ Volts of C

No. MX 171

Intended Retail Price Each	Dealer's Prices Lots of 1 to 24	Lots of 25 or more
$4.50		

Strictly a Detector Tube. It is of One Quarter Ampere Capacity, Operates From an A Battery Current of Six Volts with a Five Volts Filament Terminal Voltage and is Recommended for Detector purposes with Forty-Five Volts of B Battery. This is a Dandy Tube and Slightly More Critical than the No 201A Type, But Gives Much Better and More Pleasing Signals on Both Local and Distance Stations

No. MX 200A

Intended Retail Price Each	Dealer's Prices Lots of 1 to 24	Lots of 25 or more
$4.00		

For Dry Cell Operation

This is a Tube for Dry Cell Operation, Having a Current Consumption of Six One Hundredths Amperes, Operating on Four and One Half Volts A Battery Supply, with three Volts Filament Terminal Voltage Operates as a Detector with Forty Five Volts on Plate and as Amplifier with Ninety Volts on Plate. The Different Bases Make this Tube Adaptable to Most Makes of Sockets.

No. MV 199 (Small Base)

Intended Retail Price Each	Dealer's Prices Lots of 1 to 24	Lots of 25 or more
$2.25		

This is a Tube for Dry Cell Operation, Having a Current Consumption of Six One Hundredths Amperes, Operating on Four and One Half Volts A Battery Supply with Three Volts Filament Terminal Voltage Operates as a Detector with Forty-Five Volts on Plate and as Amplifier with Ninety Volts on Plate. The Different Bases Make this Tube Adaptable to Most Makes of Sockets

No. MV 199 (Large Base)

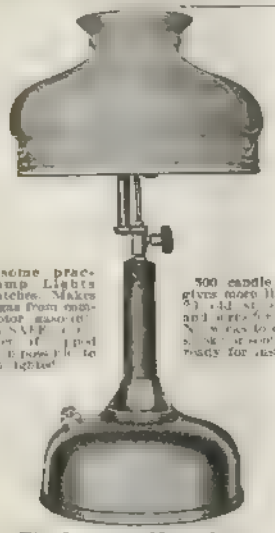
Coleman Quick-Lite

NATIONALLY ADVERTISED **GASOLINE LAMPS AND LANTERNS** NATIONALLY ADVERTISED

Favorites the country over for their (1) Brilliance (2) Convenience (3) Economy (4) Safety (5) Utility.

"It's the light they give that sells them"

The Famous "Quick-Lite" Table Lamps



A handsome practical lamp. Lights with matches. Makes its own gas from common motor gasoline. And is SAFE as split kerosene lamps. Always ready for instant use.

500 candle power—gives more light than 5 old style lamps and burns for hours. No wicks to clean or trim. Always ready for instant use.

The four lamps listed below are exactly the same as the standard model illustrated at the left—except the shades.

2C1006—Complete lamp, 10 in. opal shade. Each **$6.50**

2C2846—(Mfrs C32) With 9 in. burner (three-quarter frosted globe. Each **$6.50**

2C2835—(Mfrs C307) 10 in. opal shade. Each **$6.25**
2C2909—Opal shade. Doz **$7.75**

11¼ in. shade, hand-painted foliage designs. Mfrs Shade
2C2832—C316 Tan
2C2834—C334 Green. Each **$7.00**

The Standard Model Lamp

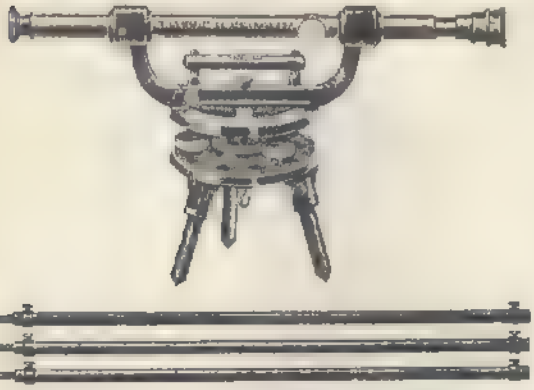
LEVELING INSTRUMENTS

STARRETT



For Attaining Angles in Horizontal Plane Only

For contractors, farmers, masons, etc. Light weight and has a wide range of work

The upper plate is connected to the tripod head by a ball and socket joint, and is leveled by the leveling screws. This plate is recessed to contain a graduated arc for taking angles, and on the plate is the frame with level and sight tube for taking horizontal angles only. The nickel plated sight tube on this instrument is plain, with no lenses, 12 in. long, with small eye aperture and the usual cross wires.

	Each
No. 101A—With Plain Sight Tube, Long Legs and Plain Level Vial	$15.00
No. 101B—With Plain Sight Tube, Long Legs and Ground Level Vial	16.75
No. 101C—With Telescope, Long Legs and Ground Level Vial	25.00
Iron Target—Without Pole	1.50

STARRETT TRANSIT

Furnished in Wood Carrying Case

The instrument is composed of iron and brass, and consists of a tripod, to the head of which is connected by a ball-and-socket joint an upper plate which can be leveled by the leveling screws.

The plate is recessed to contain a graduated arc for taking horizontal angles. This arc is ½ of a circumference, reading 90° each side of 0, and being independent of level and sight tube can be turned and used at any point of a complete circle. On this plate rests a triangular frame to which are attached a level, a graduated arc for taking vertical angles, graduated 45° each side of 0, and a sight tube. The plain sight tube has no lenses, is brass, 12 in. long, in one end is a small eye aperture, in the other the usual cross wires

The telescope has cross lines, is adjustable to distances, and is same size and length as plain sight tube. The lens is well protected from dirt and breakage by a friction cap, and a shutter for the eye aperture.

With short legs, as shown in the cut, the instrument is 8 in. high. With long extension legs, which fasten on over the short legs, the height can be adjusted from 2 ft. 8 in. to 4 ft. 8 in. The sight tube, level case, and graduated arcs are nickel plated, the other parts are japanned.

	Each
No. 99B—With Plain Sight Tube, Long Legs and Plain Level Vial	$20.00
No. 99F—With Telescope, Long Legs and Ground Level Vial	40 00
Iron Target—Without Pole	1 50

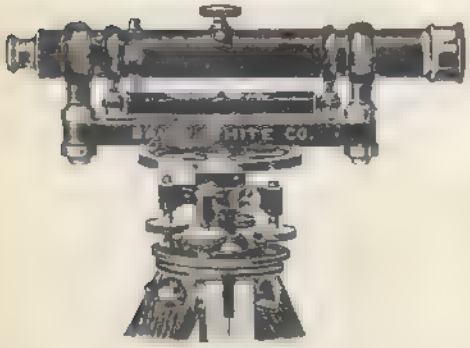
For Contractors, Road Builders and Farmers

The sturdiest, most compact, and most practical instruments of its kind ever put on the market. It has a 10 in. telescope with adjustable eye piece, fixed cross hairs, ten diameter achromatic lens system, horizontal circle graduated to degrees, index arm, four leveling screws and spirit level.

	Each
No. 2050—Complete Equipment Including Carrying Case, Tripod, Plumb Bob, 12½ ft. Flexible Rod, and a Book of Instructions, Weight Each 14 Lbs.	$25 00

LEVELING INSTRUMENTS

WHITE CONTRACTORS DUMPY LEVEL



No. 2038

These instruments will be found very serviceable for Millwrights, Architects Mason Contractors and Builders, also for Drainage Contractors for tile draining and other operations where lines are to be run with stations but a short distance apart.

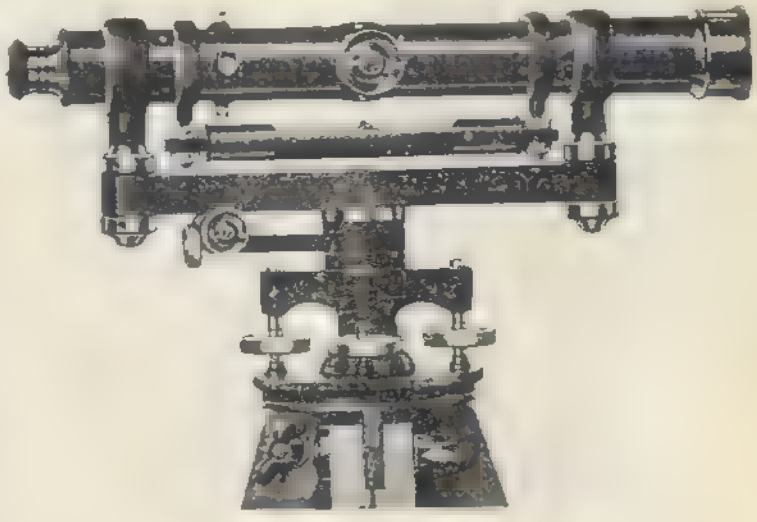
Especially designed to meet the growing demand for a level selling at a moderate price, but still possessing the essential characteristics of the higher priced "Y" level. The telescope is 12 inches long with magnifying power 25 diameters. Aperture of objective lens 1¼ inches. Horizontal circle 4½ inches in diameter and graduated from 0 to 90 degrees each way, with vernier reading to 5 minutes. The circle can be set at zero at any given point. Center extra long and well tapered, and made of hard bell metal. Telescope of fine definition, and the objective lens is focused by rack and pinion of improved make. Improved eye-piece for precise focusing of the cross-hairs. Telescope yokes of best composition metal permanently fixed, thus insuring greater stability This instrument unlike the "Y" level, has very few adjustments and when once adjusted it stays adjusted a longer period of time Tripod is made of best seasoned hardwood A metal trivet having three sharp points, for placing the level on any surface of wood or stone, is furnished with each instrument Level vial is extra long, carefully ground and graduated on the glass Instrument packed erect ready for use in polished hardwood box with strap containing full directions for use together with screw capped plumb bob, sun shade, dust cap and adjusting pins

	Each
No. 2038—Complete with Tripod, Case and Accessories Weight 28 Lbs.	**$65.00**
No. 2039—Same as No 2038 with the Exception that it is Provided with a Clamp and Tangent Movement thus Enabling the Instrument to be Clamped More Securely and a Movement in the horizontal Plane to be Made More Accurately	**70.00**

WHITE ROAD BUILDERS LEVEL

This recently designed Instrument has instantly met with the approval of road builders throughout the United States and Canada and is without exception the finest Level of its class on the market.

The telescope is 12 inches long with magnifying power 25 diameters. Aperture of objective lens 1¼ inches. Center extra long and well tapered and made of hard bell metal. Telescope of fine definition, objective lens focused by rack and pinion of improved make. Improved eye-piece for precise focusing of the cross-hairs. Telescope yokes of the best composition metal, permanently fixed, thus insuring great stability. This instrument, unlike the "Y" level, has very few adjustments and when once adjusted stays adjusted a long period of time. Tripod is made of best seasoned hardwood. A metal trivet having three sharp points, for placing the level on any surface of wood or stone, furnished with each instrument. Level vial is extra long, carefully ground and graduated on the glass. Instrument packed erect, ready for use, in polished hardwood box with strap, containing full directions for use, together with screw capped plumb bob, sun shade, dust cap and adjusting pins



No. 2035

	Each
No. 2035—Complete with Tripod, Case and Accessories, Weight 28 Lbs.	**$60.00**

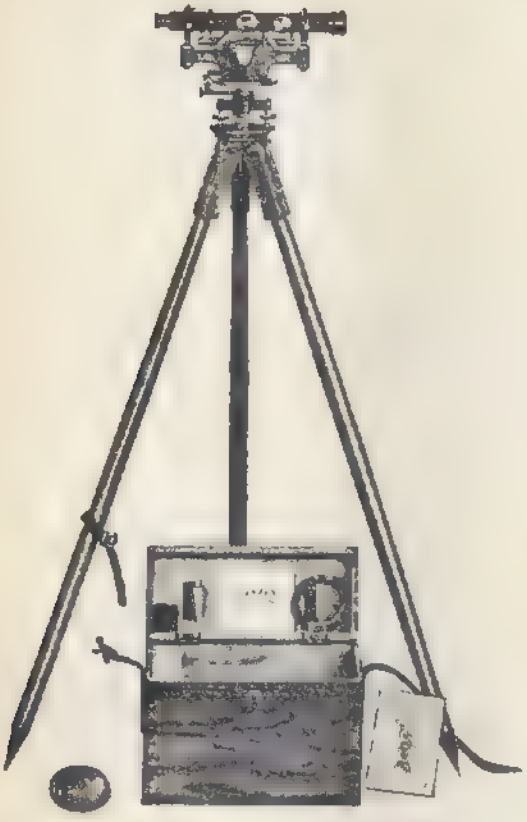
LEVELING INSTRUMENTS

WHITE IMPROVED CONVERTIBLE



No. 2020.

The "White" Convertible Level, a combination Level and Transit, is an instrument indispensible for the speedy and accurate performance of every known building operation. It is especially recommended to Architects, Contractors and Builders, Millwrights and Drainage Engineers, Mason Contractors and Landscape Gardeners, Grading Contractors and Road Engineers.

Telescope—12 in. long with dust shade. Magnifying power 25 diameters showing objects erect. Object glass 1¼ in. aperture, rack and pinion movement to object slide, spiral movement to eye-piece. Cross hairs, sun-shade and dust-cap. Range 5 feet to one mile. Lenses of finest quality, level to telescope 4 in. long, housed in tube with protection bridge, graduated on the glass and ground to a sensitiveness of 60 sec. of arc to 1/10 in. motion of bubble.

Cross-Bar and Wyes—Cross-bar and standards are cast integral and heavily ribbed and strengthened. Wyes (one of which is adjustable) are of improved design with lock-nuts for locking yokes, dispensing with old style pin bolts. One wye yoke is provided with stop insuring true position of cross-hairs when leveling. Cross-bar and standards are constructed of steel-like bell metal. Convertible standards provided with two brass straps which hold telescope firmly in the trunnions when in transit position.

Circle—4½ in. diameter with eight reinforced spokes, divided to degrees numbered 0—90 in quadrants and reading by vernier to 5 minutes. Circle is movable for the purpose of setting same at zero at any given point and provided with a set-screw

Leveling-Head—Improved design, heavily ribbed, with clamp and tangent screw. Four leveling screws with shoes. Center extra long and constructed of hard bell-metal. Shifting center.

Regular Equipment—Solid leg tripod with iron shoes and protection cap to head. Bolts provided with wing nuts for tightening by hand. Polished hardwood carrying case with strong lock and strap. Six-ounce plumb-bob, trivit (for foundation work), sun-shade, and adjustable pins. Full instructions for use with each level

Finish and Weight—Instrument is finished in rich olive alligatorite with small parts in bright gold, making a very tasty and durable finish.

Special Features of White Improved Convertible Levels

(1) The cross-bar is drop-centered and cast integral with standards. (Patented.)

(2) Spirit level glass always rests safely below telescope out of harm's way, whether used as level or transit.

(3) No loose attachments to fasten on by means of thumb screws. Nothing to get out of order or adjustment. Always accurate. Always dependable.

(4) Extra fine and powerful telescope (25 diameter power). Extra large objective lens (1¼ in. aperture). Extra long telescope (12 in.)

(5) Only ten seconds are required to change instrument from an accurate level to an equally accurate transit. Standards, which accommodate telescope when in transit position, do not interfere when instrument is used as a level; in fact, they serve as a protection to spirit level glass.

(6) Shifting center

	Each
No. 2020—Complete with Tripod, Case and Accessories, Weight 15 Lbs....	$ 95 00
No. 2021—Same as No. 2020, but with Vertical Arc Divided to Degrees Numbered 0—40 Each Way and Reading by Vernier to 5 Minutes....	105 00

In Place of Regular Equipment, Both Levels, No. 2020 and No. 2021, May be Furnished with the Following Options:

(A) Compass attached to instrument, of suitable accuracy for building work.
(B) Heavy split leg tripod in place of regular solid leg tripod.
(C) Heavy extension leg tripod, in place of regular solid leg tripod.
(E) Fixed stadia hairs reading 1 foot in 100 feet on any rod

THICK OVERLAY OF PURE SILVER
Extra Silver Overlay Reinforcement Under Bowl

THE EMPRESS PATTERN

THE Empress pattern correctly expresses the artistry of those stirring Napoleonic days of splendor, when the radiant Josephine and the proudly beautiful Maria Louisa were successive Empresses of France. Its slender lines, dainty symmetry and exquisite ornamentation reveal the master designer's interpretation of the vogue of that period.

The "Empress" adds charm to hospitality and assures an element of artistic importance to the table setting of any dining room, resulting in that deeper, truer satisfaction so essential in the choice of table silverware.

"Not Solid Silver but the Nearest Ware to it."

UNIVERSAL Silver Overlaid Table Service is made by overlaying upon a solid nickel silver base a heavy reinforced plate of pure silver. On parts exposed to hardest wear, an extra plate of silver is overlaid, thus assuring a lifetime of satisfactory service.

All UNIVERSAL Silver Overlaid Hollow Handle Cutlery pieces have blades of Resistain stainless Steel which is a patented and exclusive UNIVERSAL product that will not rust, stain or turn black on the edges

AIR COMPRESSORS

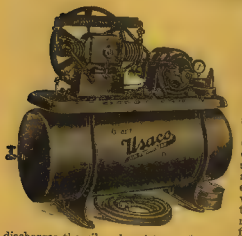
USACO TWO STAGE DE LUXE

The two stage feature greatly increases efficiency, reduces vibration to a minimum, prolongs life of outfit and makes compressor extremely quiet running. Filtering trap in base extracts moisture, assuring pure dry air. Cylinders and crank case are cast emblock, assuring perfect alignment of cylinders and avoids trouble of leaking oil.

High grade electric motors, particularly adapted for compressor service are used; direct current motors are compound wound; alternating current motors are repulsion induction type. Automatic pressure release prevents alternating current motor burning out when started against heavy load. Oiled by the splash method which provides oil at all times.

220 Volt motors are preferable for air compressor work.

GIANT DE LUXE



Particularly adapted for the gruelling service encountered in inflating giant truck tires; a service which it handles with remarkable speed and ability. Embodies all the desirable features described and consists of: compressor and motor mounted on metal base, with belt and belt tightener, automatic controller, filtering trap which discharges the oil and moisture, check valve, pressure gauge, (automatic pressure release on A. C. motors only); needle point valve, safety valve, 60 gallon tank tested to 400 lbs. pressure, suitable for pressure of 200 lbs., 25 feet of best air hose and automatic air chuck. Complete and ready to run when wired to electric circuit.

Capacity 5 cu. ft. per minute; cylinders low 3x3 in. and high 1¼x3 in.; diameter of pulley 18 ins; 1 H. P. motor; 400 R. P. M.; floor space 52x25x46 inches.

KELLOGG, TWO STAGE HEAVY DUTY, Stationary.

Copper intercooler enclosed in aluminum housing which confines the draft created by the fan blades. The air is delivered to the high pressure cylinder at a low temperature making a very efficient two stage compressor. Ball bearing construction insures a greatly increased efficiency and more air per horse power. Constant level lubrication, combined pump, and splash system eliminating oil from the air prolonging the life of compressor. Oil gauge in plain sight shows the amount of oil always in reservoir of pump. Vanadium steel disc valves positive in action increasing the compressor efficiency. Equipped with combined air filter and starting retort which insures dry air in storage tank providing easy starting of motor. Automatic self adjusting idler pulley keeps the proper tension on belt at all times. Complete with all equipment.

·1847 ROGERS BROS·

SILVERPLATE

"The best selling merchandise in the store"
—today as it has been for many years

The reason is easy to discover—a deserved reputation for Quality, that has met the supreme test—the test of time—backed by an absolute guarantee of satisfaction and by years of extensive and effective national advertising and sales promotion aid for the dealer.

The result is a remarkable turnover on a line that yields a very substantial profit on every sale.

Especially important is the fact that each design is made not alone in spoons, forks and knives but in the larger pieces as well—five-piece Tea Sets and the various articles that make up the Dinner Service and adorn the home.

In each pattern the Hollowware is designed, produced, plated and finished to match the Flatware

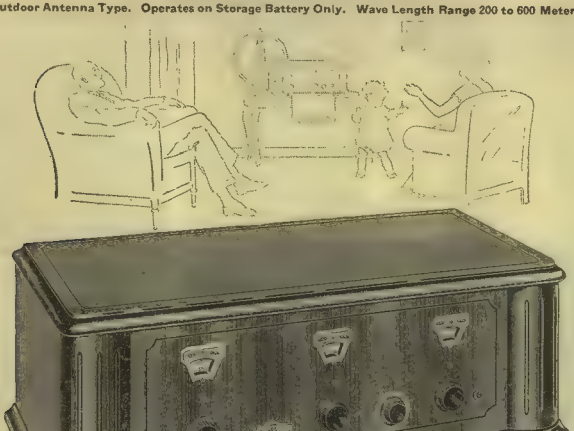
RADIO SETS

AMRAD FIVE TUBE NEUTRODYNE

Outdoor Antenna Type. Operates on Storage Battery Only. Wave Length Range 200 to 600 Meters.



Consists of two stages of Tuned and Neutralized Radio Frequency, a non-regenerative detector and two stages of transformer coupled audio frequency amplification. Has the Hazeltine Neutrodyne circuit.

Will operate satisfactorily only on an outside antenna and best on one of about fifty feet in length. Has good range, volume, selectivity and tone for the following reasons:

1. The extreme sensitivity of the Neutrodyne circuit.
2. The size of the cabinet. The stages are kept sufficiently separated to minimize coupling between the magnetic fields of the stages of radio frequency and the detector.
3. The receiver is made thruout of good materials.
4. The testing of the receiver both at the factory and here.

The local broadcasting stations can be tuned out and distant stations brought in without distortion while the local is on. The settings of the dials are always the same for any given station. After a station has been brought in it is merely necessary to note settings of the dials. If the dials are set at the same point again it is merely necessary to turn the rheostat until the tubes are lighted to the proper intensity to bring in the station if it is broadcasting.

This receiver, having no harmonics, will bring in any station at only one setting of the dials, unless the transmitting station itself is broadcasting on a harmonic. Has no whistle like that of a Regenerative or Hetrodyne Circuit.

Cabinet including the panel is finished in dull brown mahogany, hand rubbed. Dials are black Bakelite. All metal trimmings are Roman gold.

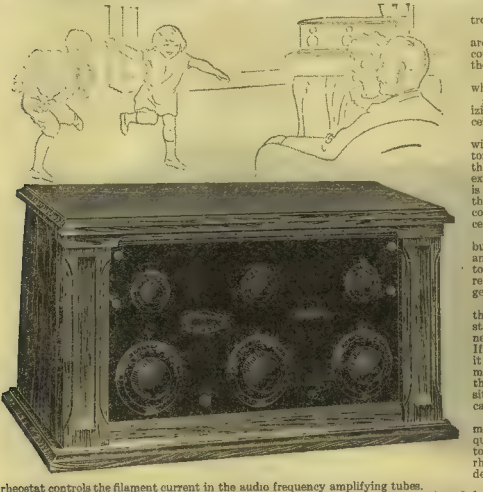
RADIO SETS

—OLD KENTUCKY HOME— FIVE TUBE SUPERIOR NEUTRODYNE

Outdoor Antenna Type. Wave length Range 200 to 600 Meters.

The finest five-tube radio receiver made. Consists of two stages of tuned and neutralized Radio frequency, a non-regenerative detector and two stages of transformer coupled audio frequency amplification.

Has the Hazeltine Neutrodyne circuit. Will operate satisfactorily only on an outside antenna and best on one of about fifty feet in length. The finest five-tubes radio receiver made in range, volume, selectivity and tone for the following reasons:



1. The extreme sensitivity of the Neutrodyne circuit.
2. The size of the cabinet. The stages are kept sufficiently separate to prevent coupling between the magnetic fields of the Radio Frequency and detector coils.
3. The quality of the materials out of which the receiver is made.
4. The extreme care used in neutralizing, coupling and balancing each receiver. It is strictly a hand made job.

The distances to which this receiver will reach out and the volume of undistorted sound that it will deliver, are due to the four reasons mentioned above. The extraordinary selectivity of the receiver is due, first to the design and secondly to the extreme care used in neutralizing, coupling, balancing and filtering each receiver.

The local broadcasting stations cover but a few points on the dial. The tone and the clearness of the receiver are due to the four causes mentioned above. This receiver has no whistle like that of a regenerative or hetrodyne circuit.

Settings of the three dials are always the same for any given station. After station has been brought in, it is merely necessary to note the settings of the dials. If the dials are set at the same point again it is merely necessary to throw on the filament switch and turn the rheostat until the tubes are lighted to the proper intensity to bring in the station if it is broadcasting.

The left hand rheostat controls the filament current of both stages of radio frequency amplification and should be used to regulate the volume. The middle rheostat controls the filament of the detector tube only. The right hand rheostat controls the filament current in the audio frequency amplifying tubes.

This receiver having no harmonics will bring in any station at only one setting of the dials. Cabinet is beautiful hardwood. Panel and dials are genuine Bakelite.

Length 23 inches; depth 14 inches; height 13 inches.

RADIO SETS

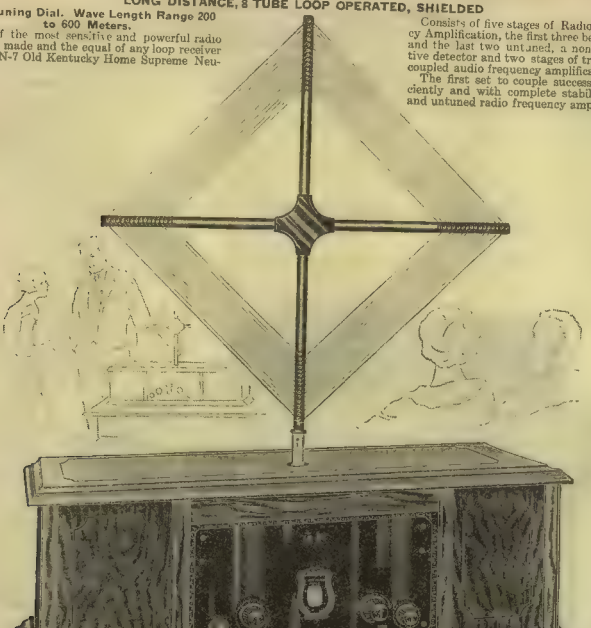
LONG DISTANCE, 8 TUBE LOOP OPERATED, SHIELDED

One Tuning Dial. Wave Length Range 200 to 600 Meters.

One of the most sensitive and powerful radio receivers made and the equal of any loop receiver except SN-7 Old Kentucky Home Supreme Neutrodyne.

Consists of five stages of Radio Frequency Amplification, the first three being tuned and the last two untuned, a non-regenerative detector and two stages of transformer coupled audio frequency amplification.

The first set to couple successfully, efficiently and with complete stability tuned and untuned radio frequency amplification.



Designed primarily to operate on a directional loop. Has wonderful range, volume, good selectivity and clearness of tone for the following reasons.

1. The five stages of radio frequency which give a radio energy amplification before the detector of four million times.
2. The metal shielding of the back, the top and the front which prevents any of the coils inside of the set from picking up signals. Only the loop, therefore, can pick up signals. Since the loop can be pointed in any direction and tuned in this way, stray and undesired waves and signals are kept out of the receiver.
3. The design of the circuit, the placing of the parts and the size of the cabinet make it possible to separate the parts sufficiently to prevent the coupling between the magnetic fields of the stages of radio frequency.
4. The quality of the materials out of which the receiver is made.
5. The extreme care used in manufacturing and, testing each receiver.

The wonderful distances to which this receiver will reach out in all directions and the tremendous volume of undistorted sound that it will deliver are due to the four reasons mentioned above, to the use of storage battery tubes ,which are not critical, which are uniform and which are powerful and to the directional effect of the loop. A loop or other antenna is always most sensitive in the direction in which it is pointed. No matter where the station is located, the loop can be pointed directly at it. Thus both loop and receiver are placed in the most sensitive possible position.

Chrysler 72 five passenger coupe which lists at $1,595

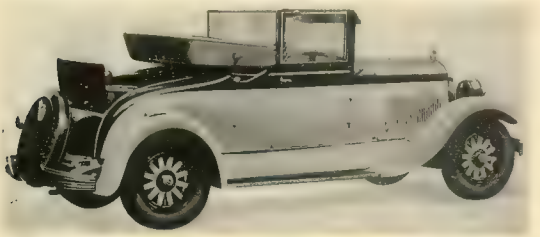
former model 70 and the Imperial 80. From this latter model are derived the counterweighted crankshaft design and the rubber engine insulation. With the increase in bore from 3⅛ to 3¾ in., and stroke from 4¾ to 5 in., representing an increase in piston displacement of from 218.50 to 248.9 cu. in., the crankshaft has been increased in weight to take care of the added power. As a result of the bolted on counterbalances, it has been possible to use the same main and rod bearing sizes as in the model 70.

Connecting rods are longer in the new engine, now being 10 7/16 in. from center to center, representing an increase of 7/16 in. Piston pins are slightly larger in diameter and are now ⅞ in., with the length also increased 1/16 in. to 2⅞ in. An interesting piston design is also incorporated in the 72. It is of the aluminum alloy Invar strut type, but has five rings, four of which are of the compression type, the lower ring being an oil scraper. The four compression rings are L-Shaped, and the second and fourth piston lands are slightly smaller in diameter than the others, the flanges of each two adjoining piston rings meeting over this land. This design is said to have materially increased compression.

Larger inlet valves also contribute to greater power, these now being 1 9/16 in. in diameter, while the 1 7/16 in. exhaust valve head diameter is retained. As formerly stems are 11/32 in. in diameter.

A crankcase ventilating system is also incorporated on the 72. Air is taken in at the front end of the engine through an air cleaner and is whirled about in the crankcase due to the rotation of the shaft. At the rear left of the crankcase is a cored hole in the shape of an inverted L, to which the ventilating outlet pipe is attached, leading downward and backward. As formerly an oil filter is also used, as well as an air cleaner on the carburetor air intake.

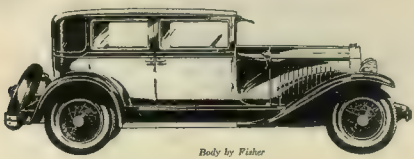
Increased cooling capacity for the larger engine has been obtained through the use



The convertible coupe on Chrysler 72 chassis lists at $1,745

Cadillac Creates a New Body Style for LA SALLE

The Five-Passenger Town Sedan



Body by Fisher

Not merely a new car, this La Salle Town Sedan; but a new name for a new body style—

Exceedingly smart; and though providing gracious comfort for five passengers, a car to be used for individual goings about.

Not a resemblance to a coupe, but having the companionable intimacy of a coupe.

Four doors—the front ones exceptionally wide; the rear ones so placed with relation to the seat that entrance and exit are most easy and convenient.

Two comfortable, full-width, high-backed seats; with the clever idea of a cut-away under the front seat to give ample foot-room for rear-seat passengers.

Above and beyond these advantages, there is, of course, the unequalled performance of the eight cylinder, V-type engine; the delightfully smooth handling and the luxurious ease of riding which are constantly winning the La Salle new friends everywhere.

To be seen driving a La Salle is to be seen in the smartest car on the streets.

$2650, F. O. B. DETROIT

You may possess a La Salle on the liberal term-payment plan of the General Motors Acceptance Corporation—the appraisal value of your used car acceptable as cash

LA SALLE

CADILLAC MOTOR CAR COMPANY

Division of General Motors Corporation

DETROIT, MICHIGAN OSHAWA, CANADA

usual assist cords.

A new attractive design of instrument panel, indirectly lighted, includes an electric dash gasoline gage, and dash engine thermometer in addition to the usual instruments.

The steering column is fitted with a coincidental steering and ignition lock in the column bracket, the windshield wiper control and fumer button also being mounted on this bracket.

A combination stop and tail lamp is included in the standard equipment, as well as Hassler shock absorbers all around. Dome lights are now fitted in the coupes as well as the sedan models.

Chrysler Announces "52" Four-Cylinder Model

LOWER prices, with reductions ranging from $24 to $70, feature the announcement of its model "52" four-cylinder line by the Chrysler Corporation. Better streamlining, giving the appearance of decreased height, form-fitting seats, new interior and exterior finish, and a new type manifold are features of the line.

Seven body models are offered, priced as follows:

5-pass. Touring	$750
2-4-pass Roadster	725
2-pass. Coupe	725
2-door, 5-pass. Sedan	795
4-door, 5-pass Sedan	795
5-pass De Luxe Sedan	875

As its model number indicates, a top speed of 52 miles per hour is claimed for these models, while acceleration, according to the Chrysler Corporation, is said to be eight seconds for from 5 to 25 miles per hour.

As on the "62" line recently announced, the "Red Head," Chrysler's high compression head, is offered as standard equipment on the roadster, and is available at slightly extra cost on the other body models. These heads are designed for use with anti-knock fuels. Featuring engine changes, is a new down-draft type inlet manifold, including jacketed portion heated by exhaust gases. An air cleaner is provided on the carburetor air intake.

External appearance of the cars has been enhanced by the use of more sweeping streamlining. Cadet visors are standard on closed models, and all models have bullet type headlamps. Rear roof curves have been rounded off more than formerly, while tops on the open cars are decidedly lower. Body colors differ for the various models, greys, greens and blues being used, with striped beadings and colored window reveals.

Visibility is improved in the "52" line through the adoption of narrower front pillars on the closed models, panels across the top of the windshields also being decreased in depth to increase visibility. Saddle-spring seat cushions have been adopted on all models to increase riding comfort. A new indirectly lighted instrument panel has been incorporated, similar to that used on the "62," and the Fedco number plate is now located above this panel immediately below the windshield.

Standard equipment includes automatic windshield wiper, combination stop and tail light, foot rests and robe rails in the sedans.

Chrysler 52 roadster listing at $725

Chrysler Introduces the Illustrious "72"

By Athel F. Denham

AN entirely new and larger engine and roomier bodies are the leading features of the "Illustrious New" 72 model announced by the Chrysler Sales Corporation to replace the former 70 model. Seven body models are being offered at present, with prices identical with similar body models on the 70, with the exception of a $50 price reduction on the Crown Sedan.

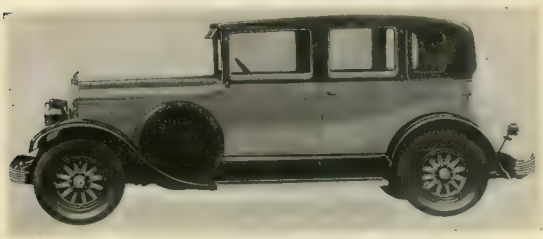
Rubber engine supports at four points are used on the new engine which has a bore and stroke of 3¼ by 5 in. The new engine also carries a counterweighted seven-bearing crankshaft and Invar strut pistons provided with five rings of a new type. Rubber shock insulators are also used for the spring shackles.

Due to the larger engine, which develops 75 b.hp. performance has been materially increased, a top speed of 72 miles per hour as indicated by the model designation being claimed, as well as an acceleration of from 5 to 25 miles in seven seconds. Larger bodies, with five inches more leg room and saddle spring cushions contribute toward increased comfort, while appearance has been increased, aside from the use of longer bodies, through a higher and deeper radiator, individual headlight stanchions, new instrument panel and use of new color schemes. As on the 52 and 62 models, the Chrysler Red Head high compression cylinder head is standard on the roadster model, and is available on other models at slightly additional cost.

Following is a list of the body models offered:

2-4-pass. Roadster	$1,495
2-4-pass Coupe	1,545
4-pass Coupe	1,595
5-pass Closed Coupled Sedan	1,595
5-pass Royal Sedan	1,595
5-pass. Crown Sedan	1,745
2-4 pass. Convertible Coupe	1,745

In design the new engine follows previous Chrysler practice and represents a combination of features taken from the



Chrysler 72 close coupled sedan listing at $1,595

GRASS SHEARS

Crucible steel blades, hardened and tempered; japanned handles raised to give full clearance to the hand; tempered coil spring and end latch.

Per Doz

LAWN MOWERS
"TRAIN OF GEARS"

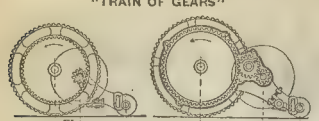

Illustration of Internal Gear. No. 47

Illustration of Train of Gears. No. 1890

Used On Blue Grass Mowers No. 1890 and No. 47.

Advantage of a Train of Gears over Internal Gear.

Train geared mowers run more easily and steadily owing to their great length of wheel base. Driving wheels may drop in a rut, but before the knives reach it the wheels are out again and the grass is cut smoothly, because the wheels and roller span the rut.

There is an additional advantage of better distribution of wear and tear and increased power and speed. The action is on the forward side of pinion and pull is down toward bed-knife, so when strain or cutting occurs the revolving cutter is always firm against bed-knife and cuts smooth.

Ball-Bearing Device used on Blue Grass Mowers.

Has 7/16 inch best quality steel balls. All ball-bearing cones are of best quality steel, thoroughly case hardened, ball race ground to a perfect cylinder. Cones are tested before adjusted to the revolving cutter shaft.

All perfectly ground, dust proof, and made with as great a degree of perfection as the finest bicycle.

All blades are of highest grade crucible steel, tempered in oil. Revolving cutters are made a perfect cylinder by being ground on special grinding machines.

Stationary Knife Bar On Blue Grass Mowers.

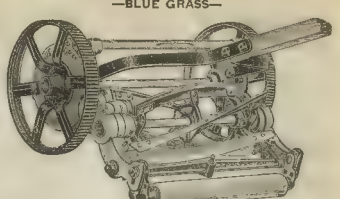
Stationary knife bar is squared in a most particular manner. The ends of knife bar being faced and the bottom of bar planed where stationary blade is attached. In the end of each stationary knife bar is inserted a steel cone, which is pivoted in the side plates and held firmly in place by heavy machine bolts, making the machine absolutely rigid.

Stationary Blade On Blue Grass Mowers.

The stationary blade used on all Blue Grass Mowers are made from Disston saw steel and has a certain springy character that allows the revolving cutter to have a perfect joint at all times with the stationary blade; without frequent adjustment of the stationary blade; as is the case with most lawn mowers, using the thick heavy stationary blade which is very stiff and will not allow for any slight difference in the wearing qualities of the revolving blades.

The ratchets used on the Blue Grass Mowers are noiseless and never in operation when the mower is trundled from place to place or pulled backward. All mowers of similar character have noisy ratchets with working pins that are in operation at all times, shortening their life.

LAWN MOWERS
—BLUE GRASS—



Ball-Bearing. High Grass. Triple Gear. Drive Wheels 10½ Inches Diameter, Cutter 6 Inches Diameter.

Triple gear open frame, long wheel base, five high grade crucible cast steel cutter blades, dust proof ball-bearing journals, knife bar mounted on milled steel cones, has a train of gears and drives from both ends; both revolving cutter and driving wheels operate on ball-bearings, so constructed that they never require adjusting. Silent in operation. Has patented center adjustment for adjusting the stationary blade at center to the revolving blades, independent of the ends.

Finished in red, silver and gold; varnished hardwood handle.

SPARK PLUGS

A. C. FORD SPECIAL

Carbon Proof.

Spring terminal clip permit wire to be instantly detached and reconnected while motor is running. Facilitates testing spark plug and coil. No nut to be unscrewed or lost. By merely unscrewing the bushing, plug may be taken apart. Only one gasket is used. Patented carbon proof porcelain. Saw tooth edges attain sufficient heat to burn off deposits thus offering effective resistance to carbon.

Success in the garage business, as in any other line of business comes through a consideration of what the public wants and demands, and an intelligent catering to those wants in a business-like way. There is no more prospect of success in garage operation without business-like equipment and methods than there is in any other line.

This catalog illustrates and prices everything necessary to fully equip the most modern garage.

LANTERNS

All H&S Lanterns are made from Heavy Tin Plate, retinned and have special Globe Lift, and Heavy Rising Cone Tinned burners. All H&S Lanterns have extra large oil hole with brass screw cap set at such an angle that the lantern can be easily filled without removing globe. The large tinned bail is made to remain upright when desired.

H&S Lanterns burn a clean and exceedingly white light. The flame is white to the very feather edge, and entirely free from smoke. All H&S Lanterns can be filled without removing globe.

H&S SUPREME

Large fount, burns 35 hours, extra heavy rising cone tinned burner, 1 in. wick, No. H616 selected crystal globe, height 14 in.

H&S ORDINANCE

This lantern is made to meet the requirements of various state and city laws. Throws a strong, white light forward, and the rear signal is visible many hundred feet from the rear. This lantern is a necessary road protection against speeding automobiles. The flat steel holder is made extra strong and with a very long tongue so that the lantern cannot jar off. It is the modern road lantern.

RED ENAMELED, height 12½ in., corrugated bright tin reflector 2½ in., ruby lens rear signal, steel burner with ⅞ in. wick, bull's eye mounted on globe plate, crystal "Bantie" cold blast globe No. H610, extra strong steel side holder, w't per doz. 40 lbs.

Built by Pfanstiehl

The Clarodyne Radio Plan

for the 1927-28 Season

IS READY FOR YOU NOW!

Besides offering Radio Sets of unquestioned merit, leaders in every way, and in advance of other lines in many details, Clarodyne dealers get the benefit of our special merchandising plan. You can show the newest sets as soon as they are announced, WITHOUT INVESTMENT BEFORE YOU SELL THEM!

6 MONTHS' TIME TO PAY

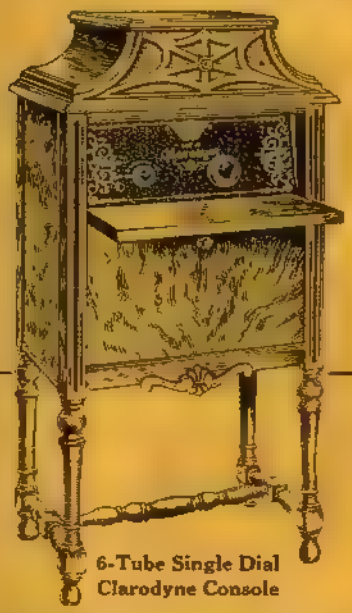
A Quality Line—Priced RIGHT

The dealers' profits on Clarodyne radio sets are substantially better than on most radio lines. As Clarodyne receivers are sold only through authorized stores who have the exclusive distribution in their territory, it is easy to maintain the fair list prices.

COMPLETE DETAILS of our proposition for the 1927-28 season will be sent at your request. It takes but a few seconds to tear off the coupon [illegible] your name and address, and mail it—and it puts you in line for INCREASED PROFITS!

Built by Pfanstiehl

The illustration above shows the careful design, the painstaking workmanship and the many features of the chassis used in the new 1927-28 line of Clarodyne Radio Sets. It's the inside of the set that [illegible] the results and comparison with other makes is convincing proof of Clarodyne quality



6-Tube Single Dial Clarodyne Console

Everything complete in one cabinet. New design loud speaker is built into the top and the lower compartments are large enough to accommodate all power units. Tunes with a single dial and the newly perfected amplification system reproduces the program with life-like REALISM!

Retail List Price **$160.00**

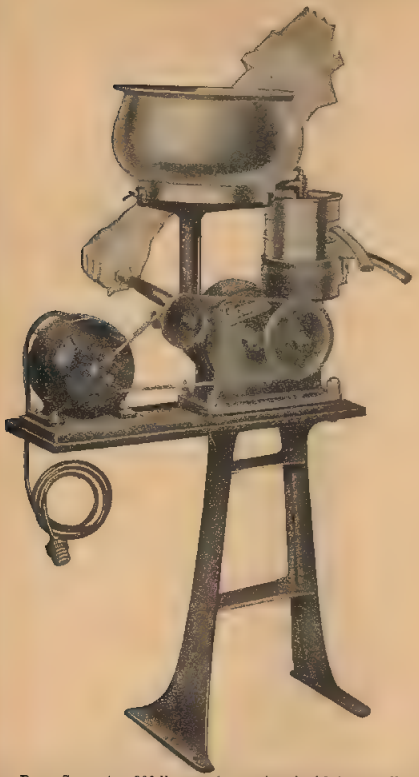
DOMO SEPARATORS



Domo Separator, 300 lb. capacity, equipped with intermediate plate, pulleys, belt, etc., to be operated with Motor. The Motor is ¼ horse power, 110 volts, 60 cycles, 1725 revolutions per minute, alternating current. Equipped with attachment plug for lamp socket.

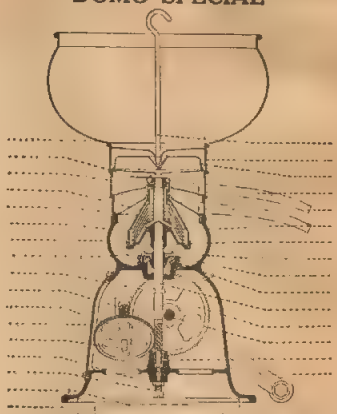
This motor is absolutely guaranteed if operated according to directions accompanying the separator.

The crank for hand power is left on and remains stationary when operated by power motor but by slipping off the belt the separator can be operated by hand, for trial starts and cleaning. Hand cranking the separator as the current is turned on relieves the motor of starting the dead load.

To compete with catalog houses, separator should retail for about $85.00 plus freight.

No. H12AES—Complete with motor and driving gear, and stand, shipping w't 18 lbs.....each **$133.30**

DOMO SPECIAL



Substantial, long wearing. Made in Domo factory to afford one cow keepers a low priced mechanical skimmer to supply strictly fresh cream and fresh skim milk for consumption at its best.

No. H1L—Capacity 175 lbs., approximate 85 qts. hourly milk capacity, shipping w't 47 lbs., each $38.30

IMPROVED DOMO CREAM SEPARATORS

AN UNEXCELLED SKIMMER, PERFECTLY CLEANABLE, POPULAR PRICED

No. HAX

The small "AX" size, 10x13 in. base and 16 in. tall—for Domestic use only—not more than two cows, has an open solid one-piece bowl convenient to operate and as readily cleaned as a milk bottle. The "AX" size will get more cream than is possible by setting the milk skimming a single cow's milk, 8 to 12 quarts in 10 to 15 minutes. The "AX" size is usually sold without stand, but the solid stand for No. 1 also mounts the "AX".

No. 2.

The Nos. H10, H11, H12 and H12C are equipped with the most efficient disced bowl, described below. They may be mounted on a table or bench to operate successfully, but must stand solid to skim perfectly and not wiggle or vibrate in operation. Any vibration hinders skimming the same as does shaking or stirring milk on which cream is rising.

Nos. H10 and H12 Without Stand

No. H13 Domo, 25 in. high and H14 Domo, 28 in. high are intended for 8 to 18 cows. These sizes should always be mounted on a rigid stand to avoid jarring. Properly mounted, the Domo always runs smoothly and noiselessly.

DOMO'S loose, overhung, self balancing, small, all pressed steel bowl, with gears running in a constant oil bath and with bronze brushed bearings insures the smoothest, easiest running.

DOMO'S bowl is most simple and compact as made of fewest parts possible to cleanest skimming, is quickly and completely taken apart to clean as perfectly as a china plate and as readily re-assembled, features of the utmost importance in its daily use.

DOMO'S unexcelled skimming which is of first importance, combined with its superior construction, accounts for its most satisfactory service and the success it enjoys.

DOMO'S bowl discs are mixable, but best skimming results from keeping the discs in the same order after it is put into service. It will also skim cool milk, which however, is discouraged as a wasteful practice.

Kept in condition and handled according to DIRECTIONS, DOMO pays for itself in a short time in the extra cream it takes out of the milk, skimming so perfectly that less than 2-100ths of 1% of fat remains in the skimmed milk, an amount imperceptible except by Babcock test.

No. H12A.

DOMO is most handy in consequence of its compactness and simplicity, yet it has the capacity of larger, heavier separators, and excepting the small "AX" and "BX" sizes, has oil bathed gears as illustrated Fig 1, and with its small, light, highly efficient, loose overhung self-balancing bowl—Fig. 2—and bronze bushed bearings is easiest running.

No. HAX—Domo—Capacity 90 lbs. or 9 gals. per hour, w't boxed 35 lbs., without stand, each $33.35

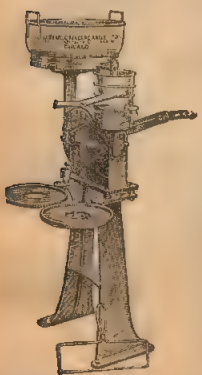
No. H10—Domo—Capacity 150 lbs. or 18 gals. per hour, w't boxed 50 lbs., without stand, each $52.75

No. H12—Domo—Capacity 300 lbs. or 30 gals. per hour, w't boxed 70 lbs., without stand, each $63 90

No. H12A—Domo—Capacity 300 lbs. or 30 gals. per hour, supply tank on bracket like model H13, w't boxed 75 lbs., without stand ..... each $72.20

No. H13—Domo—Capacity 450 lbs. or 45 gals. per hour, w't boxed 112 lbs., without stand, with tank bracket ..... each $ 97.20

No. H13S—Domo—Boxed with loose stand, w't 167 lbs. ..... each 106.10



No. H13 With Stand.

EXTRA STANDS

No. H1—For Nos. HAX, H10 and H11 Domos, w't each 45 lbs., loose, extra ..... each $8.35

No. H2—For Nos. H12 and H12A Domos, w't each 50 lbs., loose, extra ..... each 8.35

For list of separate parts and details of operation, see DOMO DIRECTIONS with every separator.

No. H3—For H13 Domo, w't 55 lbs., loose, extra ..... each $8.90

ASK FOR DOMO PRINTED MATTER FOR DISTRIBUTION

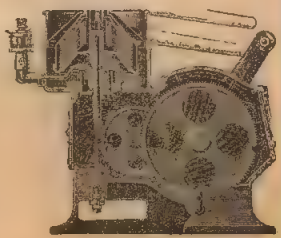
For Domo Repairs see Pages 1040 and 1041.

IMPORTANT

Every DOMO, when carefully set up so it runs smooth will skim perfectly if operated according to DIRECTIONS, kept in nice running condition and the bowl kept bright and sweet.

See description of DOMO'S details in DIRECTIONS packed with every separator.

Always URGE the purchase of a separator somewhat larger than is needed, as a larger size skims small lots of milk equally clean or when required, the milk of more cows, or the increased quantity of milk when cows are fresh.



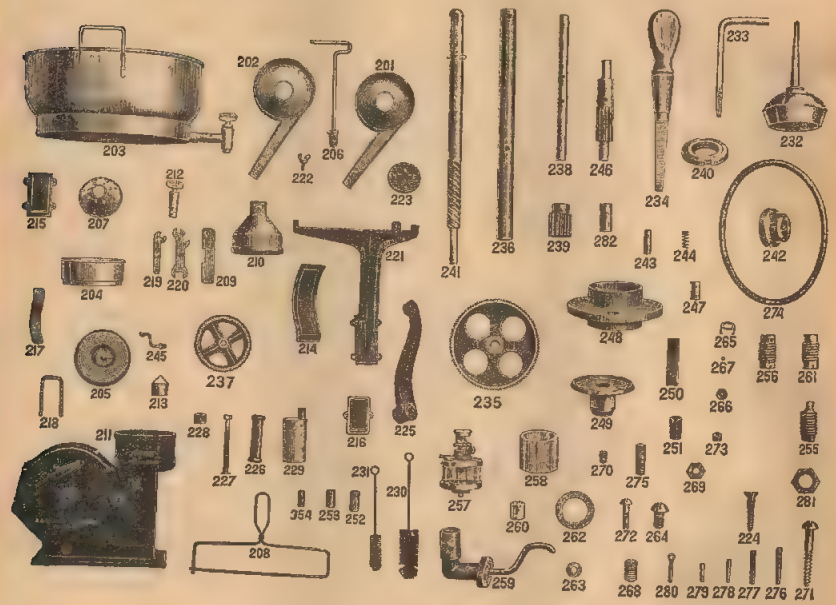
No. H1.

ILLUSTRATIONS OF REPAIRS FOR DOMO SEPARATORS

Nos. 10, 11, 12, 13, 14, 23, 24, 25, AX and BX.

In ordering always specify the number and name of the part and the size of the separator.

Thus: 1 — No. 274 Ring for No. 12 DOMO



FOR LOW MODEL EXCLUSIVELY

Finishing and Proofing
TESTING THE PLATE FOR PRINTING QUALITY

61 Fine etching done by finisher.

62 Plate is chalked for examination.

63. Outlining a half-tone to remove unwanted surface

64 Removing spots and defects from half-tone.

65 After routing, half-tone is trimmed to outline

66. Finishing corners of half-tone squared with line.

FINISHING and PROOFING
67. Zinc cuts are carefully spotted and revised
69. Burnishing dark areas to increase contrast.
68 Cutting special white line with draw tool.
70. Progress of work checked against copy.
71. Re-engraving highlights and tooling.
72. Scratches are repaired by lifting each dot to surface.

FINISHING and PROOFING

73. The finished engraving is thoroughly cleaned.

74. Vignettes and outlined engravings require a printer's overlay.

75. Orders frequently call for mixing of special inks.

76. Registering color plates on press.

77. Type of press commonly used for proofing.

78. Faithful reproduction is sought.

79. The finished engraving is finally cleaned.

HELBROS — *the strap watch for* ALL *occasions!*

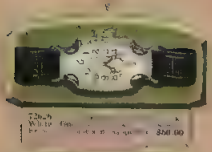
Helbros
fascinating
gem-adorned
watches

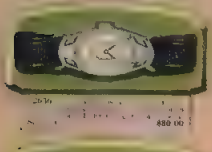
THE smartest and most modern ideas are embodied in these exclusive designs—exquisitely carved out with genuine fine diamonds and specially cut synthetic gems of ruby red, sapphire blue, and emerald green.

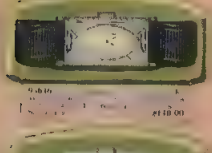
Only the exceedingly dependable Helbros movements are used - highly-finished movements with special mainspring, tempered hairspring, red ruby jewels, and engraved, Sterling Silver dials, with assorted raised or enameled numerals. Each watch with an appropriate presentation box.

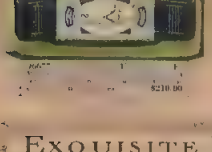
(Watches shown ¾ actual size)

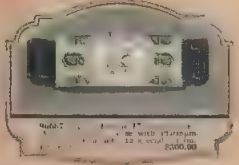
3 piece Cases

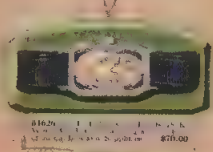


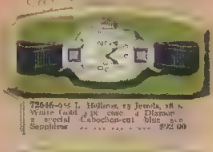


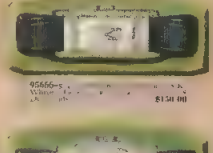


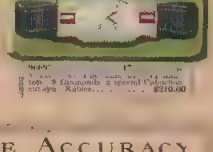












EXQUISITE BEAUTY *plus* DEPENDABLE ACCURACY

Helbros

Exquisite Beauty

"EXQUISITE BEAUTY" is but one of the features that make Helbros the most approved moderately-priced watch. "DEPENDABLE ACCURACY" is the prime guiding principle. Accuracy in the modern precision machinery which produces the minute parts—in the hundred-odd perfectly standardized parts—in the rigid inspection at every stage of the manufacturing process, and accuracy in the adjustment and testing before shipment. Lasting satisfaction is assured by a staff of expert repair men, and a complete stock of parts at all material houses, and at the Helbros establishment in New York.

NATIONALLY

Helbros Watches in Star 14kt. White Gold Filled 3-piece Cases

THESE watches contain the high-grade Helbros movements with special mainspring, tempered hairspring, red ruby jewels, and assorted engraved Sterling Silver dials with raised or enameled numerals—every movement thoroughly adjusted.

The cases are 3-piece Star, 14Kt., White Gold Filled quality, with the latest motifs in design. An attractive presentation box with every watch.

(Watches shown 2/3 actual size)

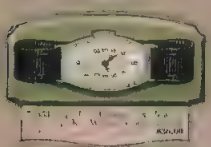
Watches

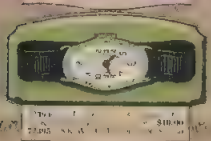
Dependable Accuracy

FROM mainspring to hairspring, each part of a Helbros movement is faultlessly executed and highly finished. The finest red ruby Jewels are used. Dials are of Sterling Silver, tastefully engraved, and have baked-in enameled numerals. Every movement is stamped with an individual serial number and model number. When you wish to order materials, you merely specify the model number.

Substantial *three-piece* cases, choice silk grosgrain ribbons with carved buckles, and distinctive presentation boxes complete the painstaking details which render Helbros Watches "exquisitely beautiful and dependably accurate."

ADVERTISED





Helbros Watches

ICE PICKS

All **Hibbard** Ice Picks are finished in Udylite, a rustproof coating of cadmium which is not a mere shell but tends to amalgamate with the metal itself.

It is positively guaranteed not to scale, chip, check or crack. Once applied, it is permanent, and the product to which it is applied is permanently rustproof.

No. D15 Hibbard—For expert icemen's use, tempered steel, Udylite finished, 5 in. taper needle point, length of pick 6 in., length overall 9⅜ in., hardwood handle, w't pr doz. 2 lbs.....per dozen $3.35

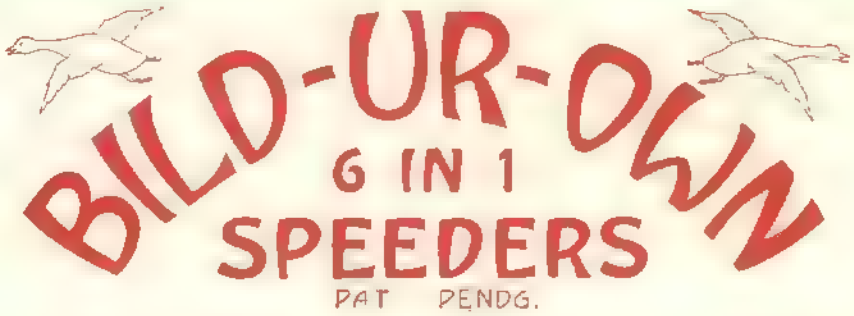
Crated; shipping wt each 190 lbs.

A SENSATION
IN CONSTRUCTION SETS

After two years of experimenting and tooling up for quantity production we offer what we predict will be one of the biggest sellers in the toy field.

Every boy would rather build his own wagon or scooter than to buy one even though it is made out of a soap box and a set of old wheels. Now he can not only have the fun of building six different speeders with the "BILD-UR-OWN" set, but he will be proud of every one of them because they are as fine as any that he has ever seen completely assembled. Boys will want the "BILD-UR-OWN" Speeders with their beautiful design, finish and sturdiness.

SIX SPEEDERS FOR THE COST OF ONE



THE SEASON'S LEADING NUMBER

WILL BE POPULAR WITH DEALERS

because of the unusual consumer appeal—putting the wheel-goods line back on a staple and profitable basis.

The "BILD-UR-OWN" is packed in attractively labeled, easily stored boxes that are sold as received. No assembly is necessary.

Let us send you our liberal dealer proposition

FACTORY: BROOKLYN, N. Y

SIX HUSKY SPEEDERS

CAN BE CONSTRUCTED FROM THE PARTS IN ONE BOX

Any Boy Can Build Them in a Few Minutes

Just what the boys have been waiting for. Full sized speeders that a boy can build himself. Not little toys, but real husky, full-sized wagons and speedy racers that he can put together or take apart in a few minutes. Not convertible freakish models, but standard units, the same as a factory would assemble.

Big enough for the biggest boy and strong enough to carry the whole family.

Here's a Leader

Sells on sight

A full sized scooter with double disc wheels and moulded rubber tires, 20″ footboard and full sized stearing handle. Tested by a 220-pound man.

Easy to sell over the counter. Packed in individual boxes attractively labeled. Priced to the dealer so as to retail at $1.00 or less with plenty of profit.

EVERY HOME NEEDS A MODERN PERCOLATOR SET

MANNING-BOWMAN'S NEW FUSELINK CUTOUT
A Protective Device that Never Fails!

1. If the percolator boils dry, the current is automatically "turned off" without arcing. The new device insures the percolator from melting.
2. Its simplicity allows replacement of fuse without tools—no waiting for repairs.
3. Fuse will NOT "shut off" while percolator contains water. Works as soon as dry.
4. An extra fuse **attached** to the percolator makes it available for replacement when needed.
5. The only percolator that can be repaired and a new element replaced with a screw-driver.

Colonial Style

Butler finished, nickel silver, silver plated Percolator Set with roundac chased design on all pieces. Capacity of percolator 8 cups

H6399. Set $97.85

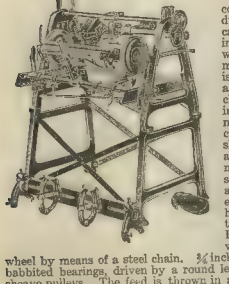
LAWN MOWER SHARPENERS
IDEAL



Angle iron frame construction. Alundum grinding wheel carried on a ball-bearing hub by an arm with bearings on the main shaft. The arm is counterbalanced by a weight at rear of machine and the grinding wheel is free to move up and down, carried along main shaft by feed screw and sliding head. The main driving shaft is special steel, ground and polished, key seated so as to drive the hub mounted between the bearings of arm. Hub carries a sprocket which drives grinding wheel by means of a steel chain. ¾ inch feed screw carried in babbited bearings, driven by a round leather belt over large sheave pulleys. The feed is thrown in and out by means of an improved belt shifter which locks itself in either position.

—JOHN PRIMBLE—RAZORS

Fig. 1

Fig. 2

Fig. 3

Fig. 4

Fig. 5

Fig. 6

Fig. 7

Fig. 8

THE BLADE IN THE MAKING

Fig. No. 1 represents the very finest quality of English bar steel, from which every Primble Razor Blade is made.

Fig. No. 2 represents the first forging of blade.

Fig. No. 3 represents the second forging of blade, including the marking of the rivet hole.

Fig. No. 4 represents Figure No. 3, but trimmed and shaped.

Fig. No. 5 represents the blade after being hardened and tempered. It is impossible to show in an engraving an exact reproduction of No. 6, but the blade referred to shows the coloring of the steel after being tempered. The streak running through the center represents the test made to determine whether the blade has been perfectly tempered.

This is one of the most critical stages in the manufacture of the blade, as at this point the cutler is to determine whether he is to pocket a loss by throwing away a blade of imperfect temper, or look to the future for returns due to the honest manufacture, who produces only the highest type of goods sustained by finest material and skilled labor.

Between the processes represented by Figs. 4 and 5, the rivet hole is made, as it would be impossible to perform that operation after the razor is tempered.

Fig. No. 6 represents the first process of concaving.

Fig. No. 7 represents the blade fully sharpened and ground, and ready to pass to the purchaser. This, like Fig. No. 6, represents another critical stage in the manufacture of the blade.

Even in the process of grinding, the temper may be drawn and, therefore, the cutting quality spoiled, and as is the case with No. 5, the manufacturer must again determine as to whether he will incur a loss by discarding the blade rather than impair his reputation.

THE FINISHED BLADE

Fig. No. 8 represents the full finished blade ready to be handled, after which the razor is honed, packed and boxed ready for the market. Primble Razors do not have to be rehoned before using, every blade being set ready for use before it is boxed.

It is only at this final stage that the moderate priced or still higher priced razor must be determined, the process of grinding being the most expensive of any.

Only those constantly connected with the manufacture of razors can accurately fix the value of the finished blade, the difference in the appearance of various forms of grinding being so slight.

A PRIMBLE RAZOR BLADE

At each stage, every blade is subjected to a most rigid test and inspection, all blades not coming up to the standard being discarded. These illustrations are shown in order that Primble Razors will not be classed with goods made up under cheaper processes. We guarantee every Primble blade to be made in the manner described above.

"HOLLOW GROUND" VS. "FULL CONCAVE"

The terms "Hollow Ground" and "Full Concave" are frequently confounded. Fig. No. 6 represents a blade that might be finished very quickly into a "Hollow Ground" razor. Fig. No. 8, however, represents a "Full Concave" razor requiring several times the amount of labor as would be necessary for a razor worthy of the term "hollow ground."

The same type of grinding may be produced in a different pattern of blade. For example, Full Concave razors may be had on either the "open heel" type, or "double heel" type, in either round, square or hollow point.

The Swedish pattern is not susceptible to full concaving. For some beards, however, the Swedish grinding is quite as satisfactory as full concave.

Figures 1 to 7 merely represent seven distinct stages in the converting of a bar of steel into a finished razor blade, whereas thirty operations are required to produce the finished blade as shown in Fig. No. 8.

HOW TO STROP A RAZOR

Many people spoil a good razor by using a poor strop. The majority of people strop a razor too much, and bear too hard on the strop. When you first get a razor from us, it is in perfect condition and ready to shave at once. It will shave you well the first time you use it, and if you keep it in the same condition, it will always shave you satisfactorily.

The first thing after buying a razor, is to get a good strop A cheap strop is dear at any price. They will ruin the best razor, made. To strop a razor always lay the blade flat, so that the back and edge rest on the strop, drawing from heel to point with a firm, steady stroke, turning on the back.

HOW TO USE A RAZOR

Use warm water and rub the lather well into the face to soften the beard. Draw the razor with an easy diagonal motion against the beard. Do not scrape with the razor, or hold it at almost right angles to the face, as you will spoil the cutting edge, irritate the skin and cause the best razor to fail.

People who know nothing at all about handling a razor are liable to condemn a good razor when they do not know how to use it.

DESIGNS

TINT LAYING

80. Color treatment starts with opaquing negative.

81. Cleaning inked image off stained plate.

82. Gumbogc is applied around tint area.

83. Ink is mixed to secure correct density.

84. The ink applied to screen with hand roller

85. Exact register is important.

TINT LAYING

86. Screen transfers benday pattern by pressure

87. The gamboge is washed off.

88. Solid areas are painted in

90. Topping powder is dusted over plate.

89. The final spotting is done with a fine brush

91. Top is fixed by burning in.

92. The engraving is again inspected.

93. Halftone finally tested for depth.

94 The block must be exactly type-high.

95 The finished engraving protected with corrugated board.

96. Careful wrapping is important.

97. The invoice completes the record

98. Finished engraving goes to customer.

WRENCHES.

WILLIAMS' "SUPERRENCH."

Double Head Engineers' Pattern. Drop Forged. Heat Treated. Heads Polished Nickel Plated. Body Dull Nickel Plated. Openings Milled and Smooth. 15° Angle.

After exhaustive tests, Chrome-Molybdenum steel was selected as providing the strongest, toughest and most desirable material for the purpose ever produced. Wrenches made from it, though of lighter weight, thinner section, greater length and with narrower jaws than Carbon steel wrenches with corresponding openings, are far stronger than the latter.

Guarantee: Williams' "Superrench" (Chrome-Molybdenum) wrenches will strip the thread of any standard nut, or break the bolt, before spreading the jaws. Furthermore they will not break. Any "Superrench" returned to us that does not meet these claims will be immediately replaced.

BONNEY DROP-FORGED WRENCH ASSORTMENT

Assortment No. 65

Contains six each of thirty different Bonney Semi-Finished Drop-Forged Wrenche, mounted on a Lithographed Metal Front Display Board 45 inches high, 16 inches wide and 1½ inches thick.

Assortment includes Standard Drop-Forged Engineers' Wrenches, both 15 degrees and 22½ degrees angle openings, which may be used on U. S. S. or S. A. E. nuts and cap screws.

There are also special Wrenches for Valve Tappets and a Wrench particularly designed for reverse and brake hands on Ford Cars.

Each board is packed in individual shipping container. Board and Wrenches packed weigh approximately 100 lbs.

Per Asst.

No. 65—180 Wrenches and Display Board . . . . .

Assortment No. 60

Consists of three each of ten different Bonney Semi-Finished Drop-Forged Wrenches. All are mounted on a Lithographed Metal Front Display Board 26 inches high by 7½ inches wide.

Assortment includes wrenches of two different styles, one a general purpose wrench for openings of 22½ degree angle; the other, Engineers Wrenches having openings at 15 degrees angle.

Openings of general purpose Wrenches are, 3/8", 7/16", 9/16", 5/8", 3/4", and 1".

Openings of Engineers Wrenches are 7/16", 1/2", 9/16", 5/8", 11/16", 3/4" and 1 1/16".

Each board is packed in individual shipping carton. Weight approximately 20 pounds.

Per Asst.

No. 60—30 Wrenches and Display Board. . .

WILLIAMS STYLE "E" WRENCH ASSORTMENT

An Assortment of 3 Dozen Wrenches Generally Required for Farm, Machine and Automotive Purposes. 12 Sizes of Double Head Wrenches in Two Patterns. Openings Milled for Popular U. S. and S. A. E. Nuts and Cap Screws. Semi-Finished

Wrenches Mounted on Display Board 8 x 27 Inches

BONNEY WRENCH ASSORTMENT

Highest Quality Steel. Openings Milled and Case-Hardened All Over. Heads are Polished and Bodies are Finished in Black Enamel

This Assortment Contains Four Each of Nineteen Different Bonney Special Finished Drop Forged Wrenches. The Wrenches are Classified in Four Groups. Group 1—A Complete Range of Sizes and Patterns to Turn all Nuts on a Ford Car, Including a Special Wrench for Brakes and Reverse Gear. Group 2—four Sizes, Eight Different Openings, the Most Used 15 Degree Angle Wrenches in S. A. E. Millings. Group 3—Three Sizes, Six Different Openings, of Wrenches for S. A. E. Valve Tappets. Group 4—A Common Sense Range of Openings in Six 22½ Degree Angle Wrenches, Which Covers the Most Generally Used Nuts and Cap Screws in U. S. S. A. E., and A. I. A. M. Standards from ¼ to ¾ Inch Inclusive. The Display Board is Made of Soft Wood Covered with Heavy Gauge Metal, Richly Lithographed in Colors. The Metal Covering is Securely Held by a Moulding ¾ Inches High, and the Lithographing is Permanent and Will Not Crack or Peel. It May Easily be Cleaned with a Damp Cloth. The Size of the Board is 31½ Inches High by 16½ Inches Wide by 1¼ Inches Thick. Hooks are Inserted at an Angle of 75 Degrees from the Face of the Board

No. 70 . . . . . Per Assortment

·1847 ROGERS BROS·

SILVERPLATE

"The best selling merchandise in the store"
—today as it has been for many years

The reason is easy to discover—a deserved reputation for Quality, that has met the supreme test—the test of time—backed by an absolute guarantee of satisfaction and by years of extensive and effective national advertising and sales promotion aid for the dealer.

The result is a remarkable turnover on a line that yields a very substantial profit on every sale.

Especially important is the fact that each design is made not alone in spoons, forks and knives but in the larger pieces as well—five-piece Tea Sets and the various articles that make up the Dinner Service and adorn the home.

In each pattern the Hollowware is designed, produced, plated and finished to match the Flatware

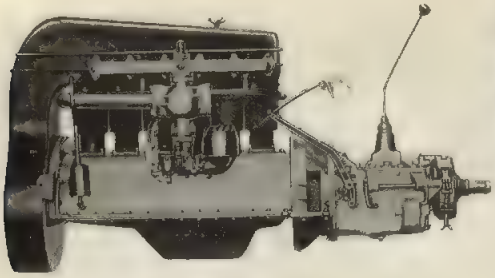
ILLUSTRATIONS ABOUT TWO-THIRDS SIZE



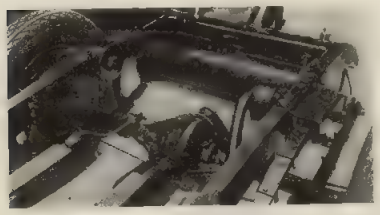
Inlet side of Franklin engine showing crankcase ventilator connection to the three-piece blower housing

Double valve springs used on new Franklin

Spicer universal joints and propeller shafts are retained, but the hollow propeller shafts, instead of being 1½ in. in diameter as formerly, are now 2 in. in diameter on the five-pass. and 3 in. in diameter on the seven pass. model. A guard of sheet metal is fitted over the rear universal joint to prevent any grease from the joint being thrown on the rear wheels.

The rear axle has been completely redesigned but is of the same general type as the former axle; that is, it has a cast aluminum center housing with pressed steel rear cover and steel axle tubes. The pinion shaft is now supported in two Timken roller bearings taking thrust in both directions and providing for adjustment. The differential gear also is carried in Timken bearings and has provisions for sideways adjustment. The center housing is heavily ribbed to prevent any sounding board effect. The gear ring is now made with a flat back instead of a stepped back, which facilitates heat-treatment and tends to minimize distortion, hence gives a truer gear. On the five-pass. chassis a gear ratio of 52:11 is used and on the seven-pass. chassis, of 56:11. The axle is of the semi-floating type and the only connection between it and the frame is through the full-elliptic springs, which give the same effect as a Hotchkiss drive. The front axle is tubular as heretofore, but in view of the increased engine weight and the fact that it now has to support braking strains it is made of a heavier-walled tube.

The Franklin Lockheed application differs in having die-cast aluminum brake shoes. One advantage claimed for these is that the greater coefficient of heat expansion of the aluminum in the shoes compensates for the greater temperature rise of the steel drums, hence the clearance is not affected by heating in service and the position of the brake pedal does not change with rise in temperature of the brake parts. There is only a single flexible connection for the braking fluid from the chassis to the rear axle, a copper tube extending along the axle housing to the brake cylinders at the two wheels. The emergency brake is operated by a lever to the left of the driver.



Showing new axle and brake layout. Note shield over universal joint

The steering gear, which is of the worm and sector type, is of the Franklin company's own manufacture. Formerly a full gear was used instead of a sector, but it was a helical gear which theoretically gives point contact, whereas the sector now used is of a worm gear (throated) and theoretically gives line contact, and longer life is expected from the new construction. The steering post has been increased in diameter to give greater clearances between the concentric tubes within it. These tubes are now separated by anti-rattle spring bushings. Adjustment of the mesh

of the worm and sector is effected by means of an eccentric bushing on the sector shaft. The reduction ratio of the steering mechanism has been increased from 8:1 to 10 1/3:1. Long bronze bushings replace the ball bearings formerly used in the Franklin steering gear. The steering arm is now fastened to the sector shaft by splines instead of by two Woodruff keys. The drag link has been stiffened. With the steering gear as redesigned the 119-in. wheelbase car has a turning radius of 39½ ft. For the export market Franklin this year for the first time furnishes cars with right-hand steering.

The steering post is pivoted at its lower end on a frame bracket and can be adjusted to four different angles by means of the dash bracket. Likewise the brake and clutch pedals are so designed that they can be adjusted to suit drivers of different size. Two finger levers, for the throttle and the headlight control, respectively, and a horn button are mounted on top of the steering wheel. The headlight control switch is located at the top of the steering column.

The 128-in. wheelbase chassis is built with a pressed steel frame. This frame, which has a 6½ by 2 by 1.8-in. section, has a slight drop at both front and rear. Very few cross members are used, and the frame is decidedly flexible, in which respect it resembles the Franklin wood sill frame. Chassis lubrication is by the Zerk system.

Tires are 32 by 6 in. on the 119-in. wheelbase models and 31 by 6.20 in. on the 128-in. wheelbase models. They are mounted on Rubsam demountable rims, of 20 and 19-in. diameter respectively, on artillery wood wheels.

The weight of the five-pass. sedan has been increased from 3320 to 3600 lb., a matter of 280 lb. The seven-pass. sedan weighs about 200 lb. more. In spite of these weight increases the acceleration has been markedly improved. The five-pass. sedan will now accelerate from 5 to 25 m.p.h. in 7¼ seconds as compared with 9 seconds for the Series 11, and from 10 to 40 m.p.h. in 14 seconds, as compared with 19 seconds.

Changes have been made also in the body trim and equipment. Two shades of broadcloth are used for the upholstery of the closed models, a darker shade for cushions, back and arm rests, and a lighter shade for sides, doors and headlining. Pasting lace is eliminated

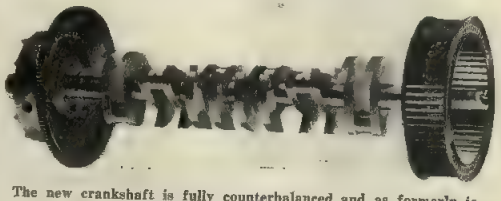
A new model Stromberg carburetor is used on the 1928 Franklin

and kick carpets are provided at the bottom of the doors. Doors are edged with a seaming lace having a cord effect, and a woven molding is applied around the seat backs, body pillars and roof lines. All mountings are of new pattern with a hammered silver finish, inlaid with a fine border line of black. Remote control handles for the door locks are now provided. Additional room is obtained in the front compartment by forming the dash with a recess in which the rear cylinder of the engine stands.

A lower effect is secured on all models by bringing the top of the wheel house 1 in. closer to the tire and lowering the running boards 1 in. Actually the cars are quite low, for the sport sedan, with an inside height of 46 in. has an over-all height of 71 in., and the regular sedan with an inside height of 48 in. has an over-all height of 73 in.

In the sedan, sport sedan and limousine, a redesign of the front pillars has made it possible to narrow them ¼ in. transversely to the line of vision from the driver's seat, and thus to increase the "clear-vision" effect.

A number of options are offered in outside color combinations and the window reveals in all cases are painted in a distinctive color.



The new crankshaft is fully counterbalanced and as formerly is carried in seven bearings

The new Franklin sport touring on 128 in. wheelbase chassis

While the bore of the engine remains 3¼ in., the stroke has been increased from 4 to 4⅜ in., increasing the displacement of the six-cylinder engine from 199 to 236 cu. in. A larger venturi is now used in the carburetor, whereby the volumetric efficiency has been increased, and the compression pressure at 1500 r.p.m. is now 80 lb. gage, instead of about 77.5. The engine peaks at 2600 instead of 2250 r.p.m.

With the increase in power additional heat has to be disposed of by the cooling system, and this is taken care of by the increased length of the copper cooling fins The air duct is now made in three parts instead of in two, as with the old style of construction it would have been impossible to remove the air hood from under the bonnet, owing to the increased height of the engine.

Valves have been increased in size and their capacity has been further increased by casting the cylinders with recesses around the outer part of both valves, so as to give the charge an opportunity to flow more uniformly through the valve opening. The intake valves, which are of the tulip type, have a clear diameter of 1⅝ in. and a lift of 9/32 in., while the exhaust valves have a clear diameter of 1 5/16 in. and a lift of 5/16 in. Both valves are adjusted to a clearance of 0.010 in. when hot. Double valve springs have been adopted, one spring within the other, whereby it has been possible to greatly reduce the stress in the spring material. The spring washer retaining means has been changed to the conventional split cone entering into a recess cut in the valve stem. The inlet valves are made of vanadium steel and the exhaustive valves of Silchrome.

The pistons remain the same as in the Series 11, and so do the piston pins, except for the fact that the latter are now chromium-plated so as to make them more resistant to wear and also more resistant to corrosion. Duralumin connecting rods are continued, but are longer (9½ in. center-to-center length) and also of larger section, on account of the longer stroke. The crankshaft bearings are of the same dimensions as previously, the increase in the bearing loads resulting from the longer stroke and the higher maximum speed being more than balanced, in the case of the main bearings, by the use of counterweights on all crank arms. These counterweights are secured to the arms by two cap screws each, the screws being securely locked. The rotor of the blower at the forward end of the crankshaft has a flexible (rubberized fabric) mounting, which is undoubtedly a factor in the smooth operation of the engine.

The Type T-2 Stromberg carburetor is now used instead of the OE. It has an auxiliary gasoline needle valve which is opened by the choke control. This results in supply of additional fuel as long as the choke is in a closed or partly closed position. The accelerator well is provided with a thermostatically controlled bleeder valve which has the effect of maintaining more fuel in the accelerator well in cold than in warm weather. The electric primer for use when starting in cold weather is retained, as is the air cleaner on the carburetor inlet. The charge on leaving the carburetor passes through an exhaust-jacketed heater and thence through a Swan manifold to the inlet valves. Fuel is carried in a 15-gal. rear tank with a 2-gal. reserve compartment. A Nagel gasoline gage is mounted on the instrument board. Feed to the carburetor is by the Stewart vacuum system. Like the intake manifold, the exhaust manifold is of the Swan type, of substantially square section. An exhaust pipe extends from the latter around the front of the engine to the charge heater on the inlet side, whence another pipe extends to the Powell muffler. The latter has been changed slightly in design so as to reduce the exhaust back pressure. Both manifolds are finished in dull nickel.

The North-East ignition system is now used. It is of the closed circuit type with automatic spark advance. An improvement in the reliability of ignition at both ends of the engine speed range is claimed.

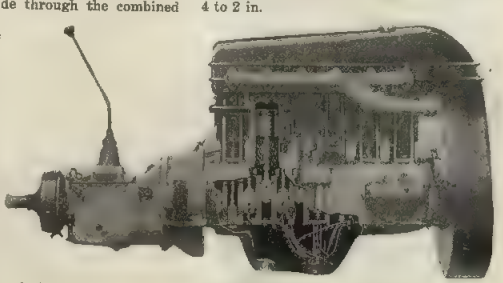
The generator is driven through the front end chain as formerly, and the starter has a Bendix drive. A quickly removable cover is placed in the housing over the pinion, so in case the pinion sticks for any reason it can be quickly inspected and freed. The battery is the same 19-plate, 185-amp.-hr. Willard as used last year.

The principle of the engine lubrication system remains the same. The details have been materially changed, however; where formerly the pump, distributor and connecting tubes were outside the crankcase, they are now all located on the side, considerably cleaning up the engine. Instead of eight, there are now nine leads from the oil distributor, one running to a Purolator oil filter on the forward side of the dash. The valve rockers are lubricated by means of a pad attached to the cover plates. The bearings for the rocker arms have been increased in size and are now bronze-bushed.

Of interest in connection with the oiling system is the method of ventilating the crankcase. A lead is taken off from the air duct of the cooling system on the carburetor side of the engine and extends down to an air filter at the side of the crankcase. From the filter there is a short connection to the forward part of the crankcase, this connection containing a thermostatically controlled valve. When the oil in the crankcase is at 120 deg. F. or more, this valve is closed and the ventilating system does not function, for under these conditions combustion of the fuel is reasonably complete, hence there is no appreciable crankcase dilution, and there is also no danger of moisture condensing in the crankcase. On the other hand, when the engine is cold the valve is open and the over-pressure in the air header causes air from the header to enter the crankcase near the front on the carburetor side and to leave it near the rear on the exhaust side through the combined relief pipe and oil filler. This device is of novel design. The oil filler tube, which of necessity extends upward, is covered by a dust-tight cap, so that no dirt can enter the crankcase through it. The pressure relief tube extends downwardly and discharges below the engine filler plate, which not only tends to keep the side of the engine free from oil vapor but to increase the ventilating effect, for the reason that the discharge is into air at atmospheric pressure, instead of into air at over-pressure, as under the hood. It is claimed that this crankcase ventilating system will completely eliminate trouble from crankcase corrosion. The only part inside the engine which is ordinarily subject to corrosion and beyond the influence of the ventilating system, the piston pin, is chromium-plated and therefore rust-proof. With the new crankcase ventilation system the Franklin company recommends that the crankcase oil supply be renewed every 1500 miles in summer and every 1000 miles in cold weather.

The oilpan is made of pressed steel instead of aluminum, and it can be removed without disturbing the parts referred to. These parts are supported from the upper half of the crankcase, which is of aluminum, as heretofore. The filler plates extending between the crankcase and the frame sills are provided with louvres.

Only one change has been made in the Brown-Lipe single plate clutch, which, as last year, has a flexible rubberized fabric center. This consists in providing the driven disk with holes near its rim, so as to reduce its spinning weight. The transmission also remains substantially the same, but the transmission lock has been replaced by an Electrolock mounted on the instrument board. A reversing light switch is now mounted on the transmission case, automatically lighting up a powerful lamp at the rear of the car when the gear is thrown in reverse. The transmission brake serves now for the emergency instead of the service brake. The diameter of the drum has not been changed and the brake is said to be as powerful as formerly, but the width of the lining has been decreased from 4 to 2 in.



Exhaust side of Franklin engine showing new location of oil and exhaust pipes

New Cars and Models

New, More Powerful Franklin Has Four-Wheel Brakes

By P. M. Heldt

INCREASED piston displacement and increased engine speed—peaking speed—account for an increase of more than 24 per cent in engine horsepower in the new Franklin model, known as the Airman (for service purposes as the Series 12). For the first time in several years the Franklin company offers seven-passenger models and these deviate from the rest of the models in having a pressed steel frame, instead of the woodsill frame continued in the other models. A change has been made in the electrical equipment of the car. The rear axle has been completely redesigned, and four-wheel brakes—Lockheed hydraulic of the internal type—are standard equipment. Although the adoption of four-wheel brakes and the increase in piston displacement has added somewhat to the weight of the different models, the performance has been markedly improved, as the proportional increase in power is greater than the proportional increase in weight. The engine is notable for smoothness of operation, even at the highest speeds, which is ascribed to the use of a fully counter-balanced crankshaft support in seven bearings and of very light reciprocating parts. This smoothness of the engine together with the full-elliptic springing of the chassis, makes the new Franklin a particularly comfortable vehicle at all speeds.

More mechanical changes have been made by Franklin this year than for quite a number of years past, while the body structures are continued without serious alterations, except for the seven-passenger types.

New Franklin Models and Prices

PLUMBS AND LEVELS
—BLUE GRASS—

First grade white pine, finished with three coats of weather-proof red paint. Plain or fully bound with solid brass or brass plates. All spirit glasses are set solid and protected by heavy lenses, making them dust, dirt, and water-proof. Vials permanently marked with black enamel rings on either side and cannot get out of place.

Mason's.

Plain, two plumbs and two levels. Size 2½x1½ inches. Plain.

	Each
No. BG1—Length 48 ins	$7 50

One in carton; wt each 2 lbs.

Mason's.

Plain, double construction, four plumbs and two levels, always in a position to use.

	Each
No. BG3—Length 48 ins	$9 00

One in carton; wt each 2 lbs.

Mason's.

Fully brass bound, brass end plates, double construction; four plumbs and two levels; always in position to use. Size 2½x1½ inches.

	Each
No. BG7—Length 48 ins	$13 50

One in carton; wt each 3½ lbs.

Mason's.

Plain, two plumbs and two levels, may be read either edge or end up. Size 2½x1½ inches.

	Each
No. BG4BE—Length 48 ins; brass ends	$10 20

One in carton; wt each 2¼ lbs.

Carpenter's.

Plain, two plumbs and two levels. Size 2½x1½ inches.

	Each
No. BG118-24—Length 24 ins; wt each 1 lb	$4 20
No. BG118-30—Length 30 ins; wt each 1¼ lbs	4 35

One in carton.

Carpenter's.

Fully brass bound, brass end plates, two plumbs and two levels. Size 2½x1½ inches.

	Each
No. BG118BB—Length 30 ins	$9 00

One in carton; wt each 2 lbs.

PLUMBS AND LEVELS
—BLUE GRASS—

Carpenter's.

Plain, one plumb and one level. Size 2½x1½ inches.

	Each
No. BG677—Length 16 ins	$2 85

One in carton; wt each ¾ lb.

Carpenter's.

Plain, one plumb and one level. Size 2½x1½ inches.

	Each
No. BG678-24—Length 24 ins; wt each 1 lb	$3 15
No. BG678-30—Length 30 ins; wt each 1¼ lbs	3 30

One in carton.

Carpenter's.

Brass end plates, one plumb and one level. Size 2½x1½ inches.

	Each
No. BG679—Length 30 ins	$4 35

One in carton; wt each 1¼ lbs.

Carpenter's.

Aluminum. Two plumbs and two levels. Size 2¼x1 inch.

	Each
No. BGA18—Length 18 ins	$10 50

One in carton; wt each 1¾ lbs.

Carpenter's.

Aluminum. Four plumbs and two levels. Size 2¼x1½ inches.

	Each
No. BGA24—Length 24 ins; wt each 2¼ lbs	$11 25
No. BGA26—Length 26 ins; wt each 2½ lbs	12 30
No. BGA28—Length 28 ins; wt each 2¾ lbs	12 60
No. BGA30—Length 30 ins; wt each 3 lbs	13 20

One in carton.

Mason's.

Aluminum. Four plumbs and two levels. Always in correct position. Size 2½x1½ inches.

	Each
No. BGA42—Length 42 ins	$21 75

One in carton; wt each 4 lbs.

PLUMBS AND LEVELS
STANLEY

Hardwood stock, cherry stained, polished; size 2¾x1⅛ inches; aluminum tipped ends; fitted with four proved non-adjustable glasses, two single plumbs and one double level; all glasses are protected by a heavy glass cover.

LINE AND SURFACE LEVELS

STEVENS

Aluminum body; end pieces and hooks are formed from one piece of nickel silver; spring nickel silver clips. A handy level for the machinist, millwright, carpenter and electrician, particularly adapted for road and highway construction, in excavation and survey work.

LINE LEVEL

Reverse clips prevent level from falling off line. Length 3 inches.

Per Doz

No. 550—Wt each ½ oz.... $12 75

COMBINATION LINE AND SURFACE LEVEL

Attached with patented spring clips, can be used either with line or on flat or circular surfaces for leveling. Length 3 inches. Per Doz

No. 552—Wt each ⅝ oz..... $18 75

One doz in cardboard box.

LINE AND SURFACE LEVELS

HALLS

An accurate proved level glass placed in octagon aluminum tube with spring nickel silver twin hooks attached at each end by two nickel silver rivets that pass through the tube and each pair of hooks holding them firmly in place. A metal carrier is provided to hold the level in place allowing it to rest on the under flat plumbing door and window frames. The most important feature is its use on a line for laying out foundations, grading, sewering and all classes of construction. Per Doz

No. 1921—Length 3 ins $12 75

One doz in cardboard box; wt per doz ½ lb.

POCKET LEVELS

STANLEY

Iron body, japanned, steel set screw, can be attached to any straight edge or carpenter's square. Length 3¼ in. Per Doz

No. 40—Iron top plate..... $5 85

No. 41—Brass top plate..... 8 00

FIRE PROOF SAFES

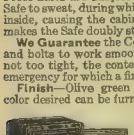
COLUMBIAN SAFE AND LOCK CO.

One piece flanged front and back air chamber. The back and front is a solid one piece, formed by flanging a square steel plate on a powerful machine—the front is then died out, forming the door frame—the door is thus made from the part that has been cut out in making the frame. After this process the front and backs are electrically welded to a solid one piece of sheet steel, which forms the top, bottom and sides, eliminating rivets, etc., which makes as nearly a solid construction as is possible to make.

An important feature, found in no other make, is an air chamber all around the inside, top, bottom, back and sides of the Safe. This air chamber is made of a double cabinet, one contained in the other, so there is a space of ¾ of an inch all around. This is done to eliminate a common complaint to which all Fire Proof Safes are subject—that is, dampness, which causes the Safe to sweat, during which process this sweat will go toward the inside, causing the cabinet work to warp. This air chamber makes the Safe doubly strong and secure in case of fire.

We Guarantee the Columbian Safes to be dry, and the locks and bolts to work smoothly, the doors will fit—not too loose, not too tight, the contents will be protected from fire in any emergency for which a fire-proof safe is intended.

Finish—Olive green (unless black is specified) any other color desired can be furnished at additional cost.



Single outside door fitted with combination locks unless key locks are specially ordered.

Customer's name painted on safes free of charge.

FIRE PROOF SAFES

COLUMBIAN SAFE AND LOCK CO.

With Burglar Chests.

Same general construction as safes shown on preceding pages with the exception of being fitted with burglar chests.

The chests are of five-ply steel, the door is hung on crane hinges, closed with lever eccentric pressure. Door and frame is made a tenon and groove style, asbestos packed. The bolt work is double acting, made of 1-inch cold rolled round calendar steel, and securely locked with an unpickable combination lock. The dial and handle are so made that they cannot be driven in or out.

STEEL LOCKERS

DURAND

Wherever there is need for sanitary fireproof and indestructible lockers in schools, colleges, factories, clubs, stores and offices, Durand Steel Lockers have given unequaled satisfaction.

Carefully constructed of best furniture steel. The doors are fitted with invisible hinges, securely riveted on inside of doors. All doors are fitted with Yale or Miller flat key locks, masterkeyed. Perfectly ventilated and comparatively dust-proof.

The entire locker, inside and out, is finished in two coats of black japan or olive green enamel, each coat baked on at 400° temperature. It is the most durable covering to apply to steel, will not peel or crack, can be washed without destroying the glossy finish.

Shipped knocked down to save excessive freight charges, but are easily assembled as all parts fit accurately.

Sizes given below are standard, other sizes can be made up special.

Note—When ordering, specify finish wanted.

Adam Brown walnut finish. Contains No. R60 Fada 6 Unit, two dial control with window indicators on the control drums. Without speaker and loop. Necessary equipment to complete consists of the following: 5-CX301A tubes; 1-CX-371 power tube; 4-486 "B" batteries; 2-768 "C" batteries; 1-96RX "A" battery; 1-415 or 425A loud speaker; 1-223 aerial outfit. A-603 and B-604 socket powers may be used in place of "A" and "B" batteries.

No. SF10-60 Length, 49 inches; height, 33 inches; depth, 14 inches; weight, 120 lbs. ..... Each, **$225.00**

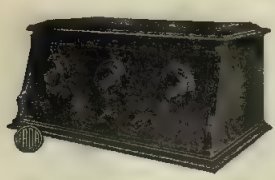
Specifications of No. R60 Fada 6 Unit

Three stages of radio frequency, detector, and two stages of audio frequency amplification with circuit arrangement in the last stage adapting it fully to the modern types of power tubes. It is shielded, the shielding applying both to the radio end and to the audio end.

NOTES: Prices listed are for Sets only, no Accessories included. Fada Radio Sets are sold to Authorized Dealers, Ohio Territory only.

RADIO RECEIVING SETS

FADA



Neutroceiver

Has a black bakelite panel mounted at an angle into a beautiful dark mahogany cabinet. The cabinet top is hinged for insertion of tubes

Specifications:

Three tuning dials Five tubes. For both dry cell and storage battery tubes. Detector voltage 22½ volts; amplifier voltage 180 volts. If "C" battery is used 1½ to 27½ volts Two stages of tuned neutralized radio frequency amplification. Two stages of audio frequency amplification. Tube detector. Neutrodyne circuit. Single switch for amplification and circuit control. Two rheostat controls. Inclined panel. Necessary equipment to complete No. 175A set consists of the following: Four CX301A tubes; one CX371 power tube; four No. 772 "B" batteries; one, 768 "C" battery and one 771 "C" battery; one 96RX "A" battery; one No. 223 antenna outfit. One No. 415A Fada speaker. No. AB663 socket power may be used instead of "A" and "B" batteries. Equipped with power leads.

No. 175A Fada Neutroceiver Size of cabinet. Length, 25 inches; Depth, 17 inches; Height, 12 inches... . . ..Each, **$125.00**

Neutrolette

Has a panel mounted at an angle into a beautiful dark walnut cabinet. The cabinet top is hinged for insertion of tubes

Specifications:

Three tuning dials Five tubes. For both dry cell and storage battery tubes. Detector voltage 22½ volts; amplifier voltage 180 volts. If "C" battery is used 1½ to 27½ volts. Two stages of tuned neutralized radio frequency amplification. Two stages of audio frequency amplification. Tube detector. Neutrodyne circuit. Cabinet similar to 175A but about one-third smaller. Singular control switch. Two rheostat controls. Inclined panel. Necessary equipment to complete No. 192A set consists of the following: Four CX301A tubes; one CX371 power tube; four No. 772 "B" batteries; one, 768 "C" battery and one 771 "C" battery; one 96RX "A" battery; one No. 330 antenna outfit; No. 415A loud speaker. No. AB663 socket power may be used instead of "A" and "B" batteries. Equipped with power leads.

No. 192A Fada Neutrolette Size of cabinet: Length, 22⅛ inches; depth, 13¼ inches; height, 9⅞ inches.....Each, **$85.00**

Neutrola

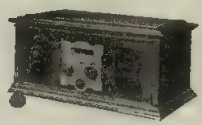
The receiver is encased in a beautifully finished dark mahogany cabinet, the inclined Neutrodyne receiver panel unit being enclosed by a drop desk-door and the upper part of the receiver cabinet which contains the loud speaker is very artistically decorated with a wooden inlay.

Provision is also made in the "Neutrola" cabinet for containing batteries. The self-contained loud speaker needs no adjustment and gives a surprising purity of tone reproduction.

Specifications:

Three tuning dials. Five tubes. For both dry cell and storage battery tubes. Detector voltage 22½ volts; amplifier voltage 180 volts. If "C" battery is used 1½ to 27½ volts. Two stages of tuned neutralized radio frequency amplification. Two stages of audio frequency amplification. Tube detector. Neutrodyne circuit. Single switch for amplifier and circuit control. Two rheostat controls Inclined panel. Necessary equipment to complete No. 185A set consists of the following: Four CX301A tubes; one CX371 power tube; four No. 486 "B" batteries; one No. 768 "C" battery and one 771 "C" battery; one 96RX "A" battery; one No. 223 antenna outfit. No. AB663 socket power may be used instead of "A" and "B" batteries Equipped with power leads.

No. 185A Fada Neutrola Size of cabinet: length, 27 inches; depth, 17 inches; height, 21 inches.....Each, **$175.00**



Fada 6

This is a six tube receiver having three stages of radio frequency, detector, and two stages of audio frequency amplification, with circuit arrangement in the last stage, adapting it fully to the modern types of power tubes. It is shielded, the shielding applying both to the radio end and to the audio end.

The same character of control switch is used as on the **Fada 8**, and you can operate it either on one audio stage or two audio stages, yet the power tube is always in use, so either on high volume or on low volume the "perfect quality" of reproduction is available.

The same special high-grade combination straight line frequency and straight line wave length condensers are used—the condensers with the big one-half-inch shaft offer the nearest possible approach to perfection as regards tracking, both electrically and mechanically.

Audio frequency transformers of the "all range" type which amplify musical notes throughout the scale range with practically uniform intensity.

The same desirable two dial control with window indicators on the control drums are incorporated.

Construction similar to that of the **Fada 8**, but somewhat smaller in mechanical dimensions. Equipped with loop. Necessary equipment to complete No. 460A set consists of the following: Five CX301A tubes; one CX371 power tube; four 486 "B" batteries; two No 768 "C" battery; one 96RX "A" battery; one No. 223 antenna outfit One No. 415 or No. 425A Loud Speaker. No. AB663 Socket Power may be used instead of "A" and "B" Batteries. Equipped with power leads

No. 460A Fada Six Size of cabinet: length, 25 inches; depth, 13½ inches; height, 11 inches .....Each, **$160.00**

NOTE: Prices listed are for Sets only, no accessories included. Fada Radio Sets are sold to Authorized Dealers, Ohio Territory only.

RADIO RECEIVING SETS
FADA

No. SF50/80
Fada 8, Console

There are **Four Stages of Radio Frequency Amplification,** and three stages of audio frequency amplification, each stage operating efficiently. This makes the **Fada 8,** the most sensitive set yet devised. The advantages of the third stage of audio frequency amplification are distinctly noticeable in the performance — a reserve volume with maintained clarity.

Full shielding on tubes and coils and on **Audio Stages.**

This practically eliminates "back-door" reception that interferes with the desired station in sets not so protected. Inter-action between the detector and the audio stages is definitely eliminated. **Unless the audio stages are shielded, the receiver is not TOTALLY SHIELDED.** The radio world has never known a receiver so pick up proof as the new **Fada 8.**

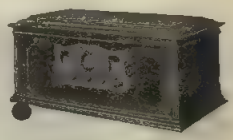
Combination Straight Line Frequency and Straight Line Wave Length Condensers. Straight line frequency for the lower wave lengths, and straight line wave length for the higher stations. These condensers simplify tuning, stabilize selectivity and distribute stations equi-distantly over the dial.

A Control Switch on the face of the panel gives instant on and off operation and **also connection at will to one, two or three audio stages.**

The Power Tube is always on the last stage—it cannot loaf—it is always in use. When operating on six tubes the circuit carries direct from the detector tube to the last audio stage, which carries the power tube. When operating on seven tubes the circuit carries direct from the detector tube through one of the audio stages and then to the power tube. The power tube is never out of circuit. The operator may be certain of the greatest volume and of maximum distance on whatever audio stage he chooses. Reception may be throttled down without the slightest loss in quality.

A specially designed circuit in the last audio stage.

This adapts the set for use with any of the modern power tubes It keeps the direct current out of the loud speaker circuit and insures clear reception unmarred by "waste" current through the speaker All the volume you need without "choking".



No 480-A

Fada 8, Table Type

A Volt Meter with Selector Switch to measure accurately **all** voltages; the voltage on the filaments of the tubes, and seperate individual measurements for the voltage on the plate circuit of the detector tube, on the plate circuit of the radio amplifier tubes, on the plate circuit of the first two audio stage tubes, and on the plate circuit of the power tubes. You can determine instantly if you are applying proper voltages to any and all of the tubes. This enables the owner to save his batteries and to prolong the periods between chargings and if a power device is used, it ensures that the power device is delivering voltages which will permit the set to function at full efficiency.

A **Small Loop** is all that is necessary for normal operation, yet termina connections are provided which will permit use with either a long antenna or a short antenna It is a universal set—adapted to either loop or antenna operation. The loop is of such size that it can be permanently housed within the cabinet. When connected to an antenna, the receiver has practically an unlimited range No radio receiver heretofore designed can accomplish what this receiver can accomplish

Two controls are used. Simpler than the characteristic three control set

Sockets are of the push type, adapted to the standard types of tube bases

There is a jack on the face of the panel for head phone connection.

The window indicators for the control drums are sunk into the face of the panel in such a manner that full sight of the drums is obtained both in a sitting position and standing position

It has a chassis of structural steel. Its extremely rigid construction insures permanent alignment of all parts.

Half-inch diameter condenser shaft is used throughout. **It is four times as strong as the standard shaft of ¼-inch diameter.**

There is multiple radio frequency amplification and the set has improved audio frequency transformers of the "all range" type to guard against distortion and the undue stressing of any one frequency.

Necessary Equipment to complete No 480A and No. SF50/80 consists of the following. Six CX301A, One CX300A and One CX371 Tubes; Four 486B Batteries; Two No. 768 "C" battery; One No. 96RX "A" Battery, One No. A603 Socket Power may be substituted for the "A" Battery and One No. B604 Socket Power may be substituted for the "B" Batteries: One No. 223 Aerial Outfit may be used if desired. Loop furnished with set; One No. 415A or 425A Loud Speaker with power leads.

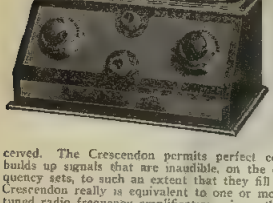
No. 480A. Size of Cabinet; Length, 32 inches; Depth, 16 inches, Height, 14 inches . . . . . Each, **$300.00**
No. SF50/80. Size of Cabinet; Length, 32 inches; Depth, 18½ inches, Height, 53¾ inches . . . . . Each, **$400.00**

Note:—Prices listed are for Sets only, no accessories included.

Fada Radio Sets are sold to Authorized Dealers, Ohio Territory only.

RADIO RECEIVING SETS

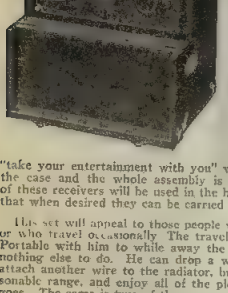
CROSLEY



Four Tube 4-29

The Crosley 4-29 is a four-tube radio cosisting of one stage of tuned radio frequency amplification. Crescendon control detector and two stages of audio frequency amplification Ample volume to operate a loud speaker is provided, even when stations at very great distances are being received. The Crescendon permits perfect control of volume and builds up signals that are inaudible on the other tuned radio frequency sets, to such an extent that they fill an entire room. This Crescendon really is equivalent to one or more additional tubes of tuned radio frequency amplification giving this attractive receiving set unusual punch, pep selectivity, sensitivity and volume. Necessary equipment to complete No. 4-29—Four No. CX301A Tubes; One No. 76RX Storage Battery; One No. 771 "C" Battery, two No. 772 "B" Batteries, No. 3121 Musicone Loud Speaker One No. 330 Antenna Outfit and one 3 megohm grid leak.

No. 4-29 Size of Cabinet: Width, 15¼ inches; Depth, 8 inches; Height Over All, 7⅜ inches; Weight, 6½ Lbs... .Each, **$29.00**



Four Tube 4-29 Portable

Dealers can install all the necessary batteries, tubes, etc., so the customer can carry the 4-29 Portable home absolutely complete. This eliminates the danger of a novice damaging his tubes through incorrect battery connection. All the customer need do is attach the aerial and ground wires and tune in It is absolutely self-contained

Unlike most portable receivers, the case of the 4 29 Portable has ample room for a real power plant of batteries instead of a limited space for flashlight batteries, which have a very short life, even on dry cell tubes. It is so arranged that you can readily "take your entertainment with you" wherever you go, the style of the case and the whole assembly is so attractive that thousands of these receivers will be used in the homes primarily, with the idea that when desired they can be carried along wherever you go

This set will appeal to those people who are traveling extensively or who travel occasionally The traveler can take the Crosley 4 29 Portable with him to while away the evening hours when there is nothing else to do. He can drop a wire out of his hotel window, attach another wire to the radiator, bring to stations within a reasonable range, and enjoy all of the pleasures of radio wherever he goes. The same is true of the camper and the automobile tourist.

The Crosley 4-29 Portable is light and convenient, and can be used efficiently on a small antenna, is recommended for canoes, motor boats, yachts and for travelers on ocean voyages and on board trams.

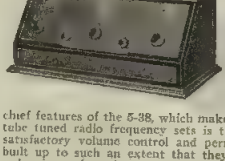
The Crosley 4-29 Portable will give, in the way of service, everything that can be obtained from the 4-29 Regular, but this new portable receiver adds the portability feature to the advantages of the standard 4-29, which was designed primarily for use in one place

Necessary equipment to complete No. 4-29 Portable: Four No. CX299 Tubes, Three No. 7111 "A" Batteries; Two No. 772 "B" Batteries; One No. 771 "C" Battery; No. 3121 Musicone Loud Speaker; One No. 330 Aerial Outfit and One 3 megohm Grid Leak

No. 4-29 Portable Size of Leatherette covered Carrying Case Width, 14½ inches; Depth, 8½ inches, Height Overall, 13⅝ inches; Weight, 10¾ Lbs. .....Each, **$33.00**

"NOTE: Prices listed are for Sets only, no Accessories included.

CROSLEY

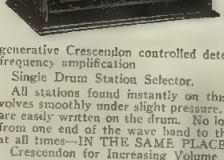


Five Tube 5-38

The Crosley 5-38 is a five-tube radio receiver, consisting of two stages of tuned radio frequency amplification, detector with Crescendon control of the second radio frequency stage, plus two stages of audio frequency amplification. The cabinet is of hardwood, with two-tone mahogany finish. One of the chief features of the 5-38, which makes it far better than other five-tube tuned radio frequency sets is the Crescendon which provides satisfactory volume control and permits very weak signals to be built up to such an extent that they fill an entire room. Sectors and pointers have been removed from the front and have been replaced with neatly designed frames with glasses through which dial markings are read.

Necessary equipment to complete No. 5-38: Five No. CX301A tubes; One No. 96RX Storage Battery; Two No. 772 "B" Batteries; One No. 771 "C" Battery; No. 3120 Musicone Loud Speaker; One No. 330 Antenna Outfit and One 3 megohm Grid Leak.

No. 5-38 Size of Cabinet: Width, 19½ inches; Depth, 9¾ inches; Height Overall, 8½ inches; Weight, 8½ Lbs.....Each, **$38.00**



Five Tube 5-50

The Crosley 5-50 is a five-tube radio, with single control, embodied in its drum station selector, all metal shielded chassis, power tube adaptability and many exclusive features enclosed in a beautifully designed solid mahogany two-toned cabinet. It incorporates two stages of non-oscillating tuned radio frequency amplification, regenerative Crescendon controlled detector and two stages of audio frequency amplification

Single Drum Station Selector.

All stations found instantly on this ONE single control. It revolves smoothly under slight pressure. Once stations are found they are easily written on the drum. No log book to fuss with. Stations from one end of the wave band to the other are easily brought in at all times—IN THE SAME PLACE.

Crescendon for Increasing Volume

This exclusive Crosley feature supplies the volume from distant stations that is so unfortunately missing on most 5-tube sets. On the normal radio when ears are strained to catch the stations many leagues away, a turn of the Crescendon swells the reception to room filling volume.

Acuminators (from the verb "accuminate," meaning to sharpen) affording marvelous selectivity.

By means of these two adjustment levers very sharp tuning is accomplished where the reception from nearby stations spreads broadly over the dial. Under average conditions when once adjusted these acuminators do not have to be touched again except on weak distant stations

Power Tube Adaptability.

Means have been provided for use of a power tube in the last audio-frequency stage

Shielded units mounted on metal chassis, giving far greater reception efficiency.

Crosley Models, including the 5-50, 5-75 and R.F.L.-50, use the new metal chassis which furnishes a substantial frame for mounting the elements. This effects excellent alignment of the gang of condensers, as well as affording a mounting for a rheostat, acuminators, crescendon, coils, sockets, transformers and insulation terminal strip. This metal shielded chassis is divided into three compartments Thus the units shielded from each other prevent inter-stage as well as external coupling This improves the stability of the circuit and increases the selectivity as well. The metal shielded chassis is, indeed, a most progressive step in advanced radio design.

Necessary equipment to complete No. 5-50: Five No. CX301A Tubes, One No. 96RX Storage Battery; Two No. 772 "B" Batteries; One No. 771 "C" Battery; No. 3120 Musicone Loud Speaker; One No. 330 Antenna Outfit and One 3 megohm Grid Leak.

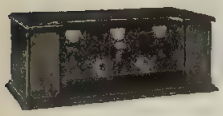
No. 5-50 Size of Cabinet: Width, 20½ inches; Depth, 12½ inches, Height Overall, 10¼ inches; Weight, 15½ Lbs.....Each, **$50.00**

"Crosley Radio Sets are sold to Authorized Dealers Only.

RADIO RECEIVING SETS

CROSLEY

Five Tube R.F.L.-75



The R.F.L.-75 is a five-tube set in a two-toned mahogany cabinet and using a genuine R.F.L. circuit which provides true cascade amplification largely through the use, in each radio frequency stage, of a complete Wheatstone bridge whose balance is practically uniform at all wave lengths. Non-oscillating at any frequency, non-radiating, and cannot be made to howl even if mishandled.

A considerable saving in cost was made by eliminating the decorated bakelite panels and the substitution of wood panels with windows that permit the operator to observe the otherwise concealed dials. Pointers have been eliminated from the front panels. These changes, while affecting a saving, have, at the same time, made the set actually more attractive.

Necessary equipment to complete No. R.F.L.-75: Five No. CX301A Tubes; one No. 96RX Storage Battery; one No. 771 "C" Battery, two No. 486 "B" Batteries; No. 3123 Super Musicone Loud Speaker; No. 223 Antenna Outfit and 3 megohm Grid Leak.

No. R.F.L.-75 Size of cabinet: width, 26½ inches; depth, 12¾ inches; height overall, 10½ inches; weight, 20 lbs.....Each, **$65.00**

Five Tube 5-75

The 5-75 is a five-tube set in a solid mahogany two-toned console cabinet, with a built-in Musicone. The receiving set itself is the same as that used in the Model 5-50, with its single drum station selector, shielded chassis, power tube adaptability, etc. It incorporates two stages of non-oscillating tuned radio frequency amplification, regenerative crescendon controlled detector and two stages of audio frequency amplification. The Musicone is cleverly concealed in the compartment below the set, and in this compartment there is ample room for all batteries or battery eliminators. It is completely self-contained, the unsightly wires and batteries being hid from view

Necessary equipment to complete No. 5-75: Five No. CX301A Tubes; one No. 96RX Storage Battery; One No. 771 "C" Battery, two No. 486 "B" Batteries; No. 223 Antenna Outfit and 3 megohm Grid Leak.

No. 5-75 Size of cabinet: width, 23⅛ inches; depth, 11⅞ inches; height overall, 40½ inches; weight, 83½ lbs.....Each, **$75.00**

CROSLEY

Six Tube R.F.L.-90

The R.F.L.-90 is a six tube receiving set, using the now famous non-oscillating R.F.L. circuit and incorporating the new double drum station selector. This circuit, with the new metal chassis, installed in a beautiful solid mahogany two-toned console cabinet, with a built-in Musicone forms a radio for which there will be an immediate and tremendous demand. It includes the very latest of radio refinements, is exceptionally attractive in appearance and meets the requirements of those listeners who are most particular about the appearance of their set. There is ample space inside the cabinet for batteries or battery eliminators, making it absolutely self-contained. The R.F.L.-90 is a genuine long-distance receiver, utilizing a circuit that has become exceptionally popular and has proven its worth during the past year.

Necessary equipment to complete No. R.F.L.-90: Six No. CX301A Tubes; One No. 96RX Storage Battery; One No. 771 "C" Battery; Two No. 486 "B" Batteries; No. 223 Antenna Outfit and One 3 megohm Grid Leak.

No. R.F.L.-90 Size of cabinet: width, 30½ inches, depth, 12 inches; height overall, 41 inches; weight, 36 lbs. .....Each, **$90.00**

PHONOGRAPH PANEL UNITS
FADA NEUTRODYNE

Cut shows Phonograph with Panel and Tone Arm Unit installed.

Five tubes are used which may be of either dry cell or storage battery type. The circuit using five tubes provides two stages of radio frequency amplification, detector and two stages of audio frequency amplification. Standard Neutroformers with the special FADA 'Low Loss' Condensers are used. Two different types of these Phonograph Panel Units are available, one the No. 196-A, designed to be fitted into Victor model Nos. VV-S-400, VV S-405 and VV-S-410 console phonographs. No 197-A designed to be fitted into the Victor model No. VV-S-215 console phonograph. May also be used in other standard phonograph models than those mentioned. Panel Units include the use of the newly designed FADA amplifier selector switch used in the "Neutroceiver" and "Neutrola". This control switch in the amplifying circuit, combined with the universal tuning advantages of Neutrodyne receivers provides simplicity of operation. Under favorable conditions, using either a simple indoor, or single wire outdoor antenna, the conservative normal range of reception should approximate 1000 miles. Necessary equipment to complete No. 196-A and No. 197 A panel units consists of the following: Five CX301-A Tubes; Two No. 767 "B" Batteries, One No. 771 "C" Battery; One No. 76RX "A" Battery, One No. 193A Tone Arm. One No. 223 Antenna Outfit

No. 196-A FADA 5 Tube Phonograph Panel Unit for Victor Models VV-S-400, VV-S-405 and VV-S-410, Panel 15 3-16 inches x 16 27-32 inches .....Each, **$100.00**

No. 197-A FADA 5 Tube Phonograph Panel Unit for Victor Model VV-S-215; Panel 14½ inches x 17 13-32 inches.....Each, **$100.00**

Note: Prices listed are for Sets only, no Accessories included.

Crosley and Fada Radio Sets are sold to Authorized Dealers only.

PLASTERING HAWKS

MARSHALLTOWN, Wood.

California Red Wood cross pieces dove tailed and glued; securely fastened. A cast nut to receive the handle is placed between the top board and dove tailed cross piece; which makes handle rigid.

No.	22
Size, ins	13½x13½
Wt doz, lbs	26
Per Doz	$34 50

Third doz in cardboard box.

MARSHALLTOWN, Aluminum

Hard rolled aluminum and weighs about the same as wood hawks. The handles are detachable with a 4 inch flange hub extends ⅛ of an inch, to receive thread on handle, fitted with soft rubber callous preventors.

Nos.	1	2
Size, ins	13x13	13½x13½
Wt doz. lbs	18	20
Per Doz	$69 00	72 00

Quarter doz in cardboard box

COMPETITIVE, Aluminum.

Tempered aluminum, highly polished, light in weight, strong and durable, will not warp. 3½ inch aluminum punched flange fastened with four countersunk rivets, hexagon nut in center of flange to fasten shaped wood handle. Face of hawk ground rough so that plaster will not run off. Per Doz

No. 13—Size 13x13 ins $61 50

Quarter doz in cardboard box; wt per doz 20 lbs

CALLOUS PREVENTERS

Good quality gray sponge rubber, soft and flexible. For use on plaster's hawks. Per Doz

No. 0—Diam 3¾ ins; ¼ in. thick.. $6 75

Packed loose; wt per doz ¾ lb.

CORK FLOATS, Plasterers'.

One thickness cork, finished on both sides, with smooth surface.

Used by plasterers in putting on rough or sanded finish (stippelen)preparatory to calcimining.

Nos.	10	20	40

No. C6536—30—W't 4½ lbs., per set $7.65

ONE SET IN A BOX

STANDARD TAPPET WRENCH SET

Tappet rods on poppet valves should be adjusted often—if the motor is to be expected to run quietly.

Special wrenches are needed because the adjusting nut and check nuts are thin.

For easy adjustment, the wrenches must meet the exacting conditions; that is, they must be long and thin and generally must be used in pairs, and must be made of high carbon steel. Contains: 8 double-end wrenches, 16 openings.

Wrench No.	Wrench Opening Sizes Inches	Length Inches	Thickness Inches
2—F201	3/8, 7/16	7	1/8
1—F203	1/2, 9/16	7	1/8

Finish: Burnished nickel, hardened, edges round, openings accurate.

No. C6506—200—Shipping w't 1¾ lb., per set $3.65

EACH SET IN CANVAS ROLL

Hibbard HARDWARE for HARD WEAR

MOSSBERG WRENCHES

SMALL SERIES SOCKETS

For owner work there are no wrenches which compare with drawn steel sockets as Mossberg sockets.

Sockets are marked to exact opening of sockets. The marking of each socket represents the short diameter of nuts, bolt heads and screw heads plus the clearance.

Construction: Drawn by pressure from cold rolled steel, thereby retaining the necessary long grain in structure.

Finish: Mottled and lacquered.

Sizes marked ★ are shipped from factory only

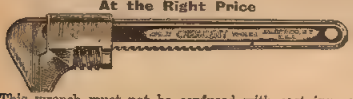
A CRESCENT WRENCH FOR ALL-AROUND USE

At the Right Price



This wrench must not be confused with cast iron and malleable wrenches of the same type. It is a tool of value; one that upholds the Crescent reputation for dependability.

A sturdy, general purpose tool, entirely forged from special analysis steel. Hardened and oil tempered.

Teeth in handle accurately milled, giving ease of adjustment. Face of jaws are also milled, so that they grip along their entire surface.

Spring under adjusting knurl holds jaw set until adjustment is changed.

Adjusting knurl turned from a solid bar of steel and hardened.

Hand polished finish, giving a splendid appearance.

No. C6500—019—9 in. long, with a capacity, fully open, of 3 in. Length of jaw 1⅛ in. W't per doz. 12 lbs., per dozen $13.35

Our Very Best for Fifty Years Has Stood the Test

ELECTRIC TRACK—"O" GAUGE

No. C400—Curved electric track made of heavy rolled tin plate, length 10¼ in., w't per doz. sections 1¾ lbs., per dozen sections $2.55

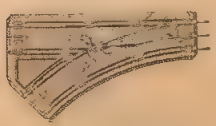
No. C401—Straight track, made of heavy rolled tin plate, length 10¼ in., w't per doz. sections 1¾ lbs., per dozen sections $2.55

CROSSOVERS

No. C402—Electric crossovers, made of heavy pressed tin plate, length 10¼ in., w't per doz. 2½ lbs., per dozen $16 90

ALL ABOVE, ONE DOZEN IN A BOX

SWITCHES



No. C445—Automatic Electric Switch for No. 0 gauge track. It consists of one left hand automatic switch and one right hand, hand switch. Sold in pairs, per dozen pairs $54.90

ONE PAIR IN A BOX

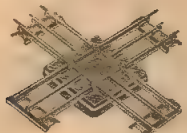
"Made in America" American Flyer "The Train with the Guarantee" Registered U.S. Patent Office

ELECTRIC TRACK—WIDE GAUGE 2¼ IN.

No. C4400—Curved track units, 2¼ gauge. Eight pieces make a circle, length 16¼ in....per dozen sections $5.00

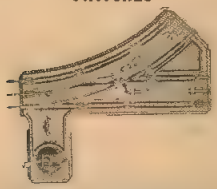
No. C4401—Straight track units, 2¼ gauge, length 14 in., per dozen sections.....$5.00

CROSSOVERS



No. C4409—90 degree crossover .....per dozen $22.75
ALL ABOVE, ONE DOZEN IN A BOX

SWITCHES



No. C4405—Automatic Electric Switch, for wide gauge 2¼ in. electric track Sold in pairs, per dozen pairs $95.00
ONE PAIR IN A BOX

ARC LIGHTS

No. C2109

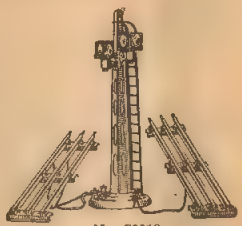
No. C2109—Single Arc Light, height 9⅝ in...per dozen $25.35

No. C2110—Double Arc Light, height 9⅝ in...per dozen $38.00

No. C2110

SIGNAL LIGHTS

No. C2017.



No. C2018

No. C2017—Enameled green and black, red signal light, complete with track and terminal for No. 0 gauge track, height 9⅝ in., w't per doz. 3 lbs.....per dozen $33 75

No. C2018—Automatic Block Signal Lights with two Special Tracks, **for No. 0 gauge track,** height 9⅝ in. ..... per dozen $60.75

No. C4018—Automatic Block Signal Lights, with two special tracks, **for wide gauge 2¼ in. track,** height 9⅝ in., w't per doz. 3 lbs..... .per dozen $65.90

TRACK TERMINALS

No. C450—For 0 gauge track.....per dozen $5.10

No. C4450—For wide gauge 2¼ in. track, per dozen $5.10

No. C4455—Universal Terminal with wires, for either wide gauge 2¼ in. track or 0 gauge track, per dozen $6.75

ELECTRIC LIGHT BULBS

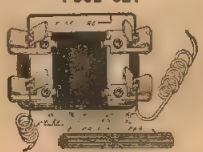
No. C432—8 volt, clear.....per dozen $5.00

No. C433—14 volt, frosted, large size for arc light .....per dozen $7.55

No. C434—14 volt, red, small size for danger signals .....per dozen $5 10

No. C438—14 volt, clear, for locomotive and cars .....per dozen $5.10

FUSE SET



No. C460—Used between transformer and track terminal to prevent overheating or sparking in the event of a short circuit .....per dozen $6.00

Made in America
American Flyer
The Train with the Guarantee
Registered U.S. Patent Office

AUTOMATIC TRAIN CONTROLS

By operating this control train can be started or stopped any place on the track.

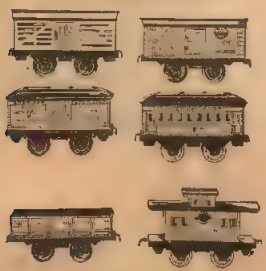
No. C2033—For 0 gauge track, per dozen $95.00

No. C4033—For wide gauge, 2¼ in. track..... per dozen $95.00

OIL TANK CAR

No. C1118—Double Truck for No. 0 gauge track, per dozen $16.90

CAR ASSORTMENTS



No. C1125—Consists of six cars, Nos. 1107, 1108, 1109, 1110, 1111 and 1119 for No 0 gauge track, per assortment $3.10

AUTOMATIC CROSSING GATES

Height 10½ in.

No. C2032 — For 0 gauge track, per dozen $76.00

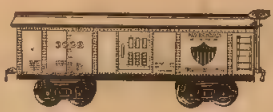
No. C4032—For wide gauge, 2¼ in. track, per dozen $80.20

DOUBLE TRUCK CARS

No. C1117—Caboose, 6½ in., for 0 gauge track, per dozen $12.65

No. C3006—Lock Car, 9½ in., for 0 gauge track, per dozen $25.35

No. C3007—Sand Car, 9½ in., for 0 gauge track, per dozen $25.35



No. C3008—Box Car, 9½ in., for 0 gauge track, per dozen $29.55

AUTOMOBILE WRENCHES

BILLINGS & SPENCER DISPLAYBOARD

Display board 26 inches long, 9 9/16 inches wide. Hooks are premanently fastened and the board is ready for the dealer's immediate use. Set consists of 36 wrenches, 3 each as follows:

Thin Head Check Nut or Tappet, 15° Angle, Double Head Wrenches.

Nos.	Hex Head Cap Screw Size Ins	Size Screw S. A. E. Head and Nut Ins	Milled Openings Ins	Length Ins

Half doz in cardboard box.

BUSHING PIN PUNCHES

High grade steel hammer forged, electrically tempered; will drive out steering knuckle bushings, wrist pin bushings or spring hanger bushings. Per Doz

No. A-600—Length over all 9 ins 13 50 *$6 50*

Half doz in cardboard box; wt per doz 6 lbs.

ANVILS

GUARANTEE—Should a Belknap's Wrought Anvil break at the waist or its steel face become loose within one year from date of purchase it will be replaced without charge.

CAUTION—Tempered in a manner to suit the majority of smiths. No claim for defective temper will be allowed. To remedy trouble caused by the unfair advantage taken of the liberal guarantee heretofore made by manufacturers of wrought anvils, they have decided to qualify the guarantee as above, and all anvils are now sold with no guarantee other than as above.

—BELKNAP'S WROUGHT—

Shoer's.

With Shield.

Each

No. 145S—Diameter hearth 18 ins; height 30 ins; diam fan case 8 ins; diam fan wings 6 ins; ratio 48 to 1 **$20 70**

Crated; shipping wt each 53 lbs.

CHAMPION

With Half Hood.

Note—Hearth should be well clayed before using.

Each

No. 146S—Diameter hearth 18 ins; height 30 ins; diam fan case 8 ins; diam fan wings 6 ins; ratio 48 to 1 **$24 00**

Crated; shipping wt each 52 lbs.

BLOWERS

CHAMPION

Ball-Bearing.

Adjustable fan casing; counter balanced fan crank. Phosphor bronze and tool steel. Adjustable tool steel ball-bearings. Lathe turned cups and cones. Highspeed spiral gearing.

Each

No. 400—Height over all 46 ins; 12 in. fan case; diam fan wings 9½ ins; complete with heavy nest whirlwind tuyere iron and piping **$78 00**

No. 400LT—Same as No. 400, except less tuyere **72 00**

One in crate; wt 156 lbs.

MIDWAY

Cast iron base and standard. Adjustable fan casing, counter balanced fan crank; height over all 46½ inches; diameter base plate 17 inches.

Spiral gearing without small gears or pinions. Dust proof gear casing. Crank turns in either direction. Complete with a center blast and 50 pound nest ball tuyere iron

Each

No. 70—12 in. fan case; daim fan wings 9½ ins; supplied with 50 lb center blast, heavy nest ball tuyere iron and..... **$70 50**

One in crate; wt 142 lbs.

BLOWERS

"HOT BLAST"

Benttubular steel legs, cast iron gear case, painted green.

Direct drive, cut gears are enclosed in a dust-proof, self-oiling case. Crank turns either direction. Case hardened end thrust ball-bearing, high speed spindle.

Each

No. 60—Height over all 46 ins; diam of fan case 12 ins; diam fan wings 9¾ ins; complete with tuyere iron and pipe $48 75

No. 60LT Same as No. 60, except less tuyere 45 75

One in crate; wt each 93 lbs.

—MOHAWK—

Cast iron base and standard, adjustable fan casing; counter balanced fan crank; height over all 46 inches; diameter base 17 inches. Champion adjustable nozzle tuyere iron.

Case hardened end thrust ball bearing; high speed spindle. Each

No. 40—12 in fan case; diam fan wings 9¾ ins; with tuyere iron and piping complete $48 75

No. 40LT—Same as No. 40, except less tuyere 45 75

One in crate; wt 125 lbs.

"HOT BLAST"

High speed helical gears give 48 revolutions of blast wheel to one of crank. The gear is enclosed in a dust proof, oil tight gear case. Crank turns either direction.

Each

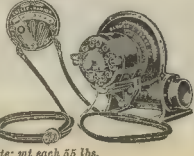
No. 340—Diam fan case 10 ins; diam fan wings 8⅝ ins; mounted on three steel legs, with tuyere iron and pipe complete $33 00

No. 340LT—Same as No. 340, except less tuyere 31 50

Crated; wt each 67 lbs.

CHAMPION, ELECTRIC

Blower furnished with Universal motor, wound for both alternating and direct current, either 110 or 220 volts, with detached rheostat; six speeds. Universal motor built with a hammered steel shaft, phosphor bronze bearings, self-aligning commutator of hard drawn copper with twenty four bars and large flat brushes and silk covered wire. All motors designed and built with sufficient units of power guaranteed to run blower at highest speed and highest pressure open and away from the fire for eight to ten hours without a stop.



For both direct and alternating current, with detached rheostat for six speeds, and steel pressure case. Height over all, 12 inches; floor space occupied; 12x13 inches; diameter of outlet 3 inches. Each

No. 50-110—110 volts, ⅛ H. P. $111 00

No. 50-220—220 volts, ⅛ H. P. 111 00

One in crate; wt each 55 lbs.

BELLOWS

STANDARD

Cross cleated hardwood outside boards, japanned sheet steel cap and funnel, five leaf pattern with rawhide split leather sides or folds; trimmed with ⅝ inch wood mountings; steel side pivots and japanned rear hook; painted red.

WESTERN

Japanned cast iron frame and gear wheels, wrought iron crank, turned steel rollers and axles; will bend 3¼ inch tires or smaller to a circle 30 inch in diameter or larger. Each

No. 2—Geared; length of base 25½ ins; width 6¼ ins; height 12 ins $36 00

Packed loose; wt each 85 lbs.

TIRE BENDERS

WESTERN

Japanned cast iron frame and gear wheels, wrought iron crank, turned steel rollers and axles; will bend 5 inch tire or smaller to a circle 24 inches diameter or larger. Crank may be used on either side of machine. Each

No. 3—Double geared; length of base 24 ins; width 8½ ins; height 16½ ins. $54 75

Packed loose; wt each 157 lbs.

TIRE MEASURING WHEELS

Forged steel wheel, natural finish, polished steel index hand, japanned malleable iron handle and fork; raised figures and lines. Each

No. 24—Wheel 24 ins in circumference, graduated in ins and eighths. $6 00

One in box; wt per doz about 15 lbs.

SPOKE TENONING MACHINES
PEACE'S IMPROVED

Japanned cast iron frame, chuck, crank and clamp; polished steel spindle, shank and cutter face; tempered tool steel blade. Cuts tenons from ⅛ to 1¼ ins, any length to 3¼ ins; length over all 20 ins. Each

No. 51—With felloe boring attachment and adjustable hollow auger $55 50

One in wood box; wt each about 17 lbs.

D 1

BENCH DRILLS

YANKEE

Cast iron frame, black finish; steel chuck, nickel plated and polished; machine cut gears and bearings; steel table post, feed screw and axle; automatic and friction feeds; adjustable table. Slide at lower end of column carries an adjustable bracket for table. Table can be adjusted vertically by hand wheel and screw, independently of bracket. Furnished with wrench for nut holding table bracket.

Single Speed. Each

No. 1003—For round shank drills up to ¼ in. in diam; diam of shank 1 in; diam of table 4¾ ins; adjustment of table 1¾ ins; diam of hand wheel 3 ins; height over all 18¾ ins.....$34 50

One in wood box; wt each 20 lbs.

Double Speed. Each

No. 1005—For round shank drills up to ½ in. in diam; diam of shank 1 1/16 ins; diam of table 6¾ ins; adjustment of table 1¾ ins; diam of hand wheel 4½ ins; height over all 28 ins.....$57 00

One in wood box; wt each 51 lbs.

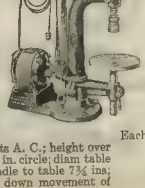
CHAMPION
Automatic Feed.

Feeds four speeds for work from smallest up to ⅜ inch iron or steel. Fly wheel makes two revolutions to each turn of crank. Handle adjustable for length. Ball-bearing spindle end thrust eliminates friction; slotted lathe turned table. Greatest distance from spindle to base 11¼ inches.

Each

No. 104—Height over all 32 ins; swings to center of 12 in. circle; diam back column 1 1/16 ins; diam spindle ⅝ in.; takes ½ in. shank drill bits.....$30 00

Crated; ship wt each 72 lbs.



CHAMPION, ELECTRIC

Cast iron frame, black finish; three jaw steel chuck, nickel plated and polished.

Equipped with ¼ H. P. motor at 1750 R. P. M. driving a two step cone pulley, giving two speeds of the spindle and is of ample size to drill holes up to the full capacity of drill.

Complete with attachment cord and belt.

Each

No. 50E-110—Operates on 110 volts A. C.; height over all 26 ins; drills to center of 10½ in. circle; diam table 8 ins; greatest distance from spindle to table 7¾ ins; adjustable spindle stop; up and down movement of spindle 2½ ins; up and down movement of table 5 ins; drilling capacity ⅜ in.....$135 00

Crated; ship wt each 140 lbs.

POWER BENCH DRILLS

CHAMPION

Driven exclusively by belt and with the aid of cone pulleys two separate and distinct speeds can be furnished.

The countershaft is furnished with a belt shifter on the tight and loose pulley and the feed lever can be returned without affecting position of bit by an automatic device in the feed lever hub.

Double flange top cone; table swings 180 degrees horizontally; end thrust ball-bearing; adjustable spindle stop; greatest distance from spindle to table 7½ inches; up and down movement of the spindle 2½ inches; up and down of the table 7 inches.

Each

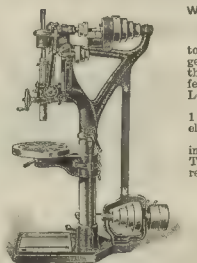
No. 50—Diam of table 8 ins; drills to center of 10 in. circle; drilling capacity ⅜ in; in steel, fitted with champion 3 jaw chuck taking straight shank bits up to ½ inch; size of tight and loose pulleys 4x1½ ins; speed of driving pulley 650 R P M; extreme height 27½ ins.....$73 50

One in crate; shipping wt each 72 lbs.

POWER FLOOR DRILLS

CHAMPION BACK-GEARED

With Iron Standard and Base.



Drills accurately holes up to 1¼ ins. Machine cut gears. Eight speeds with three distinct and complete feeds—Power, Wheel and Lever-Feed.

Power required to operate 1 H. P. gasoline engine or electric motor.

Speed 300 R. P. M.; hole in spindle bored to fit Morse Taper No. 4. Floor space required, 16x44 inches.

Each

No. 21—Drills to center of circle, 21 ins; height, 77 ins; distance between table and spindle, 27 ins; distance between spindle and base, 45 ins; distance from column to center spindle, 10¾ ins; diam columns, 6½ ins; diam table, 16 ins; diam spindle, 1 1/16 ins; size, tight and loose pulleys, 8x2¾ ins.....$525 00

Crated; wt each 915 lbs.

The Blue Grass Trade Mark on a Tool means much to Dealer and user, because it indicates a quality article made and finished as good as is possible to produce. There are no better Tools than Blue Grass.

Hibbard STAINLESS STEEL POCKET KNIVES

A stainless pocket knife that will not rust, stain, tarnish, discolor or corrode. A knife that really has a lasting, sharp cutting edge.

STAYS SHARP — STAYS BRIGHT

THE KNIFE THAT WILL LAST A LIFETIME

The ideal knife for campers, sportsmen, fishermen, tourists, farmers, mechanics, office men, or anyone that carries a pocket knife. Give wonderful satisfaction and pleasure in use. Many pocket knives are discarded after they become rusty and dirty looking. Hibbard Stainless Steel Pocket Knives always remain bright and shiny and always have that new and clean appearance, as there is nothing to rust and nothing to stain.

The attractive window display we send along with every order for these assortments will sell many Hibbard Stainless Knives for your customers. It catches the eye, makes passers by stop and observe. Sells by suggestion. All dealer has to do is to place a lemon in a mason jar three quarters full of water, stick one of the Hibbard Stainless Pocket Knives and an ordinary old carbon steel pocket knife into same as indicated on large display card. Put the jar, display cards, etc. in a prominent place in show window and big results are bound to follow.

Get after this business at once and before the other fellow beats you to it. It will surprise you how easily you can roll up a volume of business on this item.

Blades are made of Stainless Steel, mirror polished on both sides, brass linings, nickel silver bolsters, rivets and name plate; stainless steel springs, name plate is Stamped STAINLESS STEEL. Length when closed 3 1/16 in.

Hibbard STAINLESS STEEL POCKET KNIVES

Showing the Most Effective Manner in Which to Display them.

NOW WE HAVE IT!

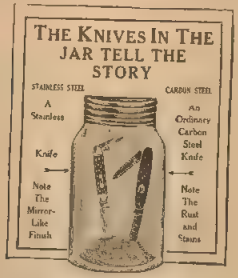
A Stainless Steel Pocket Knife that will not Rust, Stain, Tarnish or Corrode. One that really has a Lasting, Keen Cutting Edge.

STAYS SHARP—STAYS BRIGHT

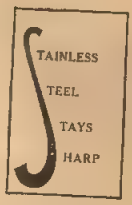
"The Knife that will Last a Life Time"

Paste Banner on Show Window in Conspicuous Place.

Place This Display Card on One Side of Jar.

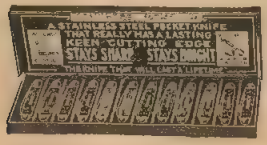


THE KNIVES IN THE JAR TELL THE STORY
STAINLESS STEEL
A Stainless Knife
Note The Mirror-Like Finish
CARBON STEEL
An Ordinary Carbon Steel Knife
Note The Rust and Stains



Place This Display Card on One Side of Jar.

Place lemon on bottom of a mason fruit jar. Stick an ordinary carbon steel pocket knife in lemon on one side and a Hibbard Stainless Steel Pocket Knife opposite same as indicated in cut above. Fill mason jar three-quarters full of water and place near window banner in show window folding back that part of large display card that is cut out, and fit over jar.



A STAINLESS STEEL POCKET KNIFE
THAT REALLY HAS A LASTING
KEEN CUTTING EDGE
STAYS SHARP
STAYS BRIGHT
THE KNIFE THAT WILL LAST A LIFE TIME

Place assortment close to window in front of jar, but not too close as not to obstruct the view of knives in jar.

A small flashlight placed in back of the assortment case so that the rays shine into the jar will aid greatly in bringing out the contrast between the STAINLESS STEEL KNIFE and the carbon steel knife.

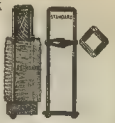
Packed loose.

BRACKETS AND CLAMPS

FOR HAY RACK

Partial view of hayrack made with brackets and clamps.



Section showing manner of construction.

These brackets make the strongest kind of hay racks, as the wood is not weakened by boring holes for bolts where strength is most essential. Set consists of 8 steel clamps, 4 left and 4 right brackets, 8 upper grooved steel washers, 8 lower clips or washers, and 16 nuts.

Per Set

No. 1—With 14 in. clamps, for sills 2x8 ins. and cross pieces 2x4 ins; wt per set 15 lbs $4 20

No. 2—With 16 in. clamps, for sills 2x8 ins, and cross pieces 2x6 ins; wt per set 17 lbs 4 35

One set in wood box.

LITTER CARRIERS

HUDSON

20 gauge galvanized steel tub closely riveted to angle steel frame 1x1x⅛ inch. Ends reinforced at center by 3¾x4⅛x18¼ inch malleable pivot castings. All joints soldered. Heavy angle iron reinforcement completely around top, bottom and sides. Latches at both ends of tub, lock and unlock simultaneously. The tub dumps automatically by means of a trip and is self-cleaning when dumped.

Track wheels gray iron, 5½ inches in diameter, roller bearings steel axles mounted on swiveled wheel frame to permit wheels to take curves without binding on track.

Can be used on 0000 rod track both inside and outside of barn. Can also be used on rigid track inside barn and rod outside track if so desired. **Price does not include track.**

Each

No. 70—Capacity tub 6 bu; length 40 ins; width 22 ins; depth 16 ins ..... ✣$64 50

Packed loose; ship wt each 81 lbs.

LITTER AND FEED CARRIERS

HUDSON

For Use On I Beam Track.

Selected, seasoned and dressed hardwood. Sides ¾ inch thick, ends and cleats 1 inch thick; 24 gauge galvanized steel bottom and ends. Two 1½x⅜ x¾ inch channel steel bails extend to bottom of feed box.

Hoist chain and sprocket geared to give easy lift of load with quick ascent and decent. Combination control clutch and brake gives easy and absolute control of raising and lowering feed-box. Solid steel shaft, cold rolled to 1 1/16 inch diameter, strength reinforced by heavy angle iron steel bar to which shaft is attached. Lifting chain tested to carry several times the weight of loaded feed-box; winds on shaft in open spiral, preventing rubbing and wear on links. Gray iron track wheels 4 inches in diameter, mounted tandem in malleable swivel wheel frame to take curves without binding track. Each
No. 40C—Capacity 16 bu; length 69 ins; width 30 ins; depth 24 ins ✣$115 95
Packed loose; ship wt each 200 lbs.

TRACK EQUIPMENT FOR LITTER AND FEED CARRIERS

I beam type, bends without heating to any desired curve, narrow rounding tread easily bolted to hangers holding track firm and rigid.

Per Ft

Packed loose; wt per doz 20 lbs.

HAY CARRIERS
—BLUE GRASS—

Swivel Reversible, For Double Angle Steel Track.

Malleable iron, finished in blue and gold. The travelers and sheaves throughout revolve upon bushings, thus reducing friction and wear. The lifting pulley is supplied with new patent hook, by means of which the fork can be easily removed without the use of a wrench, at the same time locking it in perfectly when in use.

Throat has large opening and the simple locking mechanism is so arranged that the lifting head or fork pulley cannot fail to enter and lock securely to the carrier. Locks are operated without the use of springs and engage projections upon the lifting head practically in a line with the axis of the pulley.

Diameter of track wheels 3¼ inches; 1 inch tread; height over all 11 inches; length 14 inches.

	Each
No. BG10—With trip block and lifting pulley, **less rope**	$21 30

Packed loose; wt each 23 lbs.

Hay Carrier Outfits.

Hay carrier, track, track fixtures and hay fork pulleys included in this outfit. This does not include Hay Fork, Sling or Rope.

HAY CARRIERS

DIRECTIONS FOR RIGGING HAY CARRIERS

Directions for reversing all our Swivel Carriers.

Pull the carrier to stop block or bumper, allowing the lifting pulley to drop out of the carrier. Take rope out of pulley at end of barn and while standing on the floor beneath the carrier give the rope a little slack from the hand to the carrier and give it a little throw to obtain a half turn in the swivel. Rethread the pulleys in the end of the barn you wish to operate in, then the carrier is ready for operation. Before pulling large rope out of pulleys tie a small rope to the end of it so the small rope will be through pulleys, for pulling up the large rope, the reverse, see cut above.

Directions For Putting Up Track.

Support track to every rafter by means of track eyes and rafter irons. Place stop block or bumper directly over unloading place, and to prevent carrier from running off track bolt carrier stop or pulley fastener to end of the track, tie a rope from one rafter to the other, letting rope hang four or five inches under the track, or nail a board to the rafters close to and over it.

Material Required for a Steel Track Outfit for Different Length Barns.

For a 40 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 40 feet steel track, 21 hanging hooks, 21 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 110 feet ¾ inch manila rope, 50 feet ⅜ inch check rope, 40 feet ⅜ inch reverse rope.

For a 50 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 48 feet steel track, 25 hanging hooks, 25 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 130 feet ¾ inch manila rope, 55 feet ⅜ inch check rope, 50 feet ⅜ inch reverse rope.

For a 60 Foot Barn—One hay carrier fork or hay sling with sling pulley, one reversible carrier, 60 feet steel track, 31 hanging hooks, 31 rafter brackets, 5 knot passing pulleys, 6 floor hooks, 160 feet ¾ inch manila rope, 60 feet ⅜ inch check rope, 60 feet ⅜ inch reverse rope.

Material Required for Wood Track Outfits.

Material required for wood track outfits for different length barns, same as for steel track, except hanging hooks. Use No. 71 wood track hanging hooks in place of these.

Different lengths of barn will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end, figure same amount of draft rope. If draft rope be returned to same end of barn and then down, this require about one fourth more draft rope.

POPE-MADE BICYLES

THE "POPE-MADE" LINE of Bicycles have Several Outstanding Features Making for Unusual Strength and Durability. The Steering Head is Possibly Subjected to More Severe Strain than Any Other Part of the Frame. Unusual Strength is Secured at this Point by Means of a Spun Head Construction Eliminating Two Joints. The Main Frame Tubes are Cut to Correct Lengths and the Ends are "Spun" Directly into the Frame Head. The Hanger Bracket is "Drawn" by Special Process so as to Retain Correct Frame Alignment. The Pope One-Piece Hanger, Used Without Change for More than a Generation, is Still Used. All Bearings are Subjected to Rigid Inspection and so Treated as to Give Them the Greatest Wear-Resisting Qualities.

REX—RACER

This is a High-grade One-piece Hanger, Drop Forged Crown Racing Bicycle Furnished Only in the 21 Inch Frame Size with a 2⅞ Inch Drop at the Hanger. Tubing Westfield Analysis Steel. "SNAPPY BOY" JUNIOR ROADSTER POPE MADE BICYCLE

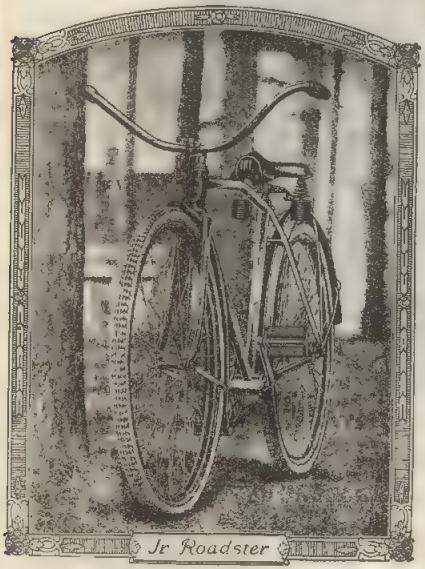
The Most Popular Boys' Model on the Market

The Snappy Boy Junior Roadster Bicycle was Designed Especially for the Youth —it is Suitable for the Boy at the "in between" Age for whom a Regular Adult Model would be too large and a Boys' Juvenile too small. It is Extremely Popular for this reason and because it combines the Racy Appearance of the Motorbike with the Proven Construction Principle of the Roadster Model.



FRAME—19" Drop Bar.
FORK—Forged Crown.
GUARDS—Wide Drop Side with Special Flare on Front. Riveted Braces. Red Jewel Reflector on Rear.

MOTORBIKE MODEL

To Anyone Desiring a Wheel of the Motorbike Type, We Strongly Recommend Our Model 250 Franklin. Unusually Attractive Design Coupled with an Unsurpassed Rugged Strength Places These Wheels in a Class by Themselves. The Upper Bar is of the Drop Frame Type, While the Lower Bar is Straight, Thus Producing a Brace Which Gives Exceptional Strength and Great Rigidity to the Frame Itself. Double Fork Crown Construction, Recognized as Giving a Greater Bearing Surface to the Legs of the Fork and Making for Strength. Besides, These are Thoroughly Trussed by Two Rods Extending from the Front Hub to the Handle Bar Column and Thoroughly Strengthening the Forks. Equipped Throughout with the Finest Accessories, These Wheels are in a Class by Themselves as Regards Beauty, Strength, Comfort and Easy-Riding Qualities.

WHITE MOUNTAIN FREEZER

TRIPLE MOTION

NEW DESIGN

With Crank.

(Sectional View)

New Design Triple Motion Freezer embodies the very latest and most scientific construction. Tubs built on new lines of correct height and diameter resulting in minimum ice consumption. Cans made of Keystone Copper Steel Charcoal Tin Plate are of corresponding height insuring quick freezing. Can covers cast iron with accurate gear teeth. The special patented new form of beater retains the famous Triple Motion, an original and exclusive feature of White Mountain Freezers. Entirely new top frame construction eliminating all complicated gear mechanism making smooth and easy operating freezer.

New inner construction of the freezer insures even, thorough and efficient freezing of the cream together with proper mixing and beating of the entire cream contents.

Can is turned by means of a lug or stop on the inner surface at the top connecting with a corresponding lug or stop on inside of can lid or cover. Bottom of the inner mixer with floats fits over the dasher support in the bottom of the can and revolves with the can, the cup-shaped bearing at the top of the mixer turning on a pivot. The outer mixer, with wooden scrapers, revolves on the dasher support in an opposite direction between the inner mixer and the can.

ALASKA COTTAGE FREEZER

In the Alaska Cottage Freezer we offer a high grade durable wood tub freezer at an extremely low price. It operates perfectly, freezing cream in about four minutes.

Tub is of selected Northern Pine with welded wire hoops. Dasher of tinned cast iron has adjustable wood scrapers. Can is 3A charcoal tinplate with 3X double seamed bottom. Tinned cast iron cones.

Capacity 2 qts., w't per doz. 73 lbs.

No. M182—Full half dozen lots, per dozen.....$41.10

No. D182—Less than half dozen, per dozen.....$41.10

AUTO VACUUM FREEZER

The no crank Freezers. Guaranteed, simple, sanitary economical. Endorsed by all leading domestic science institutes. Works on vacuum bottle principle. Will keep cream frozen eight hours without repacking. Finished in white enamel.

Only 3 parts and cannot get out of order.

Nos.	M21	M22	M23	M24

Each	$7.35	8.90	11.80	14.80

FROST KING FREEZER

Steel Frame, Single Motion.

This is a single-motion freezer that is made fully as well as the double or triple-motion freezers. The mechanism is very easy to operate. The freezer can is of the narrow model type, making the freezing very rapid. The tub is made of Virginia white cedar. Electric-welded wire hoops sunk into grooves, with steel frame, locks and catches are made of non-breakable steel.

The operation is extremely simple. The wood scrapers on th dasher press automatically against the sides of the revolving can. These remove the frozen cream and throw it to the center where the spoons on the beater mix it with the cream still unfrozen and return the whole to the sides to be re-frozen.

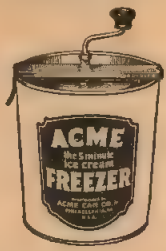
ACME FREEZER

THE FIVE-MINUTE ALL METAL ICE CREAM FREEZER



No gears. No heavy tub. Nationally advertised in Good Housekeeping and Ladies' Home Journal.

Lowest priced, all metal gearless freezer on market and fully guaranteed. Noted for durability, quick freezing, easy operation and perfect results. It is a popular favorite, and best selling Freezer and is extensively advertised in leading national magazines. Has the Good Housekeeping seal of approval, also endorsed by leading home economics teachers.

Sanitary, light, durable, compact, easy turning, and saves space, ice, work, and time. It has no heavy tub. Has no gears, wheels or other complicated parts to wear out or get out of order, therefore no parts to replace. Fits pantry shelf when not in use, and slips into ice chest or refrigerator after freezing. Tapered.

SAMSON POWER FREEZER

Triple Motion.

The platform and stand are of cast iron. The gear frame extends across the top of the tub, and is fastened by a latch bolt and thumb screw. When the frame is released it can be raised to an upright position, and is there held firmly. The can and tub may be removed and replaced at pleasure, while the frame is in this position.

The beaters are malleable iron and tinned, with double self-adjusting wood scraping bar. The tubs are exceedingly heavy and durable. The cans are of the heaviest tin plate. The pulleys on both the 25 qt. and 40 qt. sizes are 24x4½ in. and should turn about 75 revolutions per minute to give the correct speed to the freezer.

Per Ass't

No. C—30 wrenches of 10 sizes as described------ **$31 20**

One ass't on an attractive display board; wt per ass't 20 lbs.

Every successful dealer knows that the old days are over. Competition is keen. You must go out after business. You must sell aggressively if you want to get in on the profitable business. A merchants profits are based on turn-overs and not turn-downs. Blue Grass Trade Marked Lines result in rapid turn-overs. Blue Grass Trade Marked Goods look good, are good—and stay sold.

WRENCHES

TAPPET, WILLIAMS

Semi-Finish.

Drop forged from special alloy steel, heat treated and hardened. Polished head, lacquered handles. Designed for valve tappet adjustment service. Thin heads with narrow, tapered jaws to permit operating nuts etc., where the clearance about them is extremely limited.

STRAIGHT SIZES

Nos.	Openings Milled Ins	For S. A. E Std Nuts and Cap Screws Diam Screws Ins	Extreme Length Ins	Thickness Head Ins	Per Doz Lbs	Per Doz

96	15/16 x 1	5/8 x 11/16	9 1/2	1/4 x 19/64	7	27 75

Half doz in cardboard box.

To Merchants who will be successful it means not only making a sale, but to sell merchandise that makes his customers well pleased. They tell their friends, consequently a permanent and pleasing growing business is assured. Blue Grass Tools please every user.

The fact that a customer asks to see a cheap screw driver, wrench, saw, hammer, hatchet or what-not, isn't conclusive evidence that he will buy one. The successful salesman usually lays down two—a cheap one and a Blue Grass, andlets the Customer decide himself. Nine times out of ten he will take the Blue Grass. The appearance, quality and finish is worth the difference.

WRENCHES

CHECK NUT—THIN, J. H. WILLIAMS

15 Degree Angle, Double Head.

Drop forged from bar steel; flat handle semi-finished; milled openings. Each opening is at an angle of fifteen degrees with the handle. This permits turning hexagon nuts completely around when the swing of the handle is limited to thirty degrees

Semi-Finished, Case Hardened.

Per Set

No. 165—Roll complete with five wrenches, assorted; roll 11 ins long, 2 1/2 ins in diam..... $7 50

One set in roll; wt per roll about 3 lbs.

SOCKET WRENCHES

SQUARE OPENINGS

Malleable iron, hardened. Square openings for U. S. Standard nuts, cap screws and set screws. A shoulder prevents the nut working far up into the wrench and the open shank prevents clogging with dirt, also enabling the user to handle the wrench in places where a brace would not go.

NO. 1 STEWART BALL BEARING, ENCLOSED TYPE CLIPPING MACHINE FOR HORSES, MULES AND COWS

The gearing is all enclosed in a dust and dirt proof case and runs in oil constantly.

It has a solid tripod base, a strong upright and its gears are all cut from solid steel made file hard.

A slow turning of the handle is transformed by the ingenious mechanism of the gears to a high speed in the knife.

It turns so easily that it is mere play to run it.

The entire machine is sturdy, compact and perfect in every detail of material and workmanship.

The price puts it within reach of every farmer and horse owner.

No. C1—Ball bearing, complete with 6 ft. of flexible shaft and Stewart clipping knife and handle, shipping w't 36 lbs. ..... each *$14.00*

STEWART ELECTRIC CLIPPING MACHINE

PEDESTAL TYPE

For Horses, Cows and Mules.

Where there is considerable clipping to do this machine quickly pays for itself. Equipped with ½ H. P. motor, at a speed of 1800 R. P. M., it clips very fast and takes care of a large amount of work. Clips horses, mules and cows.

For the efficiency and smooth, easy running required in clipping, no machine equals the Stewart.

Pedestal Type.

The 6½-ft flexible shaft is connected by universal joint to armature shaft of motor, making a positive drive with no chance for lost motion.

Fitted with improved Stewart Single Tension Clipping Head, requiring less tension than any other style of head; knives stay sharp longer and give more efficient service.

Used for sheep shearing by fitting with a Special Sheep Shearing Attachment.

Has good length cord and convenient switch for starting and stopping.

Furnished in 32, 110 or 220 volt, direct current; 110 or 220 volt, 60 cycle alternating current.

No. F85P.T.—Stewart electric clipping machine, shipping w't 100 lbs.★ ..... each *$80.00*

No. F3250—Stewart sheep shearing attachment, shipping w't 15 lbs.★ ..... each *$32.50*

No. F11250—Stewart combination electric shearing and clipping machine, shipping w't 115 lbs., each★ *$112.50*

Specify on orders whether machine is for direct or alternating current, also if 32V, 110V, or 220V.

STEWART SHEEP AND GOAT SHEARING MACHINE

The gearing is all enclosed in a dust and dirt proof case, and runs in oil constantly.

Solid tripod base, strong upright, and gears cut from steel made file hard.

A slow turning of the handle is transformed, by the ingenious mechanism of the gears, to a high speed in the knife.

Solid core shaft with universal joints, may be turned in any direction.

Shears are of simple adjustment and of equal tension throughout. Perfectly balanced, will shear all grades of wool.

No. C9—Ball bearing, each joint in the shaft and the shear is fitted with ball bearings, the large balance wheel aids in easy turning, fitted with No. C7 Stewart ball bearing shear, 2 combs and 2 cutters, w't boxed 50 lbs., each *$24.00*

STEWART ELECTRIC SHEARING MACHINES

PEDESTAL TYPE

This machine is especially adaptable where a large flock of sheep is to be shorn.

Includes ½ H. P. motor, at a speed of 1800 R. P. M. It saves time in shearing and removes the wool in one unbroken blanket, leaving a smooth, even stubble for the following year's growth.

The universal jointed shaft that drives the shear is connected direct to armature shaft of motor, driving shearing head smoothly without any lost power. Equipped with Stewart Air Cooled Shearing Head. For fast shearing, economy and durability it cannot be equalled. It gets the wool faster, and because of its perfected mechanism runs absolutely smooth.

Pedestal Type.

Used as a clipping machine, by fitting with a Special Clipping Attachment.

Has good length cord and convenient switch for starting and stopping.

Furnished in 32, 110 or 220 volt, direct current; 110 or 220 volt, 60 cycle alternating current.

No. F95PS—Stewart electric shearing machine, shipping w't 100 lbs.★ ..... each *$95.00*

No. F1750—Stewart clipping attachment, shipping w't 15 lbs.★ ..... each *$17.50*

No. F11250—Stewart combination electric shearing and clipping machine, shipping w't 115 lbs., each★ *$112.50*

Specify on orders whether machine is for direct or alternating current, also if 32V, 110V, or 220V.

★Items Marked Thus ★ Are Shipped From Factory Only.

CLIPPING ATTACHMENTS FOR CLIPPING HORSES, MULES AND COWS

For Use on Nos. C6, C8, C9 and "New Model" Sheep Shearing Machines.

No. C1050SC—Clipping attachment, complete with 6 ft. of high grade flexible shaft and chain, eye spindle, Stewart horse clipping knife and handle and connecting parts as illustrated, shipping w't 10 lbs., each *$10.50*

POWER SHEARING MACHINE

STEWART "ONE MAN"

Belts to Any Farm Engine

Has complete clutch bracket with 3½ inch pulley. Readily belted to any engine. When not shearing, simply throw the clutch lever over to put out of gear. The bracket is of heavy cast iron made to fasten to a post or side of building.

A very high grade sheep shearing machine operated by one man and designed especially for the farmer who has an engine and from a few up to 200 or 3000 sheep.

Three universal joints give a wide range of flexibility to the shaft so that operator can shear any part of the sheep without changing his position.

No. C25 O. M. S.—Stewart One-Man Power Shearing Machine, complete with 42 in. jointed shaft, No. C7 Shear, 2 Combs, 4 cutters and bolts for attaching the clutch bracket. ..... each *$25.00*

SHIPPING WEIGHT 40 LBS.

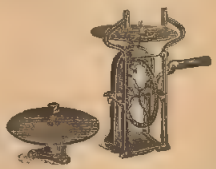
SHEEP AND GOAT SHEARING ATTACHMENTS

For use on Stewart Nos. C1 or C2 Chicago horse clipping machines.

No. C77—Ball bearing, for Nos. C1 and C2 Chicago horse clipping machines or on any hand power Stewart sheep shearing machines, consists of solid core shearing shaft fitted with ball bearings, No. C7 Stewart ball bearing shear and 2 combs and 4 cutters, w't 20 lbs., complete, each *$16.00*

In ordering ball bearing sheep shearing machine attachments mention number of machine and when it was purchased.

THE NEW NO. C2 STEWART AUTOMATIC GRINDER



The best hand operated sharpening device made for horse clipping or sheep shearing machine plates.

Grinding disc is covered with emery cloth on the same principle as the large power grinding machines used in large shearing plants. This emery cloth surface can be renewed any time at very little expense. Grinder is practically everlasting. It is the most practical grinder for dealers or others who have considerable grinding to do and who do not wish to purchase a power grinder.

In ordering give our names and numbers of plates to be sharpened so proper clamp rods will be supplied. No cams to change on this grinder. Each grinder shipped complete with emery cloth, liquid cement, clamp block and clamp rod. Diameter of disc 14½ in., height of grinder over all 2 ft., w't boxed for shipment 110 lbs.

No. C2—Automatic grinder, complete as described, each *$45.00*

THE IMPROVED STEWART NO. C11 GRINDERS

For use on the No. C1 horse clipping machine and on the No. C9 sheep shearing machine. Constructed of metal throughout, may be attached to the machine in place of the shaft by means of an ingenious mechanism. This attachment makes is possible to put a perfect edge on the knives of No. C1 horse clipper or Nos. C8 or C9 sheep shearer in a few seconds time, obviating the time and expense incurred in sending them away to be sharpened.

No. C11—Grinder attachment complete, w't boxed 8 lbs., each *$6.75*

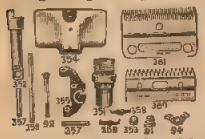
PARTS FOR STEWART CUTTING HEAD FOR HORSE CLIPPING MACHINES

Patented.

AS SUPPLIED SINCE JANUARY 1, 1915

Caution—Do not file or grind any part of the clipping head in any way. It is exactly right to cut best. The only grinding to be done is to re-sharpen the cutting plates when they get dull, and that must be done right.

Be sure to let parts Nos. C358 and C359 alone. If they should be removed in any way, do not attempt to use the clipper head until they are properly replaced. Remove before grinding and replace after.



Complete.

This clipping handle and knife will fit **only the square end type of shaft** as furnished with all Stewart horse clipping machines since January 1, 1915.

No. C1B—Handle and knife, complete	each		$4.50

6	C93	Eccentric Rolls	.15 Each	C1C head only
12	C94	Tension Nuts	.10 Each	C1C or C1B Head
6	C353	Drive Balls	.15 Each	C1B head only
6	C356	Cross Head Pins	.15 Each	C1B head only
12	C357	Guide Pins	.10 Each	C1B head only
6	C358	Ball Boss	.05 Each	C1B head only
6	C359	Socket Boss	.10 Each	C1B head only

Total Value..$9.00

Each assortment put up in a pasteboard box with separate compartment for each item, properly labeled with part number and description, weight per assortment 1 lb., per assortment $9.00

COMBS AND CUTTERS FOR STEWART HAND POWER SHEEP SHEARING MACHINES

No. C276.

No. C277.

No. C276—Cutter or top plate ..... each $0.30
No. C277—Comb or bottom plate ..... each 1.00

The No. C277 Comb and No. C276 Cutter here shown are for the Stewart No. C5 and Stewart No. C7 Shears. They will not fit the Stewart No. C12 or No. C4 Shears.

STEWART T.L.O. (TAKE LESS OFF) SHEEP AND GOAT SHEARING COMBS

An amazing new invention that sheep ranchers in Texas, Western and Northern states have been waiting for. Leaves sufficient covering on the animal's body to protect it from severe weather. Designed on a new principle, which leaves the desired length of wool or mohair on animal, at the same time it runs with all the ease and smoothness of the thinnest comb of standard type. The T.L.O. Comb is no heavier than the ordinary standard comb and owing to its special design can be reground and sharpened until completely used up, without touching or interfering with the bevel and set of teeth. The deflected teeth beyond the cutting surface are drawn and spring tempered to prevent breaking.

Showing Hump of Curved Teeth.

Showing Cutting Surface of Teeth.

These sheep shearing combs will fit the Nos. C7 and C5 Stewart Shearing Heads or any other shearing head on which the No. C277 regular Stewart Sheep Shearing Comb is now being used. Used in connection with the regular No. C276—3 prong cutter.

No. C1 3/16—T. L. O. Narrow type Stewarts Sheep Shearing Comb, **especially pointed and bevelled for shearing dense-wooled sheep of the Merino type** ..... each $1.75

No. C2 3/8—T, L. O. Narrow type, Stewarts Sheep Shearing Comb, **especially pointed and bevelled for shearing goats and light open-wooled sheep only** ..... each $1.75

ONE IN A LITHOGRAPHED TIN BOX

ACCESSORIES FOR ALL STEWART HORSE CLIPPING MACHINES

No. C897G—Shaft **with chain,** 6 ft. long, with **old style, round end ferrule to fit No. C1C clipping head** for No. C1 horse clipping machines, each $6.50

No. C898G—Shaft **with chain,** 6 ft. long with **new style, square end ferrule to fit No. C1B clipping head** for No. C1 horse clipping machine, each $6.50

No. C722G—Shaft **with chain,** 6½ ft. long, with **old style, round end ferrule to fit No. C1C clipping head** for No. C2 horse clipping machine, each $8.75

No. C723G—Shaft **with chain,** 6½ ft. long, with **new style, square end ferrule to fit No. C1B clipping head** for No. C2 horse clipping machine, each $8.75

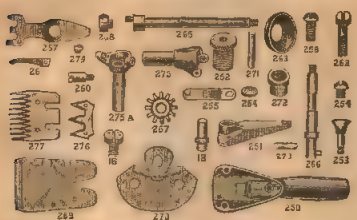
All horse clipping machines supplied since January 1, 1915 have been fitted with square end shafts, which fit only the No. C1B clipping head with square shank. The No. C1C, old style, round shank clipper head will fit only the old style, round end shaft.

No. C866A—Chain links, separate, for flexible, per dozen $0.75
No. C2OQ—Oil, in quart cans ..... per quart .75
No. C4OG—Oil, in gallon cans ..... per gallon 2.00
No. C1CG—Chain Paste, 1 lb. can ..... each .40

STEWART HORSE AND COW CLIPPER PLATE ASSORTMENT

No. C2100—Assortment consists of—
4 only—C360 Top Plates
4 only—C361 Bottom plates
2 only—C90 Top Plates
2 only—C91 Bottom Plates
Per assortment $21.00
ONE ASSORTMENT MOUNTED ON A HANDSOME EASEL DISPLAY CARD MEASURING 16x22 in.

NO. C5 STEWART SHEAR AND PARTS



Shear Complete.

NO. C7 STEWART BALL BEARING SHEARS AND PARTS

Complete.

No. C7—Complete with 1 set comb and cutter, w't 3¾ lbs. ..... each $10.50

This is the shear supplied with all No. C9 ball bearing shearing machines.

Will fit on any Stewart hand power sheep shearing machine no matter when purchased. All that is necessary is to mention the year in which the machine was bought. With this new shear there can be no question about the ease with which the work of sheep shearing is done.

TINNERS' SNIPS

—BLUE GRASS—Combination Pattern.

Tempered straight blades; jaws are ground and shaped so they will cut curves and irregular shapes as well as straight work.

Nos.	200	199	198
Cut, ins	2½	3	3½
Length over all, ins	11½	12½	13½
Wt per pair, lbs	1¾	2	2¼
Per Pair	$5 40	6 00	6 75

One pair in carton.

—BLUE GRASS—

Forged steel, with crucible tool steel laid blades; full polished; gun metal finished handles; every snip carefully tested.

Nos.	Cut, ins	Length over all, ins	Wt per pair, lbs	Per Pair
412	2	8	1½	$3 00
411	2¼	9	1¾	3 60
410	2½	11½	1¾	4 50
409	3	12½	2¼	5 10
408	3½	13½	2¾	5 70
407	4	14½	3½	7 20
406½	4½	15½	3¾	8 25

Nos. 412 and 411 six pair in carton; Nos. 410 to 406½ one pair in carton.

—PINE KNOT—

Drop forged steel, with crucible steel laid blades polished; black japanned handles.

Nos.	10	9	8	7	6½
Cut, ins	2½	3	3½	4	4½
Length over all, ins	10	11	12¼	14	16
Wt per pair, lbs	1	2	2½	2¾	3
Per Pair	$3 75	4 05	4 80	5 70	6 75

Two pairs in carton.

—PINE KNOT—Household.

Solid drop forged carbon steel polished steel cutting edges, japanned handles. Used for cutting wire cloth, poultry netting, No. 16 wire, stove pipe and for general household and merchant's use. Per Doz Pair

No. 30—Cut 2¾ ins; length over all 10 ins; wt per pair 1 lb $23 25

One pair in paper envelope.

—PINE KNOT—Pocket.

Drop forged steel, carefully tempered; highly polished blades; black japanned finished handles. Per Doz

No. 72—Cut 2 ins; length over all 7 ins $19 50

Half doz in box; wt per doz 6¼ lbs.

—PINE KNOT—

Solid drop-forged from carbon steel; carefully tempered; polished cutting edges; japanned handles; machine hollow ground. Per Doz

No. 40—Cuts 3¼ ins; length 12 ins $25 50

One third doz in box; wt per doz pair 12½ lbs.

TINNERS' SNIPS

NEW STAR

Cast iron, ground blades, polished; japanned handles.

Nos.	2	2½	3
Cut, ins	2	2½	3
Length over all, ins	9¾	11	12
Wt per pair, lbs	4	12	24
Per Doz Pairs	$12 00	13 50	15 00

Half doz pairs in cardboard box.

P. S. & W. Circular.

Drop forged of refined iron, with cast steel laid blades, properly hardened; black enameled handles.

Nos.	C9	C8	C7
Cut, ins	3	3½	4
Length over all, ins	12	12½	14½
Wt per pair, lbs	1½	2	2½
Per Pair	$8 25	9 00	10 50

One pair in paper.

LYON, Circular and Scroll.

Best steel blades, polished; forged handles, maroon enameled; made so as to easily cut circles, scrolls, etc.

Nos.	190	180	170
Cut, ins	2½	3	3½
Length over all, ins	12½	13	14
Wt per pair, lbs	1½	1¾	2¼
Per Pair	$5 40	6 00	6 75

One pair in cardboard box.

PEXTO

Improved Trojan.

Drop forged steel, crucible tool steel laid blades, full polished; gun metal finish handles. Specially designed for straight and irregular cutting, small circles and scrolls. Will cut 26 gauge metal. Per Pair

No. 79—Length cut 2½ ins; length over all 13 ins $8 25

One in carton; wt per pair 2 lbs.

BERRIDGE, Double Cutting.

Drop forged of refined iron, center blade of solid steel tool; outer jaw laid steel; polished jaws; japanned handles; blades can be inserted in metal at any point; will cut stove pipe, bottom of pails, cans, etc., also suitable for round or square work; size cut 2 inches, length over all 13½ inches. Each

No. 3B—Wt each 2 lbs $7 80

No. 2B—With solid steel crimping attachment; wt each 2¼ lbs 9 00

One in carton.

BLOW TORCHES

TURNER MASTER LINE

Burns Gasoline or Kerosene.

Polished heavy seamless drawn brass tank, concave bottom; pistol grip handle. One opening on top making it impossible to overflow. Equipped with safety valve that automatically opens and closes at 40 lbs. pressure making it safe against bursting, etc. The baffle is the obstruction in the burner on which the flame is constantly applied, heating the fuel to a hot dry gas insuring vaporization, thus generating 400 degrees more heat on lower fuel consumption. The flared tube in the front of the fuel jet automatically syphons the correct proportion of air regardless of the size of flame desired.

TURNER

Burns Gasoline or Kerosene.

Heavy burner produces powerful and very hot flame.

Each

No. 43—Capacity 1 qt; diam 4 ins; height over all 10¼ ins **$16 50**

One in carton; wt each 4 lbs.

TURNER

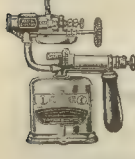
Burns Gasoline or Kerosene.

Extra heavy burner giving very large hot flame.

Each

No. 45—Capacity 1 qt; diam 4 ins; height over all 10¼ ins **$18 75**

One in carton; wt each 4 lbs.



TURNER

Burns Gasoline or Kerosene.

Flat type auto torch with extra heavy burner.

Each

No. 52—Capacity 1 pt, length base 5 ins; width 2½ ins; height over all 10½ ins **$19 50**

One in carton; wt each 3 lbs.

TURNER

Burns Gasoline or Kerosene.

Two jet hydro-carbon burner in which both jets junction, producing a flame within a flame.

Each

No. 48—Capacity 1 qt; diam 4 ins; height over all 10½ ins **$20 25**

One in carton; wt each 4 lbs.

THE "IMP"

All brass, nickel plated. Will heat or solder anything; starts with a match; has no pump or valve; is entirely automatic and burns two hours on one filling. For hand or bench work. Produces a perfect Bunsen flame of over 2,000 degrees Fahrenheit. Per Doz

No. 372—Height over all 5 in; diam 2 ins **$39 00**

One in carton, one doz in wood box; wt per doz 3¼ lbs.

BLOW TORCHES

COMMON SENSE

Heavy brass construction. With copper burner coil. Adapted to light soldering uses, such as for Doctors, Druggists, Garage Mechanics, Electricians also for removing paint, thawing water pipes and general household purposes. Its working facilities are produced by expansion and will generate without pre-heating; has no needles or adjustments.

Per Doz

No. 1—Capacity ½ pt **$37 50**

One in carton; wt per doz 6 lbs.

RIVET SETS AND HEADERS

TINNERS'

Drop forged steel, black finish, polished face, oil tempered.

Nos.	0	1	2	3	4

Wt each, lbs	5/11	¼	¾	½	
Each	$1 14	1 14	99	99	

Half doz in cardboard box.

FARMERS'

Solid cast steel, black finish.

Nos.	1F	2F	3F	4F
For copper rivets, Nos	7	8, 9	10	12
Length, ins	4½	4½	4½	4½
Wt per doz, lbs	7¾	4¾	4½	4
Per Doz	$5 55	5 55	5 55	5 55

Half doz in cardboard box.

STOVE PIPE MANDRELS

For Seaming Or Riveting Stove Pipe.

P. & B., Hollow.

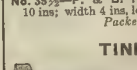
Cast iron, polished; with heavy clamp for attaching to bench. Each

No. 35½—P. & B. Holdfast. Length of shoulder 10 ins; width 4 ins, length over all 35½ ins **$9 00**

Packed loose; wt each 37 lbs.

TINNERS' TOOLS

GROOVING TOOLS



Japanned, forged steel, with polished tempered face.

Nos.	00	0	1	2	3
Size, ins	⅛	7/32	5/16	9/32	¼
Length, ins	5½	5½	5½	5½	5
Wt each, lbs	1¾	1¾	1¾	1½	1
Each	3 30	3 30	3 15	3 15	2 85
	$0 75	*75*	*63*	*63*	*50*

Packed loose.

MELTING LADLES

Malleable iron, double lipped.

Nos.	4	5	6
Diam of bowl, ins	4	5	6
Length over all, ins	16	19	21
Wt per doz, lbs	16	24	30
Per Doz	$7 95	12 75	15 00

Packed loose.

Wrought iron, double lipped, with eye for hanging.

Nos.	3½W	4W
Diam bowl, ins	3½	4
Lead capacity, lbs	3¼	4
Length of handle, ins	13	14
Wt per doz, lbs	15	16
Per Doz	$23 25	27 75

Packed loose.

GAS FURNACES

Double Burner.

Top of heavy sheet-iron brick lined. Each

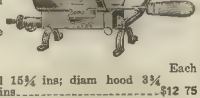
No. 2—Length 14½ ins; width 8½ ins; height 7 ins $19 80

One in wood box; wt each 12¾ lbs.

Single Burner.

Cast iron base, legs and burner, sheet iron hood.

Price does not include oldering copper.



Each

No. 1—Length over all 15¾ ins; diam hood 3¾ ins; height over all 7½ ins $12 75

Packed loose; wt each 4½ lbs.

FIRE POTS

BUTTLE'S PATENT

Burns Charcoal.

Japanned sheet iron body, cast iron legs, base, door and sliding top; base burner with double damper and reversible flue. Fitted with wire bail, wood handle. Each

No. 2—Height over all 16¾ ins; diam 8 ins; size opening 3¾x2¼ ins $16 50

One in crate; wt each 19 lbs.

FIRE POTS

CLAYTON AND LAMBERT

Burns Gasoline Only.

Heavy gauge seamless drawn steel tank reinforced, tinned inside and out, fitted with patented cushion protection band preventing injury to the base of the tank. Supplied with a large funnel and filler plug having a dust proof cap. Top section can be removed, thus producing an open fire. Each

No. 1—Capacity 1 gal; height over all 13 ins; diam base 9½ ins 33 00

One in box; wt each 13 lbs. *$34 60*

Each

No. 1-MP—Melting pot for No. 1, extra 1 95 *$1 65*

CLAYTON AND LAMBERT

Burns Gasoline Only.

Heavy gauge seamless drawn steel tank, tinned inside and out, fitted with cushion protection band at base. Supplied with brass ears, elbows, tees, pump, large funnel and filler plug with dust-proof cap, also three piece coil cup and top plate which enables operator to remove section by unscrewing three large brass nuts exposing burner and coil. Rubber bulb and hose fastened to brass fitting with check valve; wire bail with wood handle. Each

No. 12—Capacity 1 gal; height over all 17 ins; diam of base 8½ ins 24 00

One in carton; wt each 12 lbs. *$24 80*

Each

No. 12MP—Melting pot for No. 12, extra 1 95 *$1 65*

CLAYTON AND LAMBERT

Burns Gasoline Only.

Heavy gauge seamless drawn steel tank, tinned inside and out making it rust proof. Fitted with cushion protection band at base and supplied with automatic brass air pump, brass ears, elbows, tees, large funnel and filler plug with dust proof cap, also three piece coil cup and top plates which permits operator to remove section by unscrewing large brass nuts exposing burner and coil. The coil is made of extra heavy pipe and the burner of steel. The needle point valves are fitted with stuffing boxes. Each

No. 22—Capacity 1 gal; height over all 17 ins; diam of base 8½ ins 24 00

One in carton; wt each 12 lbs. *$25 00*

Each

No. 22 MP—Melting pot for No. 22, extra 1 95 *$1 65*

TURNER

Burns Gasoline Only.

Seamless drawn steel tank, bottom welded in. Spider casting supports the prig hts and eliminates leaks.

Extra large uprights and one piece coil cup sufficiently heavy to withstand rough use and abuse, will not warp.

Malleable top plate and one piece shield furnished. Each

No. 76—Capacity 7 pints; height over all 14½ ins; diam base 9½ ins 24 00

One in carton; wt each 12 lbs.

SOLDER
—BELKNAP'S GUARANTEED—

All solder sent out by this company is guaranteed to conform in percentage of materials composing it to the percentages indicated in describing it. Owing to the difficulty of consumers in getting honest solder, we have discarded the conventional method of description and changed to below. The first two figures given in each case indicate the percentage of tin and the next two figures the percentage of lead. Each bar of solder excepting wire solder, sent out by us will be stamped to show the percentages of tin and lead. In about 2 pound bars.

Per 100 Lbs

No. 38-62—Called No. 1 tinners'
No. 40-60—Called commercial half and half
No. 45-55—Called strictly half and half
No. 50-50—W.B.B. & Co., warranted half and half
No. 38P—38-62 Plumbers' wiping
100 lbs in wood box.
} Prices on application.

TINKER'S 50-50

Prices on application. Per Doz Bars

No. 6—Size 6½x1⅝x¼ in; approx 10 bars to the lb
One gro in wood box; wt per gro about 15 lbs.

WIRE SOLDER

A composition of lead and tin; on spools.

40% Tin; 60% Lead.

Nos.	8-10	10-10	8-60
Size spool, lbs	10	10	60
Gauge wire	8	10	8

Per 100 Lbs **Prices on application.**

50% Tin; 50% Lead. Per 100 Lbs

No. 8-5—5 lb. spools; No. 8 gauge wire **Prices on application.**

IN HANKS

A composition of lead and tin, 40% tin, 60% lead.

Per Doz Hanks

Prices on application.

No. 9-9—No. 9 gauge wire; 9 hanks to a lb
One doz in carton; 2¼ doz in case.

KESTER'S PASTE CORE

This solder contains, in little cells running through the center of each stick, all the flux necessary. A perfect union can be made by laying a small piece of this solder on the parts to be joined and melting it with a gasoline torch or soldering iron. Non-corrosive and is especially adapted to electrical work.

Per 100 Lbs

No. 1—18 in. sticks, 5 sticks to lb
No. 4—18 in. sticks, 25 sticks to lb
1 lb in box.
} Prices on application.

KESTER'S ACID CORE, SELF-FLUXING

The solder is a hollow wire filled with an acid soldering flux of Strait's tin and St. Joe lead. The solder tube is a series of cells each separated from the others so that excess flux can not flow from remaining cells.

A practical solder for all general repair work including automobile repairs, household utensils etc. Can be used with or without soldering copper etc., ⅛ inch in diameter.

Per 100 Lbs

No. T-1ACS—1 lb. spools
No. T-5ACS—5 lb. spools
No. T-10ACS—10 lb spools
} Prices on application.

WIRE SOLDER

KESTER'S ACID CORE, SELF-FLUXING, Household Size.

Strait's tin and St. Joe's lead. A hollow wire solder filled with an acid soldering flux. The solder tube is a series of cells each separated from the others so that excess flux can not flow from remaining cells A practical solder for all general repair work including radio parts, household utensils, automobiles, etc. Can be used with or without soldering copper, etc. Per Carton of 10

No. T-10MM—Diam ⅛ in; ¼ lb in tin box **Prices on application.**

10 boxes in counter display stand; wt per carton 3 lbs.

KESTER'S ROSIN CORE, SELF FLUXING

A hollow wire solder filled with rosin soldering flux. The solder tube is a series of cells, each separated from the others so that excess flux can not flow from remaining cells. Especially designed for radio, telephone, switchboard and delicate electrical work; will not splatter or corrode. Can be used with or without soldering coppers

Diameter 1/16 inch. Per 100 Lbs

No. T1R—1 lb spools
No. T5R—5 lb spools
} Prices on application.

KESTERS ROSIN CORE, SELF-FLUXING RADIO SOLDER

A hollow ribbon of genuine tin and lead having inside a pure rosin flux, which is in proportion to the surrounding solder and feeds out as solder is used. Designed for assembling and repairing radio sets, switch board and other delicate electrical work, will not run over delicate parts, which causes high leakage.

Per carton of 10

No. T10RR—About ¼ lb in tin box. **Prices on application.**

10 boxes in counter display stand; wt per carton 3 lbs.

SUPREME, Household Size. Small Bars on Display Cards.

For repairing household utensils, small aluminum castings, aluminum patterns etc. Will solder aluminum to aluminum or aluminum to any other metal, melting point 500° fahrenheit.

Prices on application.

Per Card

No. 123—Wt per card about 1 lb

One doz bars on display card.

SUPER, Garage Size. Half Pound Bars.

For repairing automobile parts, heavy aluminum casting and aluminum patterns, as are usually repaired by garage men. Will solder aluminum to brass or wrought iron copper or aluminum; melting point 500°fahrenheit. Per Lb

Prices on application.

No. 6A—Length 14⅞ ins; width 5/8 ins; depth 1¼ ins
Packed loose.

BAR LEAD

For ingot lead, see Department 3. Per 100 Lbs

No. 4—In 4 oz bars, 25 lbs to box **Prices on application.**

TINNERS' TOOLS

Packed loose.

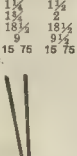
P. S. & W. GUTTER TONGS

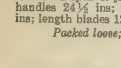


Handles forged from high grade special tough steel; accurately milled steel blades with planed and polished bending edges.

Each

No. 777—Depth of jaws 14 ins; length handles 24 1/2 ins; width blades 1 3/4 ins; length blades 12 1/2 ins $15 75

Packed loose; wt each 10 lbs.



P. S. & W. HAND ROOFING DOUBLE SEAMERS

Cast iron. Used for laying standing seam roofing by hand following the roofing tongs.

Nos.	744	745
Inches	3/4x1	1x1 1/4
Match up with roofing tongs, in	1x1 3/4	1 1/4x1 1/2
Wt each, lbs	8	9 1/2
Each	$4 50	4 80

Packed loose.

TINNERS' TOOLS

P. S. & W. DOUBLE ROOFING SEAMERS

Burritts Patent.

Will do the work more evenly than by any other process, and leave the formed lock of uniform height. Will work well over uneven roof boarding and will double seam hips and ridges with perfect ease. Fitted for I. C. tin. Set consists of two pairs.

Per Set

No. 742—Common gauge. Follows 1 and 1 1/4 ins tongs finishing a lock 3/4 in high $66 75

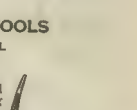
No. 742 1/2—Wide gauge. Follows 1 3/4 and 1 1/2 ins tongs finishing a lock 1 in high 66 75

Packed loose; wt per set 40 lbs.

SLATER'S TOOLS

RED DEVIL

Hammer.



Drop forged tool steel, polished and tempered point, head and cutting edges, painted red; sure grip leather filled handle. Made with sharp point on end for punching slate, claw for removing nails and sheet edge on neck between handle and hammer head for breaking slate.

Each

No. 582—Length over all 12 ins; length from hammer head to pick head 9 ins $13 50

Packed loose; wt each 1 1/2 lbs.

RED DEVIL

Ripper

Forged from tool steel, polished and tempered blade; shank and handle painted red. For removing nails and broken slate.

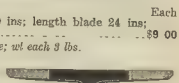
Each

No. 583—Length over all 30 ins; length blade 24 ins; length handle 6 ins $9 00

Packed loose; wt each 3 lbs.

RED DEVIL

Stake



Forged from tool steel, polished and tempered blades and point; body painted red. For breaking slate in any shape.

Each

No 584—Length over all 18 ins $5 25

Packed loose; wt each 8 lbs.

RED DEVIL

Punch.

Forged from tool steel, polished and tempered point; body painted red. For punching holes in slate.

Each

No. 585—Length over all 4 1/2 ins $1 05

Half doz in cardboard box; wt each 4 ozs.

SOLDERING COPPER HANDLES

Hardwood, plain finish, metal ferrule, tinned.

Per Doz

No. 1—Large; length 5½ ins; for coppers 2½ to 6 lbs; $2 40
No. 2—Small; length 5 ins; for coppers 1 to 2½ lbs; 2 25

Packed loose; No. 1 wt per doz 2¼ lbs; No. 2, 2 lbs.

SOLDERING COPPERS

Best quality drawn copper bolts shaped under a hammer.

Nos.	1	1½	2	2½	3	4	5	
Wt per pair, lbs	1	1½	2	2½	3	4	5	6
Length copper, ins	3	4¼	4¼	5½	5½	5	6¼

Per Pair

Prices on application.

Packed loose.

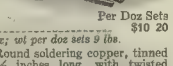
HANDY

Pure copper point, heavily tinned; hardwood handle, black enameled; nickel plated ferrule. For radio, electrical and household soldering. Per Doz

No. A—Length 9¾ ins **Prices on application.**

One doz in carton containing display card with one mounted; wt per doz 1½ lbs.

SOLDERING SETS



Octagon soldering copper, 9 inches long, with black enameled handle; scraper with black enameled iron handle, 5¼ inches; box of rosin, bar of solder and piece of tin for tinning the copper. Per Doz Sets

No. 56—Household size $10 20

One set in cardboard box; wt per doz sets 9 lbs.

Round soldering copper, tinned 10½ inches long, with twisted wire shank securely fastened in basswood handle. Box of powdered rosin and bar of solder, also instructions for using. Per Doz Sets

No. 2—Family size $30 00

One set in wood box, wt per doz sets 12 lbs.

ELECTRIC SOLDERING COPPERS

"Also Dept. 5 Page 1228".

Blued steel casing; between casing and element is a layer of asbestos. Smooth hardwood handle; 6 feet flexible cord and attachment plug. For general work.

With One Tip.

Nos.	200	300
Volts	110	110
Watts	200	300
Diam casing, ins	1½	1½
Diam tips, ins	1	1½
Length over all, ins	16	16
Wt each, lbs	2¼	3
Each	$22 50	27 00

One in cardboard box.

DOVER

Blued steel casing; between casing and element is a layer of asbestos; smooth hardwood handle, varnished; 6 feet flexible cord and attachment plug. For switch board work, engraving, electrotyping, radio, etc.

With One Tip. Each

No. 75—110 volts; 75 watt; diam casing⅝ in; diam tips 1/16 in; length tips 1 in; length over all 13½ ins $18 75

One in cardboard box; wt each 1¼ lbs.

ELECTRIC SOLDERING COPPERS

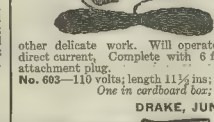
DRAKE, MECHANICS

Elements wound with nichrome wire on lava spool; removable solid copper tip; ebonized wood handle. A practical and economical iron adapted for all heavy work. Will operate on either alternating or direct current. Complete with 6 feet of cord and separable attachment plug. Each

No. 703—110 volts; length 12 ins; size tip 1x2¼ ins $13 50

One in cardboard box; wt each 1¼ lbs.

DRAKE, RADIO

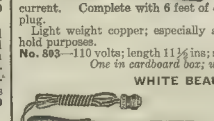


Elements wound with nichrome wire on lava spool; removable solid copper tip; ebonized wood handle, light weight point. For radio, electric switch boards and other delicate work. Will operate on either alternating or direct current. Complete with 6 ft. of cord and separable attachment plug. Each

No. 603—110 volts; length 11½ ins; size tip ⅜x2¼ ins $6 75

One in cardboard box; wt each 1 lb.

DRAKE, JUNIOR



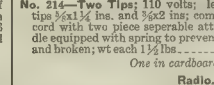
Elements wound with nichrome wire on lava spool; solid copper tip; ebonized wood handle. Will operate on either alternating or direct current. Complete with 6 feet of cord separable attachment plug.

Light weight copper; especially adapted for general house hold purposes. Each

No. 803—110 volts; length 11½ ins; size tip ⅜x2 ins $4 65

One in cardboard box; wt each ¾ lbs.

WHITE BEAUTY



Nickel chromium heating element, mica insulated; hardwood handle, natural smooth finish. Tip replaced by removing pin. Will operate on either direct or alternating current.

Mechanic. Each

No. 214—Two Tips; 110 volts; length 12¾ ins; size tips ⅜x1¼ ins. and ⅜x2 ins; complete with six ft. of cord with two piece seperable attachment plug; handle equipped with spring to prevent cord being twisted and broken; wt each 1½ lbs 7 50

$3 50

One in cardboard box

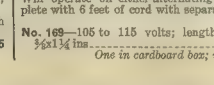
Radio. Each

No. 201—One Tip; 110 volts; length 11½ ins; size tip ⅛x⅞ ins; complete soldering paste, solder and six ft. of cord with one piece plug; wt each ¾ lbs 4 05

$2 00

One in cardboard box

WARD



Highest grade nichrome wire, wound on special lavarock core; mica lining thoroughly insulates inside of sleeve; solid copper swivel point adjustable to any position to 45 degrees; all metal parts electro nickel plated; hardwood handle, baked rubberoid finish. Will operate on either alternating or direct current. Complete with 6 feet of cord with separable attachment plug. Each

No. 169—105 to 115 volts; length 13¾ ins; size tip ⅜x1¼ ins $6 00

One in cardboard box; wt each ¾ lb.

BLOW TORCHES

BELCO

Burns Gasoline or Kerosene.

Heavy brass tank; concave bottom with brass filler plug; needle point valve. Bronze burner with underflow across base of burner insuring quick generation in wind or coldest weather; wood handle grip; fitted with solid hook for soldering copper.

Nos.	2000	2100
Capacity	1pt	1 qt
Wt each, lbs	3	5
Each	$12 75	13 50

One in cardboard box.

BURNERS FOR BELCO TORCHES

	Each
No. 136—For No. 2000	$8 25
No. 135—For No. 2100	8 25

Packed loose; wt each 6 ozs.

CLAYTON AND LAMBERT

Burns Gasoline or Kerosene.

Polished drawn brass seamless top and body, heavy brass soldered concaved bottom; cast iron drip cup and pipe.

Designed for heavy work. For brazing, tempering and straightening of automobile frames and axles. Equipped with automatic brass pump and burner made of generator metal, having upper cleaner and lower shut-off needle and hardwood handle. Height 15 inches; diameter 5¾ inches.

Each

No. 206—Capacity 2 qts.... 29 25

$30 00

One in cardboard box; wt each 7 lbs.

CLAYTON AND LAMBERT

Burns Gasoline or Kerosene.

Designed for general mechanics use. Generator metal, automatic brass pump and burner with upper cleaner and lower shut-off needle. Height 11 inches; diameter 5¾ inches.

Each

No. 208—Capacity 1 qt.... 18 75 *$19 00*

One in cardboard box; wt each 5 lbs.

CLAYTON AND LAMBERT

Burns Gasoline Only.

Capacity one quart; diameter 5¾ inches. With automatic brass pump.

Each

No. 32—With soldering attachment; height over all 11 ins.... 18 00

$18 00

One in cardboard box; wt each 5 lbs

CLAYTON AND LAMBERT

Burns Gasoline Only.

Capacity 1 pint; diameter 4¾ inches. With automatic brass pump.

Each

No. 38—With soldering iron attachment; height over all 8½ ins.... 17 25

$17 00

One in cardboard box; wt each 4 lbs.

CLAYTON AND LAMBERT

Burns Gasoline Only.

Seamless drawn brass tank; with double spring brass pump. Concave bottom to serve as a funnel when filling.

Bronze metal burner; tapered burner tube fitted with solid hook and support for holding soldering coppers.

Each

No. 130—Capacity 1 qt; diam 4½ ins; height 11¾ ins.... 17 25

$17 00

One in cardboard box; wt each 5 lbs.

BLOW TORCHES

TURNER

Polished heavy brass tank; concaved bottom, with brass filler plug; bronze metal burners, produces a much higher degree of heat than other hydro carbon burners. The adjustment is simple and easily regulated. Air valve is located at base of pump barrel. Recommended for all ordinary work for which a common blow torch is used and especially for light brazing, annealing light material, brazing on rubber tires and paint burning.

TURNER

Burns Gasoline Only.

Self lubricated pump with automatic checks; fitted in handle.

Each

No. 92—Capacity 1 qt; diam 4 ins; height over all 9¾ ins.... $19 50

One in carton; wt each 4 lbs.

TURNER

Burns Gasoline Only.

Closed generator type with underflow across base of burner, insuring quick generation.

Self lubricated parachute type pump with automatic check fitted in handle. Complete with removable soldering hook.

Each

No. 205—Capacity 1 qt; diam 5¾ ins; height over all 9¾ ins.... $15 00

One in carton; wt each 4 lbs

TURNER

Burns Gasoline or Kerosene.

Constructed with shut-off and adjusting needle separate, preventing an enlarged orifice. Baffle in burner gasifies either gasoline or kerosene.

Self lubricated parachute type pump with automatic check fitted in tank; corrugated wood handle.

Each

No. 9—Capacity 1 pt; diam base 4¾ ins; height over all 8½ ins.... $15 00

One in carton; wt each 3 lbs.

TURNER

Burns Gasoline or Kerosene

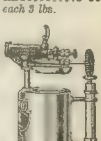
Constructed with shut-off and adjusting needle separate, preventing an enlarged orifice. Baffle in burner gasifies either gasoline or kerosene.

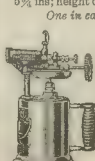
Self lubricated pump with automatic check fitted in handle. Extra large burner recommended for outside work.

Each

No. 38T—Capacity 1 qt; diam base 5¾ ins; height over all 9⅞ ins.... $16 50

One in carton; wt each 4 lbs.





TURNER

Burns Gasoline or Kerosene.

Constructed with shut-off and adjusting needle separate, preventing an enlarged orifice. Baffle in burner gasifies either gasoline or kerosene.

Self lubricated parachute pump with automatic check fitted in tank; corrugated wood handle.

Each

No. 39—Capacity 1 qt; diam base 5½ ins; height over all 9¾ ins.... $17 25

One in carton; wt each 4 lbs.

SQUARING SHEARS

Capacity No. 18 Gauge Iron and Lighter

No.	122B	132B	137B	142B	152B
Length Cutting Blades, In.	22	30	36	42	52

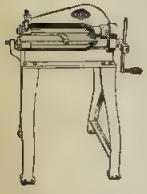
Width Bed Plate, In.	12	14	14	14	14
Shipping Wght. lbs	375	540	650	850	1000
With Side Tables, Each	$177.00	192.00	257.00	327.00	457.00
Without Side Tables, Each	177.00	190.00	250.00	320.00	450.00

NOTE No. 122B furnished with short front arms. Other numbers are furnished with long front arms. Nos. 137, 142 and 152 regularly equipped with hold-down attachment. Nos. 142 152 have extensible steel treadle. Wood top shelf can be furnished for Nos. 122 and 132, and finger guard can also be fitted, but at an extra cost.

RAPID SLITTING SHEARS

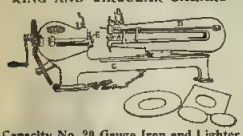
Capacity No. 16 Gauge Iron and Lighter



Permit the most rapid means for slitting iron used in cornice, furnace, blow pipe, ventilation work, etc. The cutters are made from a special high grade tool steel, properly hardened and tempered and have two cutting edges, making them reversible. The crank is adjustable to different leverages

No. 255 Diameter of cutters, 3½ inches; depth of cutting head to gauge, 18 inches; depth cutting head to face, 10 inches; size of table, 20x8 inches; shipping weight, 380 lbs. ..... Each, **$150.00**

RING AND CIRCULAR SHEARS



Capacity No. 20 Gauge Iron and Lighter

Intended for cutting circles or internal rings.

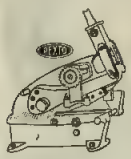
No.	238	288
Diameter Cutters, In.	1⅝	1⅝
Diameter Clamping Discs, In.	2¾	2¾
Depth Cutting Head to Gauge, In.	9½	9½
Depth Cutting Head to Frame, In.	10	30
Depth Circle Arm, In.	16½	36½
Will circle from Square Blanks, In	3¼ to 22	3¼ to 42¼
Will cut Rings small as (inside diameter), In.	3¼	3¼
Will cut Rings large as (outside diameter), In.	22	42½
Shipping Weight, Lbs.	195	290
Each	$140.00	180.00

Note: Can be furnished for power with tight and loose pulleys when specified.

PEXTO TINNERS' TOOLS

LEVER SHEARS

Capacity No. 10 Gauge Iron and Lighter



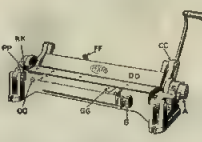
These shears are commended for the slitting of sheets, length or crosswise, with ease up to their full rated capacity. Will cut bar iron ¼x 1½ inches. No. R0296 will cut rods up to ½ inch diameter.

No. 0296 Length of cut, 7⅞ inches; length of gauge rod, 14½ inches; shipping weight, 175 lbs. . . . . Each, **$120.00**

With Rod Cutter

No. R0296 Same as No. 0296, except is fitted with rod cutter..... Each, **$140.00**

BAR FOLDERS



Will form 3/16 Inch Locks and Wider, No. 22 Gauge Iron and Lighter, 1/2 Inch Locks on No. 24 Gauge, 3/32 Inch Locks on XX Tin

They are intended for forming the edges of sheet metal at various angles. They will produce closed locks as well as open or round locks for inserting a wire in the flat sheet.

No.	62B	63B
Length. In.	29	30
Will form closed and open locks, In.	⅛ to 1	⅛ to 1
Will form open locks to received wire up to, In.	⅛	⅜
Shipping Weight, Lbs.	140	220
Each	$110.00	130.00

SHEET IRON FOLDERS

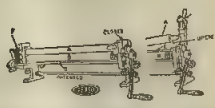
Capacity No. 22 Gauge Iron and Lighter

Folders on this page are of all iron construction, carefully machined, fitted with planed steel bending blade, and where an indispenable folder is required for ordinary use

No. 2B Length, 30 inches; will form locks ⅛ to ⅝ inches; shipping weight, 105 lbs... . . . . Each, **$36.00**

Note: Entire Page Factory Shipment Only

FORMING MACHINES

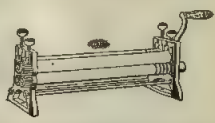


Capacity No. 22 Gauge Iron and Lighter Slip Roll Pattern

Machine cut steel compensating gears. In these formers gripping rolls have an extreme clearance of ½ inch. Grooves cut in rolls are intended to allow work with a wire to be formed.

No.	0381A	381A	382A	0384A
Length of Rolls, In...	42	37	30	20
Diam. of Rolls, In....	2	2	2	1½
Shipping Wt., Lbs	200	180	165	80
Each	$96.00	72.00	68.00	60.00

Note: Tight pulley, or tight and loose pulleys and iron floor legs can be fitted when so ordered. When preferred all three rolls can be arranged driven at extra cost



Capacity No. 22 Gauge Iron and Lighter Plain Pattern

Solid housings, machine cut steel compensating gears. Grooves cut in rolls are intended to allow work with a wire to be formed. Wire should only be formed between the grooves cut for that purpose.

No.	372	373	380
Length of Rolls, Inches	37	21	20
Diam. of Rolls, Inches..	2	2	1½
Shipping Weight, Lbs...	165	140	60
Each	$62.00	53.00	46.00

GROOVING MACHINES

Capacity No. 24 Gauge Iron and Lighter—With Flattening Attachment

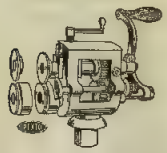
For grooving the longitudinal seams in stove pipe and other sheet metal cylinders.

Six grooving rolls are furnished, one each with ⅞, ⅝ and ⅜ inch grooves, two with inch grooves and one flattening roll.

No. 518A Will groove work length, 30 inches; diameter of smallest pipe that can be grooved, 2 inches; shipping weight, 260 lbs. ..... Each, **$130.00**

PEXTO TINNERS' TOOLS

TURNING MACHINES

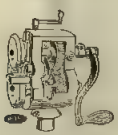


Capacity No. 22 Gauge Iron and Lighter

For preparing a seat in vessels, etc. to receive a wire. Furnished complete with offset standard.

No.	*541	*542
Diameter of Rolls, In.	2	3
Smallest diam. of wire that can be used, In.	3/8	1/2
Largest diam. of wire that can be used, In.	1/4	5/8
Shipping Weight, Lbs.	25	81
Each	$40.00	46.00

WIRING MACHINES

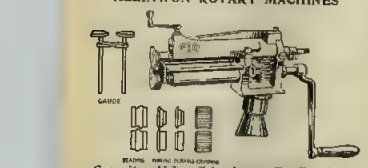


Capacity No. 22 Gauge Iron and Lighter

For working metal around wire after the seat has been prepared with the Turning Machine. Furnished complete with standard.

*No. 525A Diameter of rolls, 3 in.; will receive wire up to diameter, 7/8 in.; shipping weight, 81 lbs. ..... Each, $10.50

ALLINWON ROTARY MACHINES



Capacity—Using Crimping or Beading Rolls No. 26 gauge iron and lighter.

Capacity—Using Turning, Wiring or Burring Rolls No. 24 gauge iron and lighter.

Five Operations with One Machine

Furnished complete with standard and five pairs of rolls: viz; crimping, beading, turning, wiring, and burring and one extra gauge. Provided with forward and reverse drive.

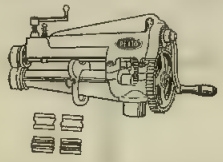
*No. 632 Depth throat to frame, 6¼ in.; depth throat to gauge, 5⅛ in.; width of crimping rolls, 1⅞ in.; width of beading rolls, 1⅞ in.; diameter of turning and wiring rolls, 1⅞ in.; smallest wire that can be used with turning rolls, 11 gauge; wiring rolls receive wire up to 5 gauge; widest flange or burr that can be turned with burring rolls, ⅞ inches; distance between shaft centers, 1¼ in.; shipping weight, 60 lbs. ..... Each, $100.00

BEADING MACHINES

Capacity No. 24 Gauge Iron and Lighter.

Connecting gears are cut from solid steel; reinforced frame and cap. Furnished complete with standard and four pairs of rolls; one pair each Ogee ⅜ inch, triple ⅝ inch single ¼ and ⅞ inch.

*No. 620 Depth throat to frame, 6¼ in.; depth throat to gauge. 5½ in.; diameter of rolls, 1⅛ in.; width of rolls, 1⅛ in.; distance between shaft centers, 1⅞ in.; shipping weight 50 lbs. ..... Each, $28.00



Capacity No. 20 Gauge Iron and Lighter.

Driving Gears are cut from solid cast iron. Connecting Gears are machine cut steel. Furnished complete with standard and three pairs of beadings rolls.

No.	*617B	*619B
Depth Throat to frame, In.	13	7½
Depth Throat to Gauge, In.	12	6⅝
Distance between Shaft Centers, In.	2⅜	2⅜
Diameter Rolls, In.	2¾	2⅜
Width Rolls, In.	1⅝	1⅜
Ratio of Gearing	3½ to 1	2⅜ to 1
Size Single Bead in Rolls, In.	⅜	¼

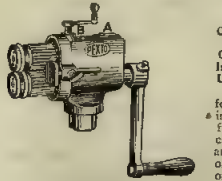
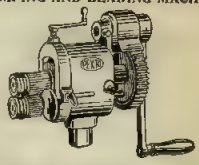
CRIMPING AND BEADING MACHINES



Capacity No. 24 Gauge Iron and Lighter Used for making a uniform crimp and bead or crimp only in pipe of black or galvanized iron. Constructed of steel except frame and crank. Furnished complete with offset standard and one pair of steel blank collars.

No.	581	0581
Style of Crimp	Spiral	Straight
Diameter Beading Rolls, In.	1⅛	1⅛
Diameter Crimping Rolls, In.	1⅛	1⅛
Width Crimping Rolls, In.	1¾	1¾
Width Beading Rolls, In.	1	1
Size of Ogee Bead, In.	⅜	⅜
Shipping Weight, Lbs.	30	30
Each	$13.25	13.25

CRIMPING AND BEADING MACHINES



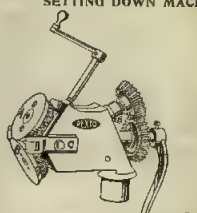
Capacity No. 20 Gauge Iron and Lighter.

For facilitating the putting together of pipe. These machines are adjustable for two speeds, geared for heavy work and may be run direct drive on light iron.

No. 585A has spiral crimping rolls, No. 0585A has straight crimping rolls. Furnished complete with standard and one pair of blank rolls.

No.	585A	0585A
Diameter Beading Rolls, In.	1⅛	1⅛
Diameter Crimping Rolls, In.	1⅛	1⅛
Width Crimp Rolls, In.	1¾	1¾
Width Bead Rolls, In.	1	1
Size Ogee Bead, In.	⅜	⅜
Ratio Gearing	3:1	3:1
Distance between Shaft Centers, In.	1⅞	1⅞
Shipping Weight Lbs.	65	85
Each	$52.00	52.00

SETTING DOWN MACHINE

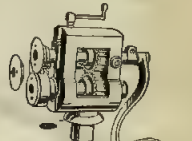


With Inclined Faces.

For setting down seams preparatory to double seaming and for closing seams in other work. Furnished complete with standard.

No.	*561	*562
Capacity Gauge Iron and Lighter	24	18
For seams up to	⅝	½
Shipping Weight, Lbs.	60	100
Each	$56.00	100.00

BURRING MACHINES



Capacity No. 22 Gauge Iron and Lighter.

For burring or flanging bottoms and bodies of vessels, etc. Furnished complete with standard.

No.	*576A	*577A
Diameter of Rolls, In.	1¼	2⅛
Widest Flanges or Burr that can be turned, In	⅛	¼
Shipping Weight, Lbs.	21	25
Each	$34.00	38.00

PEXTO TINNERS' TOOLS

WOOD ROOFING FOLDERS

Common Type

Constructed with well seasoned wood, with blades fitted of high grade special steel, accurately machined and finely finished. Hinges and handles made of the best materials.

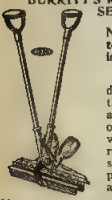
No.	13C	23C	33C
Size for Sheets, Width In.	20	28	30
Forms Locks, In.	⅛	⅞	1
Shipping Weight, Lbs.	9	11	14
Each	$7.00	8.00	8.50

Improved Type

Same as common type except has an adjustable gauge.

No.	113	123
Size for Sheets, Width, In.	20	30
Forms Locks, In.	⅛ to ⅝	⅛ to ⅝
Shipping Weight, Lbs.	10	17
Each	$9.50	11.50

BURRITT'S ROOFING DOUBLE SEAMERS



Nos. 742 and 742½ are fitted for I. C. Tin. No. 0742 is fitted for Iron Roofing.

For standing lock will do the work more evenly than by any other process and leave the formed lock of uniform height. They work well over uneven roof boarding and double seam hips and ridges with perfect ease. Two pair in a set.

No.	742	742½	0742
To Follows Tongs, In.	1&1¼	1¼&1½	1½&1¾
Finishing a Lock Height, In.	¾	1	1
Weight Per Set of Two Pairs, Lbs.	40	40	42
Per Set of Two Reamers	$36.00	36.00	36.00

ADJUSTABLE PIN ROOFING TONGS

Forged steel handles, milled steel blades, natural finish. Will turn five different widths of locks, ⅜, ¾, 1, 1¼ and 1½ inches, by means of the gauge pin holes.

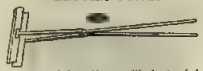
No. 773 Length of handles, 21 in.; size of blades: length, 18⅛ in.; width, 2 in.; shipping weight, 17 lbs. .....Each, **$9.50**

BABY HANDY SEAMER

Adjustable for seams of different widths from ⅛ to ⅞ inches. Can be carried in tool kit or pocket.

No. 791 Size overall, 7¼x3½ in.; size blade: length, 3½ in.; width ⅞ in.; weight, 1 lb. ..... Each, **$3.40**

GUTTER TONGS



Forged steel handles, milled steel jaws.

No. 777 Length of handles, 24⅛ in.; depth of jaws, 14 in.; size of blades: length, 12½ in., width, 1¾ in.; weight each, 10 lbs..... .....Each **$7.20**

DOUBLE SEAMING STAKES

Cast iron with polished faces. Complete with four heads.

No. 949 Size of heads, A-6 in. diameter; B 8½x2⅝x3¾ in.; C-5½x4⅛ in.; D-5⅝x 4¼x3¾ in.; shipping weight, 110 lbs..... .....Each, **$36.00**

DOUBLE SEAMING STAKES

Wrought iron with steel faces.

No. 921 Length large end, 17 in.; length small end, 12 in.; size of each end, 3x1⅝ in.; weight each, 37 lbs.....Each, **$42.00**

CONDUCTOR STAKE

Cast iron with polished faces.

No. 971 Length of large end, 15 in.; length of small end, 11½ in.; diameter of large end, 2¼ in.; diameter of small end, 1⅝ in.; weight each, 28 lbs.....Each, **$18.00**

BLOW HORN STAKE

Wrought iron with steel faces.

No. 925 Length of large end, 9 in.; length of small end, 18 in.; diameter small end, ⅝ to 1½ in.; diameter of large end ½ to 1⅝ in.; weight each, 14 lbs..... ....Each, **$36.00**

CANDLE MOULD STAKES

Wrought iron with steel faces.

No. 956 Length of large end, 18⅛ in.; length of small end, 9⅛ in.; diameter of large end, ⅛ to ⅞ in., diameter of small end, ⅛ to 1⅛ in.; weight each, 7⅛ lbs.... .....Each, **$16.00**

NOTE: Entire Page Factory Shipment Only.

HATCHET STAKES

Wrought iron with steel faces.

SEARIGHT

Compound Lever

Forged with solid blades of high grade crucible tool steel, scientifically treated by measured heat. The compounding lever action gives an evenly distributed cutting stram from a close-throat start to the finish at the point of the blade. The short cutting blade is connected to the short lever handle by links on each side with close fitting shouldered rivets, making a rigid connecting frame without side-springing tendencies.

BLOW TORCHES
CLAYTON AND LAMBERT

Double Needle, For Gasoline or Kerosene

Is extra large and is designed for brazing, tempering and preheating. Also used in the garage or repair shop for heating and straightening automobile axles, frames, etc. The C. & L. patented needle burner produces tremendous heat; it is made of generator metal and has two needles, the lower is the shut off and the upper a cleaner needle made so that it is impossible to enlarge the orifice. Tank is made of heavy gauge seamless drawn brass, reinforced and equipped with automatic brass pump. Burner has cast hook and support for holding a soldering copper; hook is removable

No. 206 Capacity, 2 quarts. Weight 7¾ lbs. ....Each, **$30.00**

Double Needle, for Gasoline or Kerosene

Is a powerful torch for the mechanic. Works perfectly in wind and weather far below zero. Is fitted with the C. & L. patented needle burner, producing tremendous heat; it is made of generator metal and has two needles, the lower is the shut off and the upper a cleaner needle made so that it is impossible to enlarge the orifice. Tank is made of heavy gauge seamless drawn brass, with cushion band at base and fitted with automatic brass pump Burner has cast hook and support for holding a soldering copper; hook is removable.

No.	210	208
Capacity	1 Pint	1 Quart
Weight, Lbs.	4½	5½
Each	$18.00	19.00

Double Needle, For Gasoline or Kerosene

Is oblong, being 1¾ inches thick, 5 inches long and stands 8½ inches high. Is especially adapted to requirements of automobile users, electricians and repair men, as it can easily be carried in the tool kit. Is made of heavy gauge brass with hinged supports at base to prevent tipping over. Improved C. & L. patented double needle burner is made of generator metal and produces an intensely hot blue flame; automatic pump forms part of the handle. Burner has cast hook and support for holding a soldering copper; hook is removable

No. 48 Capacity, 1 Pint. Weight, 4¾ lbs..... ..Each, **$24.00**

For Gasoline

Is desirable where intense heat is wanted. Burner is made of special generator metal that holds the heat longer, having a chamber that super heats the gas before it is burned. Burns perfectly under extreme conditions of wind and cold weather. Burner has rigid hook and support for holding soldering copper; hook is removable. Tank is of heavy gauge brass with patented cushion band at base and is fitted with improved patented brass pump.

No. 32 Capacity, 1 quart. Weight, 5¼ lbs.....Each, **$18.00**

All the Above, One in a Carton

BLOW TORCHES
CLAYTON AND LAMBERT

For Gasoline

Is a medum grade torch The burner is made of bronze metal having tapered burner tube, and produces a steady blue flame. It has hook and support for holding a soldering copper; hook is removable. Tank is made of seamless drawn brass with automatic brass pump with double springs. The bottom is concave which serves as a funnel in filling

No. 130 Capacity, 1 quart. Weight, 4¾ lbs.....Each, **$17.00**

For Gasoline

Is a superior quality competitive torch. The tank is made of polished brass with funnel shaped bottom Burner has an open generator that injects the air which mixes with the gas, producing a steady blue flame. Has automatic brass pump in tank. A detachable soldering cop per attachment is included which fits over the burner tube; hook is removable.

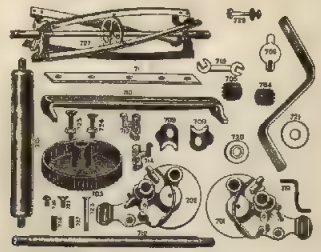
LAWN MOWER PARTS.

FOR STYLE "K" GREAT AMERICAN.



For 3 Knife Solid and 4 Knife Open Cylinder. 14, 16 and 18 Inches.

The right or left side of a lawn mower is determined by standing in back of the machine, as when in use.

NOTE—When parts are wanted for the 10 and 12 inch machines, add 100 to the numbers on this sheet, thus: If Left Hand Pinion is wanted, it would be No. 804; Cylinder, No. 807, etc., as shown by special circular for 10 and 12 inch. In ordering: First, give number with description of parts; second, always give width of cut and name of machine.

STANLEY GAGE SELF SETTING

Japanned smooth iron castings, polished face and sides; varnished rosewood handle and knob; brass screw adjustment. The self setting feature lies in the fact that the plane iron if taken out to be sharpened goes back in exactly the same position as before removal. Likewise the plane cap when taken out to allow removal of cutter goes back in its same position.

The plane cap is so designed that by slight adjustment it connects the cutter to either single or double iron. The plane iron consists of three pieces; cutter, adjustment slide and binder plate, all being fastened by one screw. The adjustment slide is machined on its sides to accurately fit the groove machined in the frog and is permanently fixed both sideways and endwise.

One in cardboard box; wt each 1 lb.

Per Doz

Extra Cutters, 1⅜ in $10 80

Half doz in cardboard box; wt per doz 1 lb.

STANLEY, Iron Block.

Adjustable.
Low Angle.

Hardwood handle and knob. Fitted with patent adjustable throat, which enables the user to work equally well on hard or soft wood. Each

No. 62—Length 14 ins; 2 in. cutter $12 00

One in cardboard box; wt each 4 lbs.

STANLEY, Iron Block.
Double End.

Easily used as a block plane or cutter; may be reversed for planing in close corners not easily reached with other planes.

Not Adjustable, Hardwood Knob.

Each

No. 130—Length 8 ins; 1⅝ in. cutter $3 60

One in cardboard box; wt each 1¾ lbs.

Per Doz

Extra Cutters—1⅝ in $8 25

Half doz in cardboard box; wt per doz 1½ lbs.

PLANES

Japanned cast iron frame and caps, tool steel cutters, tempered and polished.

STANLEY, Iron Block.

Adjustable Double End.

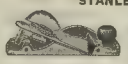
Hardwood knob; has two slots and movable cutter seat. When it is desired to use it as a bull nose plane the cap and cutter can be removed and the adjustable cutter seat reversed.

Each

No. 131—Length 8 ins; 1⅝ in. cutter $5 85

One in cardboard box; wt each 1¾ lbs.

STANLEY, Rabbet and Block.



A detachable side will easily change this tool from a block plane to a rabbet plane or vice versa; the cutter is set on a skew.

Each

No. 140—Length 7 ins; 1¾ in. cutter $6 30

One in cardboard box; wt each 2 lbs.

STANLEY, Side Rabbet.

For side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give the tool a form by which it will work close up into corners when required. Each

No. 98—Length 4 ins; ½ in. cutter $4 65

One in cardboard box; wt each about ½ lbs.

STANLEY, Bull-nose Rabbet.

Non-adjustable, polished bottom, for general rabbeting and working into close corners.

Each

No. 75—Length 4 ins; 1 in. cutter $1 65

One in cardboard box; wt about ¾ lb.

STANLEY, Carriage Makers' Rabbet.

Varnished rosewood handle and knob; with screw and lever adjustments; adjustable throat.

Each

No. 10½—Length 9 ins; 2⅜ in. cutter $11 40

One in cardboard box; wt each about 9 lbs.

Each

Extra Cutters, 2⅜ ins $1 50

Half doz in cardboard box; wt per doz 5 lbs.

STANLEY, Scrub.

Japanned, cast iron frame; beech handle and knob. Designed for planing down to rough dimensions any board too wide to rip with saw. This is made possible by extra heavy cutter with rounded cutting edge. Each

No. 40—Length 9½ ins; 1⅜ in cutter $5 10

One in cardboard box; wt each 2½ lbs.

PLANES

Cast iron frame, tool steel cutters, tempered and polished.

STANLEY, Improved Rabbet.

Japanned cast iron frame and handle. All fitted with detachable depth gauge. No. 190 with spur for working across grain. Length over all 8 inches.

	Each
No. 192—1 inch cutter; wt each 2 lbs	$5 55
No. 191—1¼ in. cutter; wt each 2¼ lbs	5 85
No. 190—1½ in. cutter; wt each 2½ lbs	6 21

One in cardboard box.

STANLEY, Duplex Rabbet and Filletster.

Japanned cast iron frame and handle. Can be used as a buil nose rabbet. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge.

	Each
No. 78—Length 8½ ins; 1½ in. cutter	$6 90

One in cardboard box; wt each about 3 lbs.

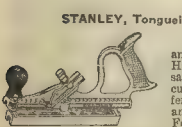
STANLEY, Rabbet and Filletster.

Japanned cast iron frame, fence and handle. The arm to which the fence is secured can be screwed into either side of the stock, making a superior right or left hand filletster, with adjustable spur and depth gauge, allowing a groove to be cut any desired depth up to ½ inch. The screw at top of frame can be removed allowing the plane to be used as a bull nose rabbet. Plane is also equipped with spur for use in working across the grain.

	Each
No. 278—Length 6¾ ins; 1 in. cutter	$6 75

One in cardboard box; wt each 2 lbs.

STANLEY, Tongueing and Grooving.



Nickel plated cast iron frame and handle; rosewood knob. Has two plow cutters of the same width, and one extra wide cutter. When the guide or fence is set both cutters work and a tongue can be made. Fence hung on a pivot, can be swung around end for end. This movement covers one of the cutters.

	Each
No. 48—Length 10½ ins; cuts 5/16 in. groove on boards ¾ to 1¼ ins; centers on ⅝ in.	$10 95

One in cardboard box; wt each 3¾ lbs.

PLANES

STANLEY, Double End Match.

Nickel plated cast iron frame, handle and cap. Provided with both tongue and groove irons, both governed by one permanent fence. With one side a tongue can be cut and by reversing ends the plane will cut a groove on one side for use on thicker stuff than plane will tongue and groove in the center.

Nos.	147	148
Length, ins	9	9
Size of cutter, ins	1/16	¾
For boards, ins	1/16 to ¾	¾ to 1
Centers on, ins	⅝	¾
Wt each, lbs	2¼	2¼
Each	$9 00	9 60

One in cardboard box.

STANLEY, Adjustable Circular.

Japanned cast iron frames, caps and handles; polished bottom. Can be adjusted to work on concave or convex surfaces; graduated scale on the gears, face can be set to work an arc of the same circle, both concave and convex.

	Each
No. 113—Length 10 ins; 1¾ in. cutter	$15 75

One in cardboard box; wt each about 4 lbs.

STANLEY, Plow, Dado, Filletster and Matching.

Nickel plated cast iron; rosewood handle and knob.

Has 8 plow and dado bits, 1/16 to 1¼ inch, one 1½ inch filletster cutter, 1 slitting blade, one ¼ inch tongueing tool. Is readily converted into a filletster, plow or matching plane. All the tools except the slitting blade are secured on the main stock askew.

	Each
No. 46—With 11 cutters; length 10½ ins	$23 25

One in cardboard box; wt each 6 lbs.

STANLEY, Adjustable Beading, Rabbet and Matching.

Nickel plated cast iron; rosewood handle, knob and fence.

Fitted with an adjustable fence or guide and a depth gauge also with spurs for use when working across the grain.

Has one 1½ inch sash tool, one ¼ inch match tool, one slitting tool, one 1¾ inch filletster, eleven plow and dado tools, 3/16 to ⅝ inch, seven beading tools, 1/16 to 1/16 inch.

	Each
No. 45—With 22 cutters; length 11 ins	$33 00

One in cardboard box; wt each 9½ lbs.

PLANES

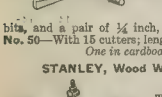
STANLEY, Adjustable. Beading and Matching.

Nickel plated cast iron stock and frame. For ordinary center beading. By adjusting fence, center beading can be done up to 6 inches from the edge of a board. Exept for working across the grain, the spurs need not be used. Each plane furnished with 1/4, 5/16, 3/8, 7/16, 1/2 and 5/8 inch beading tools, 3/8, 7/16, 1/2, 5/8, and 3/4 inch plow and dado bits, and a pair of 1/4 inch, tongueing tools. Each

No. 50—With 15 cutters; length 9 1/4 ins $18 00

One in cardboard box; wt 3 1/2 lbs

STANLEY, Wood Workers' Handy Router.

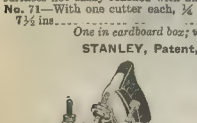


Nickel plated, cast iron; beech-wood knobs; open throat. Furnished with patented pointed cutters. Perfectly adapted to smooth the bottom of grooves, panels or all depressions below the general surface of any wood work. Bits can also be clamped to back side of upright post, and outside of stock. In this position will plane into corners, will router out mortises for sash frame pulleys, or will smooth surfaces not easily reached with any other tool. Each

No. 71—With one cutter each, 1/4 and 1/2 in; length 7 1/2 ins $8 55

One in cardboard box; wt each 2 5/8 lbs.

STANLEY, Patent, Universal.



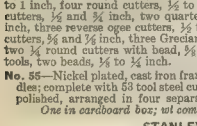
Consists of a main stock with two sets of transverse sliding arms, a depth gauge adjusted by a screw and a sliding arm, and a sliding cutter with stop. The bottom is adjustable both vertically and laterally.

Has one 1 1/2 inch sash tool, one 1 1/4 inch match tool, one slitting tool, one fillester, eleven plow and dado tools, 1/8 to 3/4 inch, nine beading tools, 1/4 to 3/4 inch, foul fluting tools, 1/4 to 3/4 inch, four hollow cutters, 1/2 to 1 inch, four round cutters, 1/2 to 1 inch, two quarter hollow cutters, 1/2 and 3/4 inch, two quarter round cutters, 5/8 and 7/8 inch, three reverse ogee cutters, 1/2 to 1 inch, two Roman ogee cutters, 5/8 and 7/8 inch, three Grecian ogee cutters, 1/2 to 1 inch, two 1/4 round cutters with bead, 5/8 and 7/8 inch, three reeding tools, two beads, 1/8 to 1/4 inch. Each

No. 55—Nickel plated, cast iron frame; rosewood handles; complete with 53 tool steel cutters; tempered and polished, arranged in four separate cases $64 50

One in cardboard box; wt complete about 15 1/4 lbs.

STANLEY



Adjustable Scraper.

Japanned cast iron frame; rosewood handle and knob. The blade is adjustable endwise and for angle and can be firmly locked in any position desired.

This tool is used for scraping and finishing veneers, cabinet work or hard wood in any form. Can be used equally well as a tooth plane and scraping off old paint and glue. Each

No. 112—Length 9 ins; 3 in. cutter $9 00

One in cardboard box; wt each 1 lbs.

WOOD BENCH PLANES

Selected seasoned beechwood, plain finish; extra quality cast steel cutters, tempered; polished starts.

Smooth.

Length 8 inches; width of cut 1 1/4 to 2 inches. Each

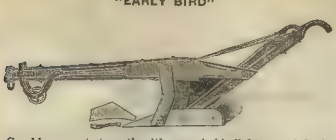
GRADING PLOWS

"EARLY BIRD"



Combines great strength with remarkable lightness of draft. Owing to the peculiar shape of the moldboard, can be drawn easily by two horses, but is strong enough for six.

Being made to cut a deep rather than wide furrow, can be regulated to any depth required. It does not turn the soil over, but loosens it, leaving the trash on top so that it does not interfere with the scraper when filling.

Beam is of the toughest hardwood, carefully selected, 3¼x8½ inches at standard; heavily ironed on top and bottom with iron straps extending from standard to clevis and bolted to both. Steel clevis with two strong rings. Handles heavily braced. Stout V-shaped standard, double bolted to beam. Reversible cutter. Best plow steel in point, landside, moldboard and cutter. Gauge wheel adjustable, 3x6½ inches; or adjustable steel shoe as ordered, included in the price of plow.

Right or Left Hand.

	Each
No. 22—Length of beam 7 ft 6 in; width of beam 11 ins; can be regulated to any depth required	✣$100 50
No. 22S—Extra shares	✣ 12 75

Shipped loose; wt each 205 lbs.

"EARLY BIRD"

For Railroad and Township Work.

Beams of best white oak, heavily ironed both on the upper and lower side. Wrought steel celvis with two heavy rings. Reversible and sufficiently strong cutter. Best grade of timber in handles which are well straped on both sides. All hand holds malleable iron, except on No. O. Moldboards shares and cutters best grade of plow steel. Guard on exposed handle to protect it when dragging.

Right or Left Hand.

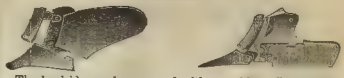
CHILLED PLOWS

W. J. OLIVER



The landside can be removed without taking off any other part. All strains are carried to the frog direct; the frog is guaranteed never to break through point hole. Landside and share are immovable; there is no strain on bolts; these parts are held rigidly in place in recesses cast in frog to receive them.

Interlocking devices make plow hold its original shape, and prevent plow being strained out of shape. These interlocking devices preserve side and bottom "suck"; they take strain off of landside and point bolts and it is impossible for the bolts to work loose.

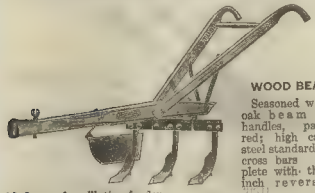
CULTIVATORS

GENUINE BRINLY HARDY, RASTUS

Originally designed for the cultivation of cotton in heavy soil where deep cultivation was desired, now universally used for the cultivation of all row crops. The shovels have a peculiar twist which sifts a fine dust mulch to the plants throwing the weeds and clods to the center, leaving a smooth furrow bottom preventing the soil from washing.



WOOD BEAM

Seasoned white oak beam and handles, painted red; high carbon steel standards and cross bars. Complete with three 3 inch reversible blades, and oscillating fender.

	Each
No. R10—Wt each 55 lbs	✣$17 70

Shipped loose.

CULTIVATORS

SPRING TOOTH

Showing No. 153.

Steel frames and highly tempered steel blades. By hitching singletree in outside hole of clevis and removing center tooth, can be used to straddle row with horse walking on one side.

They are made with adjusting rods or with levers. By easy manupulation of the adjusting rods or a slight movement of the levers it can be quickly converted into the following implements: straight cultivator, "A" shaped cultivator, "V" shaped cultivator, right hand side harrow, left hand side harrow and six tooth harrow for straddling row. Any of the six adjustments can be made while the horse is in motion.

One Horse.

	Each
No. 1—With wood beam, adjusting rods and seven plain teeth; wt each 60 lbs	✣$15 60
No. 3—With wood beam, adjusting rods and seven detachable blades; wt each 64 lbs	✣ 17 40
No. 31—With wood beam, adjustable rods, and five plain teeth; wt each 45 lbs	✣ 13 20

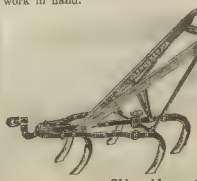
No. 183—With steel beam, levers and five detachable blades; wt each 62 lbs	✣ 21 90
Extra Fenders	✣ 2 46

Shipped loose.

FIVE TOOTH

Frames painted green, striped in red with varnished handles. Have extra holes in frame for two additional blades in case it is desired to use a seven tooth cultivator. The standards are adjustable permitting of different degrees of pitch to suit the work in hand.



Wheel set screw adjustment, which enables the operator to adjust the contraction or expansion of the cultivator without resort to a wrench.

	Each
No. A—Five tooth, with five 3x8 in. blades	$13 80

Shipped loose; wt each 52 lbs.

✣F. O. B. Kentucky Factory Only.

CULTIVATORS

FIVE TOOTH

Lever adjustment, which is by far the most desirable form of construction, as it enables the operator to contract or expand the cultivator without leaving his place at the handles.

Each

No. C—Five tooth, with five 8x8 in. blades..... $15 30

Shipped loose; wt each 60 lbs.

PLOW STOCKS

GEORGIA

Single, with Ratchet, Heel Bolt and T Washer.

Varnished beam and handles, wrought iron standard, patent malleable handle clips. These clips are of value to the planter, avoiding trouble with split handles. The standard moves on a pivot which passes through it and the brace, and can be set at any angle by loosening the two bolts by which standard is fastened to beam and moving standard forward or backward as desired. Any kind or style of blade that takes a heel bolt can be used on these stocks.

Each

No. 2—Beam, 1¾x3⅝x46 ins; standard 1¾x1¼ ins.... $4 95

Shipped loose; wt each 19 lbs.

UNIVERSAL

Single, with Heel Bolt and T Washer.

Beam and handles varnished. With extra strong adjustable wrought iron standard, bent or loop foot, made in one piece. Handle clips, heel bolt and "T" washer are furnished with each stock.

Each

No. 15—Beam, 1¾x3¼x46 ins; standard 1¾x⅝ ins.. $6 30

Shipped loose; wt each 22 lbs.

TRUCKER BLADES—With Bolts.

Per 100

No. 2A—Size 2x8x¼ ins; for 7 tooth cultivator..... $36 45
No. 3A—Size 3x8⁹/₁₆ ins; for 5 tooth cultivator..... 39 00

PLOW STOCKS

PLANTERS' FRIEND

Double Stock, with Ratchet, Heel Bolt and T Washer.

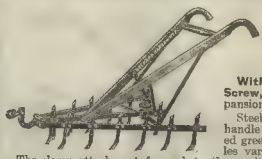
Beams and handles varnished. Planters friend, known as the "Parallel" beam double stock, preferred to the "V" stock by some, but used for the same purpose with any kind of blade. Iron standards with ratchet, adjustable, and distance between them may be widened or narrowed as desired.

Each

No. 9PF—Without blades, beams 1½x2½x33 ins, standards 1⅝x⅛ in..... $8 55

Shipped loose; wt each 33 lbs.

ORCHARD HARROWS



With Wheel Set Screw, to gauge expansion.

Steel frame and handle braces, painted green; wood handles varnished.

The clamp attachment for each tooth permits setting teeth at any angle or vertical position desired.

Reversible steel diamond shaped teeth, ⅝x⅞x9½ inches. Drawn to a cutting edge on one end and beveled on the other.

Each

No. F—Fourteen tooth..... $13 05

Shipped loose; wt each 56 lbs.

With Expanding Lever.

Steel frame and handle braces, painted green; wood handles varnished.

The clamp attachment for each tooth permits setting teeth at any angle or vertical position desired.

Reversible steel diamond shaped teeth ⅝x⅞x9½ inches, drawn to a cutting edge on one end and beveled on the other.

Each

WALDEN-WORCESTER INTERCHANGEABLE.

STEEL SOCKETS.

Sockets—Sockets are machine made from the solid bar. Broaching depth is the thickness of the nut to be fitted, and broached 1/64 in. over the size of the nut. Sockets are counter-drilled making extreme bolt size depth of socket ½ in. more than the thickness of the nut. The broached end is countersunk slightly to relieve the square edges and allow more rapid placing of socket on bolt head.

In designing sockets, we have taken into consideration where they are to be used and have gone as far as we think practical in tapering the sockets so that the user can get in with them. Sockets should be properly fitted to the head on which they are to be used before any great strain is put on them.

Hexagonal Sockets 214-228 inclusive are Chrome nickel.

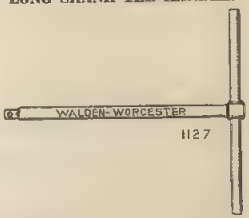
COMBINATION TEE AND OFFSET.

No. 1111. Length overall 10 in. Wt. 1 lb. ..... Each $0 75

SHORT SHANK TEE HANDLE.

No. 1106. Shank 6 in., handle 8 in. Wt. 1 lb. ..... Each $1 00

LONG SHANK TEE HANDLE.



No. 1127. Shank 12 in., handle 12 in. Wt. 1lb., 12 oz. ..... Each $1 40

LONG SHANK SPEED WRENCH.

No. 1119. Length overall 20 in., shank 9¼ in. Wt. 1 lb., 12 oz. ... Each $1 20

SHORT SHANK SPEED WRENCH.

No. 1115. Length overall 14¼ in. Shank 4¼ in. Wt. 2 lbs. .. Each $1 30

HEAVY DUTY OFFSET HANDLE.

No. 1125. Length overall 10-5/16 in., Wt. 1 lb. ..... Each $0 80

All above, five in a package.

SOCKET WRENCH PARTS.

WALDEN-WORCESTER.

INTERCHANGEABLE.

PLUG CONNECTORS.

No. 1109. Square bar with ball friction on each end for coupling combination parts. Wt. each, 2 ozs..Each $0 35

EXTENSION BARS.

Bars have ball friction on each end to hold sockets and other parts in engagement. Length overall, 9 inches.

No. 1139. Wt. ⅝ lb.....Each $0 60
Five in a box.

UNIVERSAL JOINTS.

Universal Joints are solid steel full machined finish. Used in combination with ratchet wrench extension bars and sockets working successfully at an angle of 45 degrees.

No. 1102. Wt., ½ lb.....Each $1 80

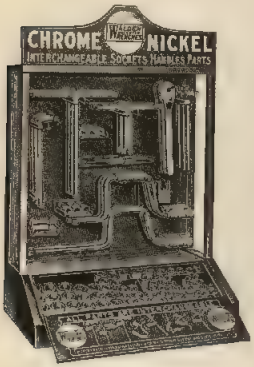
Five in a box.

BRACE TOP OR HANDLE.

A pressed steel handle, working on cone bearing and provided with socket end to fit brace wrench and various combination parts. Valuable auxiliary, with extension bar, ratchet wrench, and socket, on overhead work—millwrights particularly will appreciate this attachment and combination.

No. 1108. Wt. each, 6 ozs...Each $0 60
Five in a box.

STEEL CABINET ASSORTMENT.



A "merchandiser" in every sense of the word—all steel— substantial—convenient—attractive — carrying a selection of **interchangeable** handles, sockets and parts. An ideal cabinet for dealers selling mechanics and car owners. All parts and sockets are **interchangeable** with each other, enabling mechanics to make innumerable combinations to take care of unusual demands.

Assortment includes 113 Wrenches and Sockets as listed in next column.

Hex Sockets 214 to 228 inclusive are Chrome Nickel Steel insuring strength and wear.

Contents:

3—**1119**—Long Shank Speed Wrenches 20 inches overall, 9¼ inch shank, with solid steel grips. ..Each **$1 20**

3—**1115**—Short Shank Speed Wrenches 14¼ inches overall, 4¼ inch shank, with two solid steel grips Each **$1 30**

3—**1127**—Long Shank Tee Handles 12 inch shank with 12 inch sliding cross bar .....Each **$1 40**

3—**1106**—Short Shank Tee Handles 6 inch shank with 8 inch sliding cross bar .....Each **$1 00**

3—**1113**—Back Spin Reversible Rachets 2¾ inches overall, 1 inch diameter .....Each **$1 75**

3—**1111**—Combination Tee and Offsets, 10 in. long, 9/16 in. wire.Each **$0 75**

3— **712**—Ratchet Wrenches.Each **2 00**

3—**1109**—Plug Connectors. ..Each **35**

3—**1139**—9 in.Extension Bars.Each **60**

3—**1110**—Socket Connectors.Each **35**

3—**1125**—Offset Handles. ..Each **80**

3—**1102**—Universal Joints. ..Each **1 80**

18 Wrenches		$15 15

Size of board, 2 ft. x 1 ft. Wrenches, hooks and board, packed for shipment.

No. 56. Wt. each, 27 lbs. . . Each **$15 15**

SOCKET WRENCHES.

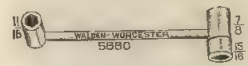
WALDEN-WORCESTER FOR FORD CARS.

SPARK PLUG AND CYLINDER HEAD.

Used on cylinder head cap screws, spark plug, water cylinder outlet, differential oil plug drain, transmission drain plug.

No. 3620. Length overall, 11 inches; socket sizes, 15/16 inch and ⅝ inch. Wt., 1 lb. . . . . Each **$0 85**

DOUBLE END OFFSET— 3 SOCKETS.



Used on front radius rod, spindle pivot with oiler, tire rod, steering arm, spring clip, spring hanger, front wheel flange, front spring perch, drive shaft castle, differential oil drain plug, rear spring clip, rear spring hanger, brake shoe support, rear wheel to brake drum, battery clamp, body bracket connecting bolt.

No. 5660. Length overall, 10½ inches; socket sizes, 15/16 inch, ⅞ inch and 11/16 in. Wt., 1¾ lbs. . . . . Each **$1 10**

DOUBLE END OFFSET— 3 SOCKETS.

Used on drive shaft roller bearing housing cap screws, hub brace rod support, muffler rod, cylinder head cap screws, steering tube flange bolt, running board, motor support front, water cylinder inlet connection, water cylinder outlet connection, fender to running board, dash bracket to dash.

No. 1620. Socket sizes, ⅝ inch and ½ inch. Wt., 1 lb. . . . . Each **$0 85**

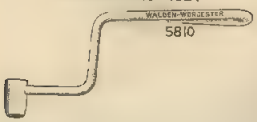
All above, five in a box.

SOCKET WRENCHES.

WALDEN-WORCESTER.

FOR FORD CARS.

CONNECTING ROD.

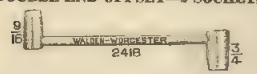


Fits all connecting rod nuts, including the fourth connecting rod. Socket size, ⅝ in.; length overall, 10 5/16 in.
No. 5810. Wt., 1 lb.....Each **$0 60**

FLY WHEEL CAP SCREW.

Used on fly wheel cap screws. Socket size, 11/16 in.; length overall, 11¾ in.
No. 3822. Wt., ¾ lb.....Each **$0 70**

DOUBLE END OFFSET—2 SOCKETS



Used on spindle pivot, spindle tie rod clevis connecting rod bolt, radius rod bolt and nut (rear) differential case, differential case stud, brake shoe support bolt and nut, universal ball cap screws, muffler head to frame bolt, muffler rod, main bearing (rear) intake and exhaust manifold to cylinder block clamp, cam shaft bearing set screw, commutator case support bolt, crank case arm bolt and nut, fan bracket, fan bracket support, battery bracket to frame, transmission drive plate screws, head lamp bracket. Socket sizes, 9/16 and ¾ inch; length overall 9 3/16 ins.
No. 2418. Wt., 1 lb. .....Each **$0 90**

DOUBLE END OFFSET—2 SOCKETS

The 9/16 in. square socket on this wrench, redesigned to take both the center and front main bearing on the Ford car. The socket has been so put as to enable the operator to get a good grip without hurting hand when setting up tight. The 9/16 in. hexagon socket on the other end has a very thin wall for clearance and is intended for wrist pin use only. It is not guaranteed for general use. Used on front main bearing, center main bearing, wrist pin clamp screw, running board bracket, running board to fenders, front spring clamp bolt center.
No. R1881. Socket sizes, 9/16 hexagon, 9/16 square; length overall, 9 7/16 in. Wt., 15 ozs.....Each **$1 20**

All above, five in a box.

FOR FORD CARS.

MAIN BEARING.

For front, center and rear main bearings. An offset wrench with swivel action and two sockets, 9/16 in. square and ¾ in. double broached. Length overall, 12 inches.

No. 01824. Wt., 1 lb. 7 ozs..Each **$1 50**

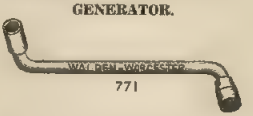
CONNECTING ROD.

Swivel.

An innovation in socket wrenches for reaching the fourth connecting rod. The new feature—the swivel action of the socket on the handle allows the use of the handle at many different angles.

No. 774. Hexagon chrome nickel steel socket, ⅝ inch; length, 13¾ inches. Wt. each, 1 lb. 3 ozs .....Each **$0 90**

CARBURETOR FLANGE AND GENERATOR.



The 9/16 hexagon end is properly designed to reach both flange bolt nuts with carburetor and intake manifold in place on engine. It allows carburetor flange bolts to be tightened in place or the carburetor to be taken off or put on without disturbing the intake manifold.

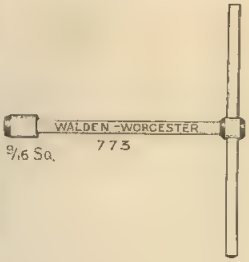
The ⅝ end for generator gives sufficient length of shank to clear breather pipe and commutator. The other end is so designed that the end will clear both radiator shell and fan, thus permitting the generator cap screws to be tightened with ease and convenience. Socket sizes 9/16 and ⅝ inch; length overall 9⅞ inch.

No. 771. Wt., 15 ozs.....Each **$0 80**

All above, five in a box.

FOR FORD CARS.

MAIN BEARING TEE HANDLE.



This wrench is so designed that it may be used on the center main bearing with the motor assembled and on the front main bearing when the motor is out.

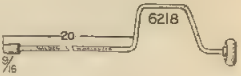
No. 773. Socket, 9/16 inch square; length overall, 10 inches. Wt. each, 1½ lbs. .....Each **$1 50**

SHORT SHANK SPEEDER.

Used on: Crank case lower cover, differential drive gear, muffler, rear axle housing, steering tube flange. Socket size, ½ in.; shank, 8 in.; length overall, 13 7/16 inches.

No. 6064. Wt., 1⅛ lbs.....Each **$0 80**

LONG SHANK SPEEDER.



Used on radiator support nut, front fender iron (side). Socket size, 9/16 in.; length overall 28¾ in.

No. 6218. Wt. 2¼ lbs.....Each **$1 25**

All above, five in a box.

SOCKET WRENCHES.

WALDEN-WORCESTER.

WHEEL ASSEMBLY.

For Ford Wheels.

Covers a demand for a single, substantial, serviceable wrench for assembling wheels on a Ford car. A brace (speed wrench), with two sockets, each having two broached openings to take four parts, front hub cone and axle nut, hub cap and rear axle nut.

Extreme length, 18⅝ in.; 9/16 in. diameter; 6 in leverage; 12 in. sweep; swivel handles on each end adjoining socket.

No. 1490. Wt. each, 3¾ lbs. Each **$2 75**

One in a box

RATCHET.

Used on Ford brake and reverse transmission bands.

No. R4564. Hexagon opening, 11/16 inch; length overall, 6⅝ inches. Wt. each, 4 ozs. ..... Each **$0 55**

NUT AND BOLT SPEEDERS.

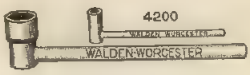
The extension socket holds either the nut or bolt head while the operator spins it off. Extension arm is adjustable for different bolt lengths.

No. 6316. Used on rear axle housing bolt and nut. Socket sizes ½ in. and ½ in.; length overall, 20¼ in. Wt. each, 2½ lbs. ..... Each **$3 00**

No. 6318. Used on ball socket bolt, crank case arm bolt (side), muffler support bolt, steering post bracket bolt, steering yoke clamp bolt, transmission cover. Socket sizes 9/16 in. and 9/16 in.; length overall, 20¼ in. Wt each, 2⅝ lbs. ..... Each **$3 00**

All above, five in a box.

SINGLE END OFFSET—1 SOCKET.



Sockets on Nos. 4214 to 4226 inclusive are of Chrome Nickel Steel, heat treated, white nickel finish. Other sizes, plain lacquer finish.

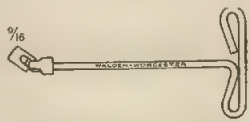
TEE-FLEX.



Universal Joint Tee Handle.

The "Tee-Flex" series has the added advantage of operating in difficult and seemingly impossible places gained by the use of a universal joint built integral with the tool and toughened by the proper heat treatment. On such inaccessible parts as cylinder to base nuts this tool is unequaled.

1428	7/8	15½	1¾	**1 10**

All above, five in a box.

WRENCHES.
WALDEN-WORCESTER.
RIM.

Heavy Duty—Four Socket.

Made of heavy stock and with a long sweep; solid steel grip on end and a steel grip in center.

Can be used either as a speed wrench or as an offset. If used as an offset it is an ideal wrench for badly rusted nuts or for final tightening, because its construction allows the swinging of the handle at any angle in either direction without removing the socket from the nut.

Socket sizes: ⅝ inch, 11/16 inch, ¾ inch and ⅞ inch.

No. 1453. Wt., 3¼ lbs.....Each **$3 50**

DOUBLE END SPARK PLUG.

Pressed steel and case hardened, two sizes in one; 1/64 inch over size of spark plug.

No. 2933. Sizes ⅞ and 1 inch. Wt., 11 oz. .....Each **$0 45**

No. 2937. Sizes ⅞ and 1⅛ inch. Wt., 11½ ozs. .....Each **$0 45**

RATCHET.

Heavy Duty.

Scientifically designed, with coil spring holding pawl in place against teeth; forged handle. Opening ½ in.; length overall, 10½ inches.

No. OR916. Wt., 1½ lbs...Each **$2 00**

Five in a package.

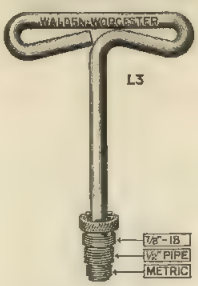
WRENCH HANDLES.
RATCHET SOCKET.

An efficient and inexpensive ratchet handle fitting all sizes of sockets. To reverse ratchet simply turn the tool over. Dead black finish.

No 355. Length 8 inches. Wt. each, ¾ lb. .....Each **$1 25**

One in a box.

LIFTING TOOLS.
WALDEN-WORCESTER.



Cylinder Head.

A tool which enables the user to lift the cylinder head from the block without damage to gaskets or surrounding parts.

To use, take out spark plugs and screw the lifting tool into the spark plug opening. The ratchet action enables one to do this easily and also, in tightening, to avoid obstructions in the way of the handle by changing from one slot to another

Although used and sold in pairs, there is just one size with three different threads, metric, ½ inch pipe and ⅞ inch—18, which will fit all spark plug holes. Shank, 6¾ inches; handle, 5 inches.

No. L3. Wt. each, 13 ozs...Each **$1 00**
